Science Experiments, Grades 5 - 12 Simon & Schuster/Paula Wiseman Books  
Draws on techniques from the popular Discovery Channel series for science experiments which test common beliefs, providing step-by-step instructions for recreating the results of the MythBusters team.

Science Fair Projects, Grades 5 - 8 Mark Twain Media  
Behind the magic of Harry Potter—a witty and illuminating look at the scientific principles, theories, and assumptions of the boy wizard's world, newly come to life again in Harry Potter and the Cursed Child and the upcoming film Fantastic Beasts: The Crimes of Grindelwald Can Fluffy the three-headed dog be explained by advances in molecular biology? Could the discovery of cosmic "gravity-shielding

effects" unlock the secret to the Nimbus 2000 broomstick's ability to fly? Is the griffin really none other than the dinosaur Protoceratops? Roger Highfield, author of the critically acclaimed The Physics of Christmas, explores the fascinating links between magic and science to reveal that much of what strikes us as supremely strange in the Potter books can actually be explained by the conjurings of the scientific mind. This is the perfect guide for parents who want to teach their children science through their favorite adventures as well as for the millions of adult fans of the series intrigued by its marvels and mysteries. • An ALA Booklist Editors' Choice • Fifth Grade Science Experiments RH Childrens Books  
Provides experiments associated with a bag of potato chips: bags, chips, lids, spuds, and tubes. Weather Puffin Books  
If your child is struggling with science, then this book is for you;

Gives curious young readers dozens of colorful, exciting projects designed to teach them about the basics of science, physics, chemistry and

---

engineering. They'll learn about critical thinking, how to conduct an experiment, and how to measure results, in a screen-free setting.

### Potato Chip Science Good Year Books

In their science education theory book, *Success in Science: A Manual for Excellence in Science Education*, Bradley & Paige recommended that every middle school student complete a science fair style project. However, the prospect of spending a month or two on a science project can be daunting for home educators. They have written this follow-up guide to give the teacher the tools she needs to advise her students as they develop their science fair project. This step by step guide thoroughly explains the eight steps for executing a science fair project, provides

you with keys for completing each step and details a sample project. It also includes sheets for the teacher to give to the students as they lead them through the process. The book also gives information on how to ramp up the science fair project for a high school student.

### The Science of Harry Potter

Carson-Dellosa Publishing

This workbook, with 40 science experiments and 100 quiz questions, covers the following topics: Scientific Investigation, Changes In Matter, Electricity In Matter, Organisms, Light Human Body, Life Cycle and Reproduction, Weather, Earth and How It Changes If you are homeschooling (or if you are just trying to get extra practice for your child), then you already know that

---

science workbooks and curriculum can be expensive. HomeSchool Brew is trying to change that! We have teamed with teachers and parents to create books for prices parents can afford. We believe education shouldn't be expensive. The problem portion of the book may also be purchased individually in "Fifth Grade Science Experiments."

The Coding Manual for Qualitative Researchers John Wiley & Sons

Introduces the scientific method and presents step-by-step instructions for performing a variety of experiments.

Science Fair Handbook  
Penguin

Science certainly does not need to be complicated formulas, heavy text books and geeky guys in white lab coats with thick glasses. Science can be really simple

and is actually only about understanding the world you live in! Science experiments are an awesome part of science that allows you to engage in cool and exciting hands on learning experiences that you are sure to enjoy and remember! By working through the science projects in this book, you will learn about science in the best possible way – getting your hands dirty & doing things yourself! Specially chosen to appeal to kids in grade 5, each experiment answers a particular question about a specific category of science and includes an introduction, list of the materials you need, easy-to-follow steps, an explanation of what the experiment demonstrates as well as a learn more and science glossary section! Each of these easy-to-understand sections helps explain the underlying scientific concepts to kids and will inspire them to create their

---

own related experiments and aid in developing an inquisitive mind. Amongst many others, you will construct your own moon box to understand how the lunar cycles works, make matchsticks move without touching them using the principles of forces & motion, drawing colours from black ink using basic

‘ chromatography ’ , and remove static charges in clothing by grounding them to learn about the attraction & repulsion forces of static electricity! Other fun experiments include making your own guitar out of an ordinary shoebox, propelling a toy boat with the power of air pressure, calculating the viscosity factor of various liquids, using chemistry to make your own homemade perfume, making your own refrigerator powered by evaporation and many, many more! The 40 projects contained in this science

experiment e-book cover a wide range of scientific topics; from Chemistry and Electricity to Life Sciences and Physics... there are even experiments on earth science, astronomy and geology all designed for young students in grade 5! With this book, you are sure to find a project that interests you.

When you are interested in a certain science topic, you will have more fun, and learn more, too! Designed with safety in mind, most of the items you will need for the experiments, such as jars, aluminium foil, scissors and sticky tape, you can find around your home. Others, such as magnets, lenses or a compass, you will be able to buy quite cheaply at a hobby shop or hardware store.
