Something to Crow About By: Richard A. Klein This story is about a young crow who worries about his diminutive size and wishes he might be larger and prouder. Moe the Crow, feeling puny and tiny, turns to his mother. She gives him the family history tracing Moe to a time when his ancestors ruled the earth as dinosaurs. The story changes Moe's perspective making him believe that life's best is what lies ahead. The book gives young people a perspective of how dinosaurs evolved and a new way they can look at the birds around them. This book provides entertaining rhyme, colorful pictures, a scientific story, and a reminder of the bond between parents and their young.

A nonfiction investigation into masculinity, *For The Love of Men* provides actionable steps for how to be a man in the modern world, while also exploring how being a man in the world has evolved. In 2019, traditional masculinity is both rewarded and sanctioned. Men grow up being told that boys don't cry and dolls are for girls (a newer phenomenon than you might

realize—gendered toys came back in vogue as recently as the 80s). They learn they must hide their feelings and anxieties, that their masculinity must constantly be proven. They must be the breadwinners, they must be the romantic pursuers. This hasn't been good for the culture at large: 99% of school shooters are male; men in fraternities are 300% (!) more likely to commit rape; a woman serving in uniform has a higher likelihood of being assaulted by a fellow soldier than to be killed by enemy fire. In *For the Love of Men*, Liz offers a smart, insightful, and deeply-researched guide for what we're all going to do about toxic masculinity. For both women looking to guide the men in their lives and men who want to do better and just don't know how, *For the Love of Men* will lead the conversation on men's issues in a society where so much is changing, but gender roles have remained strangely stagnant. What are we going to do about men? Liz Plank has the answer. And it has the possibility to change the world for men and women alike.

Your guide to making better decisions Despite the dizzying amount of data at our disposal today—and an increasing reliance on analytics to make the majority of our decisions—many of our most critical choices still come down to human judgment. This fact is fundamental to organizations whose leaders must often make crucial decisions: to do this they need the best available insights. In *Judgment Calls*, authors Tom Davenport and Brook Manville share twelve stories of organizations that have successfully tapped their data assets, diverse perspectives, and deep knowledge to

build an organizational decision-making capability—a competence they say can make the difference between success and failure. This book introduces a model that taps the collective judgment of an organization so that the right decisions are made, and the entire organization profits. Through the stories in *Judgment Calls*, the authors—both of them seasoned management thinkers and advisers—make the case for the wisdom of organizations and suggest ways to use it to best advantage. Each chapter tells a unique story of one dilemma and its ultimate resolution, bringing into high relief one key to the power of collective judgment. Individually, these stories inspire and instruct; together, they form a model for building an organizational capacity for broadly based, knowledge-intensive decision making. You've read *The Wisdom of Crowds* and *Competing on Analytics*. Now read *Judgment Calls*. You, and your organization, will make better decisions.

Children's Writer's & Illustrator's Market St. Martin's Press

A revelatory look at the decisions that led to the U.S. involvement in Vietnam, drawing on the insights and reassessments of one of the war's architects "I had a part in a great failure. I made mistakes of perception, recommendation and execution. If I have learned anything I should share it." These are not words that Americans ever expected to hear from McGeorge Bundy, the national security adviser to Presidents John F. Kennedy and Lyndon B. Johnson. But in the last years of his life, Bundy—the only principal architect of Vietnam strategy to have maintained his public silence—decided to revisit the decisions that had led to war and to look anew at the role he played. He enlisted the collaboration of the political scientist Gordon M. Goldstein, and together they explored what happened and what might have been. With Bundy's death in 1996, that manuscript could not be completed, but Goldstein has built on their collaboration in an original and

provocative work of presidential history that distills the essential lessons of America's involvement in Vietnam. Drawing on Goldstein's prodigious research as well as the interviews and analysis he conducted with Bundy, *Lessons in Disaster* is a historical tour de force on the uses and misuses of American power. And in our own era, in the wake of presidential decisions that propelled the United States into another war under dubious pretexts, these lessons offer instructive guidance that we must heed if we are not to repeat the mistakes of the past.

Judgment Calls NYU Press

Read a free excerpt here! American engineers have done astounding things to bend the Mississippi River to their will: forcing one of its tributaries to flow uphill, transforming over a thousand miles of roiling currents into a placid staircase of water, and wresting the lower half of the river apart from its floodplain. American law has aided and abetted these feats. But despite our best efforts, so-called “ natural disasters ” continue to strike the Mississippi basin, as raging floodwaters decimate waterfront communities and abandoned towns literally crumble into the Gulf of Mexico. In some places, only the tombstones remain, leaning at odd angles as the underlying soil erodes away. *Mississippi River Tragedies* reveals that it is seductively deceptive—but horribly misleading—to call such catastrophes “ natural. ” Authors Christine A. Klein and Sandra B. Zellmer present a sympathetic account of the human dreams, pride, and foibles that got us to this point, weaving together engaging historical narratives and accessible law stories drawn from actual courtroom dramas. The authors deftly uncover the larger story of how the law reflects and even amplifies our ambivalent attitude toward nature—simultaneously revering wild rivers and places for what they are, while working feverishly to change them into something else. Despite their sobering revelations, the authors ’ final message is one of hope. Although the acknowledgement of human responsibility for unnatural disasters can lead to blame, guilt, and liability, it can also prod us to confront the consequences of our actions, leading to a liberating sense of possibility and to the knowledge necessary to avoid future disasters.

Finding Jake Harper Collins

The Wonderful Wizard of Oz chronicles the adventure of Dorothea in the land of Oz. A cyclone picks her up from her Kansas home, where she lives with her aunt and uncle, and deposits her in the fantastical land. She begins a journey along the yellow brick road to seek help from the Wizard of Oz. On her way she meets her fair share of witches (good and bad) and a scarecrow without a brain, a tinman without a heart and a cowardly lion. They travel together to the Emerald City to seek audience with the wizard.

Current discussions of the ethics around alternative food movements--concepts such as "local," "organic," and "fair trade"--tend to focus on their growth and significance in advanced capitalist societies. In this groundbreaking contribution to critical food studies, editors Yuson Jung, Jakob A. Klein, and Melissa L. Caldwell explore what constitutes "ethical food" and "ethical eating" in socialist and formerly socialist societies. With essays by anthropologists, sociologists, and geographers, this politically nuanced volume offers insight into the origins of alternative food movements and their place in today's global economy.

Collectively, the essays cover discourses on food and morality; the material and social practices surrounding production, trade, and consumption; and the political and economic power of social movements in Bulgaria, China, Cuba, Lithuania, Russia, and Vietnam. Scholars and students will gain important historical and anthropological perspective on how the dynamics of state-market-citizen relations continue to shape the ethical and moral frameworks guiding food practices around the world.

Important features of *Business Associations*, Fourth Edition, include: * Complete & developed materials on agency & partnership reflecting the authors' view that a good background in agency & partnership principles is important for its own sake, & for the study of corporate law * Problems helpful in illustrating material * Attention to the lawyer as planner, as opposed to litigator or critic.

Ethical Eating in the Postsocialist and Socialist World Univ of California Press
“ With good judgment, little else matters. Without it, nothing else matters. ” Whether we ’ re talking about United States presidents, CEOs, Major League coaches, or wartime generals, leaders are remembered for their best and worst judgment calls. In the face of ambiguity, uncertainty, and conflicting demands, the quality of a leader ’ s judgment determines the fate of the entire organization. That ’ s why judgment is the essence of leadership. Yet despite its importance, judgment has always been a fairly murky concept. The leadership literature has been conspicuously quiet on what, exactly, defines it. Does judgment differ from common sense or gut instinct? Is it a product of luck? Of smarts? Or is there a process for making consistently good calls? Noel Tichy and Warren Bennis have each spent decades studying and teaching leadership and advising top CEOs such as Jack Welch and Howard Schultz. Now, in their first collaboration, they offer a powerful framework for making tough calls when the stakes are high and the right path is far from obvious. They show how to recognize the critical moment before a judgment call, when swift and decisive action is essential, and also how to execute a decision after the call. Tichy and Bennis bring their three-dimensional model to life with interviews with world-class leaders who have thrived or suffered because of

their judgment calls. These stories include: • Jeff Immelt, CEO of General Electric, whose judgment to grow through research and development transformed GE into the world ’ s premier technology growth company. • Joel Klein, chancellor of the New York City Department of Education, who made tough calls about teachers, students, and parents while turning around a troubled school system. • Jim McNerney, CEO of Boeing, whose strategic judgment helped him reinvigorate his company and restore a culture of trust and respect. • The late general Wayne Downing, who found an unexpected opportunity in the midst of crisis when he led the Special Operations raid to capture Manuel Noriega. • A. G. Lafley, CEO of Procter & Gamble, who bet \$57 billion to purchase Gillette and reinvent his company. • Brad Anderson, CEO of Best Buy, who made the call to commit totally to a customer-centric strategy and led his people to execute it. Whether you ’ re running a small department or a global corporation, *Judgment* will give you a framework for evaluating any situation, making the call, and correcting if necessary during the execution phase. It will show you how to handle the overlapping domains of people, strategy, and crisis management. And it will help you teach your entire team to make the right call more often. No organization can afford to neglect this crucial discipline—and no previous book has ever brought it into such clear focus.

Safari Nation opens new lines of inquiry in the study of national parks in Africa and the rest of the world. The Kruger National Park is South Africa ’ s most iconic nature reserve, renowned for its rich flora and fauna. According to author Jacob Dlamini, there is another side to the park, a social history neglected by scholars and popular writers alike in which blacks (meaning Africans, Coloureds, and Indians) occupy center stage. *Safari Nation* details the ways in which black people devoted energies to conservation and to the park over the course of the twentieth century—engagement that transcends the stock (black) figure of the laborer and the poacher. By exploring the complex and dynamic ways in which blacks of varying class, racial, religious, and social backgrounds related to the Kruger National Park, and with the help of previously unseen archival photographs, Dlamini ’ s narrative also sheds new light on how and why Africa ’ s national parks—often derided by scholars as colonial impositions—survived the end of white rule on the continent. Relying on oral histories, photographs, and archival research, *Safari Nation* engages both with African historiography and with ongoing debates about the “ land question, ” democracy, and citizenship in South Africa.

Children are already learning at birth, and they develop and learn at a rapid pace in their early years. This provides a critical foundation for lifelong progress, and the adults who provide for the care and the education of young children bear a great responsibility for their health, development, and learning. Despite the fact that they share the same objective - to nurture young children and secure their future success - the various practitioners who contribute to the care and the education of children from birth through age 8 are not acknowledged as a workforce unified by the common knowledge and competencies needed to do their jobs well. *Transforming the Workforce for Children Birth Through Age 8* explores the science of child development, particularly looking at implications for the professionals who work with children. This report examines the current capacities and practices of the workforce, the settings in which they work, the policies and infrastructure that set qualifications and provide professional learning, and the government agencies and other funders who support and oversee these systems. This book then makes recommendations to improve the quality of professional practice and the practice environment for care and education professionals. These detailed recommendations create a blueprint for action that builds on a unifying foundation of child development and early learning, shared knowledge and competencies for care and education professionals, and principles for effective professional learning. Young children thrive and learn best when they have secure, positive relationships with adults who are knowledgeable about how to support their development and learning and are responsive to their individual progress. *Transforming the Workforce for Children Birth Through Age 8* offers guidance on system changes to improve the quality of professional practice, specific actions to improve professional learning systems and workforce development, and research to continue to build the knowledge base in ways that will directly advance and inform

future actions. The recommendations of this book provide an opportunity to improve the quality of the care and the education that children receive, and ultimately improve outcomes for children.

The New York Times Book Review

“ I devoured *Finding Jake*. The tension is almost unbearable in this thriller-cum-character study as layer after layer of a father ’ s soul are revealed as reflected in the character of his missing son. Utterly engrossing. ” —Alice LaPlante, New York Times bestselling author of *Circle of Wives* and *Turn of Mind* A heart-wrenching but redemptive story of psychological suspense told from the point of view of the father of a boy who is unaccounted for during a school shooting, in the vein of *Reconstructing Amelia* and *Defending Jacob*. While his successful wife goes off to her law office each day, Simon Connolly takes care of their kids, Jake and Laney. Now that they are in high school, the angst-ridden father should feel more relaxed, but he doesn’t. He ’ s seen the statistics, read the headlines. And now, his darkest fear is coming true. There has been a shooting at school. Simon races to the rendezvous point, where he ’ s forced to wait. Do they know who did it? How many victims were there? Why did this happen? One by one, parents are led out of the room to reunite with their children. Their numbers dwindle, until Simon is alone. As his worst nightmare unfolds, and Jake is the only child missing, Simon begins to obsess over the past, searching for answers, for hope, for the memory of the boy he raised, for mistakes he must have made, for the reason everything came to this. Where is Jake? What happened in those final moments? Is it possible he doesn ’ t really know his son? Or he knows him better than he thought? Brilliantly paced, *Finding Jake* explores these questions in a tense and emotionally wrenching narrative. Harrowing and heartbreaking, surprisingly healing and redemptive, *Finding Jake* is a story of faith and conviction, strength, courage, and love that will leave readers questioning their own lives, and those they think they know.

Judgment

Anyone who watches the television news has seen images of firefighters rescuing people from burning buildings and paramedics treating bombing victims. How do these individuals make the split-second decisions that save lives? Most studies of decision making, based on artificial tasks assigned in laboratory settings, view people as biased and unskilled. Gary Klein is one of the developers of the naturalistic decision making approach, which views people as

inherently skilled and experienced. It documents human strengths and capabilities that so far have been downplayed or ignored. Since 1985, Klein has conducted fieldwork to find out how people tackle challenges in difficult, nonroutine situations. *Sources of Power* is based on observations of humans acting under such real-life constraints as time pressure, high stakes, personal responsibility, and shifting conditions. The professionals studied include firefighters, critical care nurses, pilots, nuclear power plant operators, battle planners, and chess masters. Each chapter builds on key incidents and examples to make the description of the methodology and phenomena more vivid. In addition to providing information that can be used by professionals in management, psychology, engineering, and other fields, the book presents an overview of the research approach of naturalistic decision making and expands our knowledge of the strengths people bring to difficult tasks.

Federal Register

The bestselling author of *No Logo* shows how the global "free market" has exploited crises and shock for three decades, from Chile to Iraq In her groundbreaking reporting, Naomi Klein introduced the term "disaster capitalism." Whether covering Baghdad after the U.S. occupation, Sri Lanka in the wake of the tsunami, or New Orleans post-Katrina, she witnessed something remarkably similar. People still reeling from catastrophe were being hit again, this time with economic "shock treatment," losing their land and homes to rapid-fire corporate makeovers. The Shock Doctrine retells the story of the most dominant ideology of our time, Milton Friedman's free market economic revolution. In contrast to the popular myth of this movement's peaceful global victory, Klein shows how it has exploited moments of shock and extreme violence in order to implement its economic policies in so many parts of the world from Latin America and Eastern Europe to South Africa, Russia, and Iraq. At the core of disaster capitalism is the use of cataclysmic events to advance radical privatization combined with the privatization of the disaster response itself. Klein argues that by capitalizing on crises, created by nature or war, the disaster capitalism complex now exists as a booming new economy, and is the violent culmination of a radical economic project that has been incubating for fifty years.
