**Ford Police Cars, 1932-1997** Osprey View Press

Now updated — A comprehensive, 500-year history of technology in society. Historian Thomas J. Misa's sweeping history of the relationship between technology and society over the past 500 years reveals how technological innovations have shaped—and have been shaped by—the cultures in which they arose.

Spanning the preindustrial past, the age of scientific, political, and industrial revolutions, as well as the more recent eras of imperialism, modernism, and global security, this compelling work evaluates what Misa calls "the question of technology." In this edition, Misa brings his acclaimed text up to date by drawing on current scholarship while retaining sharply drawn portraits of individual people, artifacts, and systems. Each chapter has been honed to relate to contemporary concerns. Globalization, Misa argues, looks differently considering today's virulent nationalism, cultural chauvinism, and trade wars. A new chapter focuses on the digital age from 1990 to 2016. The book also examines how today's unsustainable energy systems, insecure information networks, and vulnerable global shipping have helped foster geopolitical risks and instability and takes a look at the coronavirus pandemic from the perspective of Wuhan, China's high-tech district. A masterful analysis of how technology and culture have influenced each other over five centuries, Leonardo to the Internet frames a history that illuminates modern-day problems and prospects faced by our technology-dependent world.

**Consumers Digest** W. W. Norton & Company

This book offers tremendous detail about the Ford models used by law enforcement agencies between 1932 and today. The

### **The Environmental Communication Yearbook** JHU Press

A Geo-Big Year: Pandemic Retirement is for the Birds. This book recounts a year-long birding quest across Pennsylvania in 2021. The quest was to see at least 67 bird species in each of the state's 67 counties. During the quest year, the author (now Professor of Geography Emeritus from Penn State University) coped with the process of retiring after 42 years in academia and the challenges that the Covid-19 pandemic posed for safe travel. The book chronicles the birding experiences and birds seen as well as the travel and retirement challenges. The story, told chronologically, is focused on the search for birds. It includes an account of what birds were seen (or not seen) in specific counties and specific sites within those counties. It also recounts the quest itself as it unfolded. Written by a Geographer, places visited are also highlighted. The narrative conveys the adventure of experiencing the mix of both popular and seldom visited places. These places were mostly rural and included state and county parks, game lands, wildlife refuges, trails, and forests across the state together with less attractive places (for humans) that still attract birds (such as cemeteries, retention ponds, and county dumps). The book includes 471 black and white figures, most of which are photo composites of birds seen and/or of the places visited. In total, the 471 figures consist of more than 600 photos of birds plus more than 300 other images (that include landscape

scenes, signage, non-bird creatures seen, maps, and graphs). The book is intended for a wide audience. Aspects of the account should resonate with readers who: are or want to be birders; are retired or contemplating retirement; like to travel, particularly on back roads and to natural places that are off the beaten track; are academics thinking about work life balance; have tried (or thought about trying) camping after not doing any for a long time; have a bucket list to pursue; have experienced life changes or expect to have some soon; or have ever contemplated pursuing a birding big year or any other kind of year-long quest.

### **Corporate Average Fuel Economy (CAFE) Reform**

**Editorial Scope** The Environmental Communication Yearbook is a multidisciplinary forum through which a broad audience of academics, professionals, and practitioners can share and build theoretical, critical, and applied scholarship addressing environmental communication in a variety of contexts. This peer-reviewed annual publication invites submissions that showcase and/or advance our understanding of the production, reception, contexts, or processes of human communication regarding environmental issues. Theoretical expositions, literature reviews, case studies, cultural and mass media studies, best practices, and essays on emerging issues are welcome, as are both qualitative and quantitative methodologies. Areas of topical coverage will include: \*participatory processes: public participation, collaborative decision making, dispute resolution, consensus building processes, regulatory negotiations, community dialogue, building civic capacity; \*journalism and mass communications: newspaper, magazine, book and other forms of printed mass media; advertising and public relations; media studies; and radio, television, and Internet broadcasting; and \*communication studies: rhetorical/historical case studies,

organizational analyses, public relations/issues management, interpersonal/relational dimensions, risk communication, and psychological/cognitive research, all of which examine the origins, content, structure, and outcomes of discourse about environmental issues. Submissions are accepted on an ongoing basis for inclusion in volumes published annually. Audience Researchers, scholars, students and practitioners in environmental communication, journalism, rhetoric, public relations, mass communication, risk analysis, political science, environmental education, environmental studies, public administrations; policymakers; others interested in environmental issues and the communication channels used for discourse and information dissemination on the topic. For more information and guidelines for submissions, visit [www.erlbaum.com/ecy.htm](http://www.erlbaum.com/ecy.htm).
