Savage Yard Macmillan
In Savage Yard, G. F. Harper employs narrative in a poetic prose that captures the realness of the American experience and explores the bewilderment of the human condition. The work is unvarnished and brutally unromantic but at the same time the writing hints at a romantic sense of hope while each poem lives out the gritty reality of Harper's intense perception of life, often driven by a distinctive dark humor style. Harper's work contemplates unemployment, loneliness, love, war, abandonment, and transformation. The images are crisp and Harper has composed a world for readers to bring to life with their imagination.

This manual is intended for use by all Army crewmembers in meeting requirements set forth in Army Regulation 95-1,

Training Circular 1-210, and other appropriate aircrew training manuals. Lessons learned from previous military conflicts and recent contingency operations have caused changes in Army aviation doctrine. With the development of more sophisticated aircraft and weapons systems, Army crewmembers must be capable of operating these systems around the clock, in austere environments, and under adverse conditions. The hazards of stress and fatigue in combat operations

and concept of operations will eventually take a toll in aircrew performance and could jeopardize mission accomplishment unless crewmembers are trained to recognize and understand these hazards. Proper training prepares crewmembers and prevents stress and fatigue from reducing mission effectiveness, thereby increasing their chances of survival. Training Circular 3-04.93 provides crewmembers with an understanding of the physiological responses that can

occur in the aviation environment. It also describes the effects of the flight environment on individual mission accomplishment. In addition, this publication outlines essential aeromedical training requirements (in Chapter 1) that assist commanders and flight surgeons in conducting aeromedical education for Army crewmembers. Subject areas addressed are by no means all inclusive but are presented to assist crewmembers in

increasing performance and efficiency. This publication applies to the Active Army, the Army National Guard/Army National Guard of the United States, and the United States Army Reserve unless otherwise stated.
