Last year, nearly 200,000 eighth graders took the entrance exams to get into Catholic high schools. For many, this is their first time taking any kind of standardized entrance exam. To help make the experience a positive one, this valuable guide provides expert advice, practical tips, and lots of practice to help students prepare successfully for test day. It also provides tips for parents to help their children maintain realistic expectations while studying for the exam. Included in Kaplan's Catholic High School Entrance Exams are six full-length practice tests—two for each exam commonly administered—the Cooperative Entrance Examination (COOP), the High School Placement Test (HSPT), and Test for Admission into Catholic High Schools (TACHS). Also included are diagnostic quizzes with targeted feedback; a review of key concepts and material found on tests; and up-to- the-minute test information and changes. Kaplan's Catholic High School Entrance Exams gives students the study tools and reassurance they need to achieve a high score on this important test.

Proportion and Percent Problems Routledge

Language Learning by a Chimpanzee: The Lana Project brings together several disciplinary endeavors, such as primatology, experimental psychology, cognitive psychology, computer and information sciences, and neurosciences. This book is composed of two sets of data—one relates to language learning in the chimpanzee, while the other deals with language construction by Homo sapiens. The fundamental issue of mind-brain dualism and difference between man and beast are also covered. This text mainly describes the LANA project that aims to develop a computer-based language training system for investigation into the possibility that chimpanzees may have the capacity to acquire human-type language. This publication is recommended for biologists, specialists, and researchers conducting work on language learning in nonhuman primates.
