Like it or not, the automobile industry is now and will remain an overwhelming factor in the lives of most people - if not an owner and driver, then as a pedestrian or a breather of air, which is being polluted by the gas-guzzling and vile-air belching monsters created for our individual hedonistic pleasure. This book presents issues of current interest to those who cannot ignore their presence.

The automotive industry underwent great change in the 1960s and the early 1970s. The continuing trend toward market consolidation, the proliferation of sizes and nameplates, and the "need for speed" characterized this period, loosely labeled as the muscle car era. This is an exhaustive reference work to American made cars of model years 1966-1972. Organized by year (and summarizing the market annually), it provides a yearly update on each make's status and production figures, then details all models offered for that year. Model listings include available body styles, base prices, engine and transmission choices, power ratings, standard equipment, major options and their prices, curb weight and dimensions (interior and exterior), paint color

choices, changes from the previous year's model, and sales figures. Also given are assembly plant locations and historical overviews of each model nameplate. Consumers Guide on Automobile Insurance (Downstate)

Chrysler

In recent years, Chrysler has made waves with a series of dramatic new show cars, exciting production vehicles like the Prowler and Viper, and its mega-merger with German juggernaut Daimler-Benz. It is generally accepted that Chrysler is the most forward-thinking of the Big Three American automakers, yet the company also has a

wonderfully compelling past. Just in time to mark Chrysler's 75th anniversary, this beautifully illustrated history takes readers on a journey that spans the company's genesis in the 1920s to present. Marvelous archival black-and-white photography is accompanied by nostalgic period color imagery, print ads, and new color photography of classics. The story includes model from Dodge, Plymouth, Imperial, and DeSoto, while sidebars highlight key figures and stunning feats of engineering and styling.

Chrysler Convertibles 1939-1959

In the early 1970s, Chrysler started working on a "magic wagon" -- a completely new passenger van that would fit into a normal garage. It was a daring

project for a company that was strapped for cash. This book taps the people who created the minivans, with previously unpublished photos of the original clay models. It is not just a story of a vehicle, but of the people who pushed it through the development process, brought it to life, and refreshed it in the face of intense competition. Engineers, planners, and designers started arguing over alternatives ten years before the first van left the factory. This book dives into the reasons behind their decisions, and some of the ways minivans could have been very different; it also covers electric and CNG minivans, engines and transmissions, concept cars, and the assembly plants. The

paperback is generously illustrated with full-color design studies and photos of the final product; the Kindle version has fewer photos, but still covers the original clay models and the concepts. "It's incredibly rare when the auto industry creates an entirely new class of vehicle, and rarer still when that innovation is an unqualified success story, but such was the case with Chrysler and the development of the minivan. "In Mopar Minivans, Zatz uses the people who were there to retell in vivid detail the largely forgotten story of how this innovative people mover evolved into a quintessential piece of American family life for two generations. It's a story that showcases not only how the automotive industry can work

at its best, but also the ways that the industry's prevalent groupthink mentality can stifle innovation." -- Larry Vellequette, Automotive News "I am amazed how complete you are, having not been on-site in the front trenches during agreements, disagreements, and, yes, even skirmishes, at times." -- Chrysler employee David Zatz founded Chrysler-focused web site allpar.com; he also holds a Ph.D. in social and organizational psychology from Columbia University, and has been a business consultant for 20 years. *Kiplinger's Personal Finance* Covers all Chrysler corporation station wagons, including: Plymouth, Dodge, Desoto and Chrysler, from 1939-1954. All models, woodie and steel versions.

Details and specifications. over 150 large B&W photos. Excellent primer and quick reference guide.

Excerpt: Imperial was the Chrysler Corporation's prestige automobile brand between 1955 and 1975, with a brief reappearance in 1981 to 1983. The Imperial name had been used since 1926, but was never a separate make, just the top-of-the-line Chrysler. In 1955, the company decided to spin it off as its own make and division to better compete with its rivals, Lincoln and Cadillac. Imperial would see new body styles introduced every two to three years, all with V8 engines and automatic transmissions, as well as technologies that would filter down to Chrysler corporation's other models. 1955 Imperial Newport 1955 Imperial Newport with rear view of free-standing "gunsight" taillights 1955 Imperial Newport For the 1955 model year, the Imperial was launched and registered as a
