?As the hottest bodyguard on Security Force Omega, Oscar Oliveira has no trouble finding a warm body at any odd hour. But he's ready for more. And for the first time in this ex-pro boxer's life, he just got rejected. For a kiss. Oscar's friends warned him

---

not to fall for the straight guy, but flirty, sexy-as-hell Jack Highland made that difficult. Now Jack has Oscar's sweater. His belt. His bandana. And Oscar seriously wants them back. As for Jack – well, Jack wants a lot of things. But for the first time in this confident filmmaker's life, he's absolutely 100%... confused. Add another ultra-complication in a sea of complicated: Enter Charlie Cobalt. The enigmatic famous one that Oscar is sworn to protect wants his own show, and he's asked Jack to film it. A Charlie-centric docuseries will force Oscar & Jack to share the same air again. Option 1: Ignore each other. Option 2: Flirt, aw yeah. And act like the rejection never happened. Option 3: Confront each other about the rejected kiss. With options on the table and their romantic lives unsettled, both Jack & Oscar are concerned about why Charlie wants his own show. And the longer filming lasts, the more tumultuous their personal & professional worlds become. Chaos reigns when you're around the Cobalts, and Jack & Oscar are swept up among the most destructive one.

Excerpt from Distribution of Cobalt 60, Zinc 65, Strontium 85, and Cesium 137 in a Freshwater Pond After 4 days, 10 percent of the cobalt 60, 6 percent Of the zinc 65, and 5 percent Of the cesium 137 remained in solution. Cobalt 60 and zinc 65 were associated principally with suspended solids, and cesium 137 with bottom sediments. In general, soft parts Of biota rapidly accumulated more radio nuclides than hard parts, but gradually lost radioactivity as radionuclide concentrations in the water decreased. Clam and snail shells and fish bone usually accumulated zinc 65 and strontium 85 until almost the end Of the experiment. More zinc 65 than any of the other test radionuclides was found in soft parts Of biota. Strontium 85 activities usually exceeded those of zinc 65 in shell and bone. Young clams and snails accumulated more zinc 65 and strontium 85 than did adult clams and snails. Strontium 85 concentrations in the soft parts Of clams were higher in the adults. The maximum Observed accumulation Of strontium 85 occurred in the crayfish exoskeleton. Maximum activities of the other test radionuclides were Observed in the tadpoles. **TODAY'S TECHNICIAN: ADVANCED AUTOMOTIVE**

**ELECTRONIC SYSTEMS**, is an extension of the popular Today's Technician Series that covers all mechanical and electrical systems of automobiles and light trucks. This book is intended for a course in advanced automotive electronic systems and is divided into two volumes: a Classroom Manual and a Shop Manual that separate cognitive and performance learning objectives, respectively. The design is based on features that are known to promote improved student learning. The Classroom Manual contains the principles of operation for the most advanced electrical systems used today and covers design variations of components used by the different vehicle manufacturers. The book builds upon basic facts and theories and will help develop students' knowledge through its extensive coverage of component and system operation. The Shop Manual covers the diagnostic processes for proper repairs and focuses more on the diagnostics of the components used within a system than on how to replace the component. The intent is to guide your students' thought processes toward finding the root cause of the problem, concentrating their attention on becoming a diagnostician and not a parts changer. Your students will learn how to develop a systematic approach to problem solving in order to isolate the root cause of the problem, thereby enhancing their ability to fix products right the first time. Photo Sequences are used to illustrate some of the common diagnostic procedures. Both Manuals are arranged in corresponding chapters, and topics within the chapters are linked between manuals by page references in the margins. Both volumes contain clear and thoughtfully-

selected photos and illustrations. The margins of the pages include many special features of the series that are designed to underscore important points made in the running text, highlight safety concerns, and offer real world scenarios that the author has encountered in the shop. **TODAY'S TECHNICIAN: ADVANCED AUTOMOTIVE**

**ELECTRONIC SYSTEMS**, Second Edition, helps readers understand, diagnose, and repair the sophisticated electronic systems in today ' s automobiles. Bridging theory and practice, the text provides an overview of important electronic systems and outlines real-world symptoms, diagnostics, and repair information. Known for its thorough coverage, accurate technical information, and detailed visuals, this resource prepares users for success on ASE certification exams or as an automotive technician. The Second Edition adds detailed coverage of network architecture and increased coverage of telematic systems, Wi-Fi connectivity, remote start, and stop/start technology. This edition is enhanced with full-color photography and illustrations. Text content aligns with the ASE Education Foundation 2017 accreditation model--including job sheets correlated to specific MLR, AST and MAST tasks.
