Pike & Fischer - A BNA Company

In recent years, significant advances have been
made in the development and application of
software tools for predicting the flow, water
quality, sediment transport and ecological
processes in river systems. Since 2001, the Wessex
Institute of Technology has organized a biennial
conference to facilitate the sharing of these
advances. This book contains the papers presented
at the latest conference in the series. The papers
presented at the Conference cover Water resources
management; Flood studies; Ecological and
environmental impact; Erosion and sediment
transport; Hydrological modelling; Eco-hydraulics;
River restoration and rehabilitation; Hydropower
production; River and watershed management; Water
quality issues; Trans-boundary river issues;
Estuaries and deltas; Changing Climate; Droughts
and desertification; Water and health; and Socio-
economic and political issues.
