[Understand the New English Standards to Help Your Child Learn and Succeed](#) Princeton Review

Authors Susan Koba and Carol Mitchell introduce teachers of grades 3-5 to their conceptual framework for successful instruction of hard-to-teach science concepts. Their methodology comprises four steps: (1) engage students about their preconceptions and address their thinking; (2) target lessons to be learned; (3) determine appropriate strategies; and (4) use Standards-based teaching that builds on student understandings."

In this instant New York Times bestseller,

Angela Duckworth shows anyone striving to succeed that the secret to outstanding achievement is not talent, but a special blend of passion and persistence she calls "grit." "Inspiration for non-geniuses everywhere" (People). The daughter of a scientist who frequently noted her lack of "genius," Angela Duckworth is now a celebrated researcher and professor. It was her early eye-opening stints in teaching, business consulting, and neuroscience that led to her hypothesis about what really drives success: not genius, but a unique combination of passion and long-term perseverance. In *Grit*, she takes us into the field to visit cadets struggling through their first days at West Point, teachers working in some of the toughest schools, and young finalists in the National Spelling Bee. She also mines fascinating insights from history and shows what can be gleaned from modern experiments in peak performance. Finally, she shares what she's learned from interviewing dozens of high achievers—from JP Morgan CEO Jamie Dimon to New Yorker cartoon editor Bob Mankoff to Seattle Seahawks Coach Pete Carroll. "Duckworth's ideas about the cultivation of tenacity have clearly changed some lives for the better" (The New York Times Book Review). Among *Grit*'s most valuable insights: any effort you make ultimately counts twice toward your goal;

grit can be learned, regardless of IQ or circumstances; when it comes to child-rearing, neither a warm embrace nor high standards will work by themselves; how to trigger lifelong interest; the magic of the Hard Thing Rule; and so much more. Winningly personal, insightful, and even life-changing, *Grit* is a book about what goes through your head when you fall down, and how that—not talent or luck—makes all the difference. This is "a fascinating tour of the psychological research on success" (The Wall Street Journal).

Active Teaching and Active Learning Strategies: Creating a Blueprint for Success is the cumulative result of a year of reflecting, asking, and listening to questions, and comments, that many have concerning the education of our youth. The book's genesis however, started many years ago as the state of California, along with many other states, embraced a standards based accountability system. This accountability has now been coupled with the

recent addition of The No Child Left Behind Legislation. In a real sense, we are entering both the best and worst of times. I say this because of the effects of high-stakes testing and the requirement that all students reach high levels of proficiency which admittedly, are very lofty goals. For this to be realized, changes will be required in teaching and assessment, as well as a more concentrated focus on student learning. The instructional design introduced in this book advocates four components: academic, social/collaborative, contextual, and cognitive/developmental. These components work in tandem with Active Teaching and Learning Strategies. Combined, they form a student responsive instructional methodology, which optimizes student success, and academic achievement. We wanted to create a book that demonstrated to those of us in the field of education the value of looking at academic standards with data about our students, and reflecting on how this information should influence our choices concerning instructional practices and our perceptions about the students that we are entrusted with. The focus of this endeavor is to see all students achieve and succeed, and to keep passion and compassion at the heart of all that we do. It is the premise of this book that the difference between effective and outstanding teachers are that outstanding teachers care, know how to utilize data, practice active teaching strategies, and promote the active learning of students. Together these characteristics became the design, and course of action, that Created a Blueprint for Success.

Writing, for most students, is a difficult process. Many students struggle finding ways to successfully communicate on paper.

Many students struggle finding ways to successfully communicate on paper. The purpose of this action research project was to

evaluate whether or not the implementation of technology in a fifth grade writing class would increase students' ability to brainstorm ideas, edit, and create an organized, detailed writing sample. This study involved an intervention within a fifth grade classroom and adhered to the language arts curriculum that was used at Saint Joan of Arc School. This intervention was conducted with a fifth grade class; one half acted as an experimental group and the other served as the control group. Data was collected from every student in class. Findings suggest that using technology authentically during the writing process will help students organize and edit their ideas and in turn, produce a higher quality paper.

To satisfy the increased demand for forest products, much of the future timber supply is expected to be derived from improved trees grown on managed plantations. This fast-grown resource will tend to be harvested in short-age rotations and will contain higher proportions of juvenile wood compared with wood in current harvests. As a result, current allowable properties may need to be reduced in the future. This report explores four options for monitoring the properties of fastgrown wood and briefly discusses the advantages and disadvantages of these approaches. The recommended multiple-stage sampling approach is illustrated in detail using simulated results based on the North American In-Grade test results for Southern Pine. Finally, the report presents details of a gbsreal worldgcs example of monitoring lumber properties currently being conducted by the Southern Pine Inspection Bureau.
