In their science education theory book, Success in Science: A Manual for Excellence in Science Education, Bradley & Paige recommended that every middle school student complete a science fair style project. However, the prospect of spending a month or two on a science project can be daunting for home educators. They have written this follow-up guide to give the teacher the tools she needs to advise her students as they develop their science fair project. This step by step guide thoroughly explains the eight steps for executing a science fair project, provides you with keys for completing each step

and details a sample project. It also includes sheets for the teacher to give to the students as they lead them through the process. The book also gives information on how to ramp up the science fair project for a high school student.
