HOWEVER the way I did it that makes things so much less messy and confusing is get an old 5s loom, doesn't matter what from can use a celica one or anything all you want is the plugs.

3S-FE was the worse engine the MR2 was fitted with, The 5S-FE is its 2.2l bigger brother, the 3S-GE makes much more power than both depending on the year and the 3S-GTE is the Turbo. If you are swapping the engine DONT go backwards to a 3S-FE and your engine being "tired" wont have anything to do with the block, aparently the 5S-FE's are very reliable and have strong blocks.
