Doctors, as strong, clever, resourceful professionals, are heir to human frailty and illness, like anyone else. This book is about diagnosable, label-able mental illness such as eating disorders, affective disorders and, sometimes, psychosis. More than that, it is a book about doctors, many fully-functioning, practising doctors, who suffer from these illnesses, and the unique insights and problems that arise when the doctor is the patient, especially when questions of insight and judgement are blurred.

Drugs and Addictive Behaviour Dundurn

In this completely revised and updated third edition of his highly successful book, Hamid Ghodse presents a comprehensive overview of substance misuse and dependence. There is a particular emphasis on practical, evidence-based approaches to the assessment and management of a wide range of drug-related problems in a variety of clinical settings, and he has written an entirely new chapter on alcohol abuse. He defines all the terms, and describes the effects of substance misuse on a patient's life. Epidemiology, and international prevention and drug control policies are covered to address the global nature of the problem, and the appendix provides a series of clinical intervention tools, among them a Substance Misuse Assessment Questionnaire. This will be essential reading for all clinicians and other professionals dealing with addiction, from counsellors and social workers to policy makers.

In 2004 new arrangements for out-of-hours general practice were introduced as part of a new General Practitioner (GP) contract with the aim of addressing

inadequate standards and difficulties in retaining doctors in general practice. Many consider the new system an improvement on its predecessor, but it has some serious weaknesses. In particular the use of EEA doctors and the failure to check their language skills and clinical competence has led to poor clinical care and deaths of patients. It is on this aspect that this report focuses.

This is the first UK-based guide to Advance Care Planning, and provides practical advice on how this can be implemented by all professionals involved in end of life care, including GPs and specialists outside palliative care who are increasingly treating patients at the end of life. The Complete MRCGP Study Guide Bell Bridge Books Collision Reconstruction Methodologies - Volume 6B - The last ten years have seen explosive growth in the technology available to the collision analyst, changing the way reconstruction is practiced in fundamental ways. The greatest technological advances for the crash reconstruction community have come in the realms of photogrammetry and digital media analysis. The widespread use of scanning technology has facilitated the implementation of powerful new tools to digitize forensic data, create 3D models and visualize and analyze crash vehicles and environments. The introduction of unmanned aerial systems and standardization of crash data recorders to the crash reconstruction community have enhanced the ability of a crash analyst to visualize and model the components of a crash reconstruction. Because of the technological changes occurring in the industry, many SAE papers have been written to address the validation and use of new tools for collision reconstruction. Collision Reconstruction Methodologies Volumes 1-12 bring together seminal SAE technical papers surrounding advancements in the crash reconstruction field. Topics featured in the series include: • Night Vision Study and Photogrammetry • Vehicle Event Data Recorders • Motorcycle, Heavy Vehicle, Bicycle and Pedestrian Accident Reconstruction The goal is to provide the latest technologies and methodologies being introduced into collision reconstruction - appealing to crash analysts, consultants and safety engineers alike.

The subjects of Privacy and Data Protection are more relevant than ever with the European General Data Protection Regulation (GDPR) becoming enforceable in May 2018. This volume brings together papers that offer conceptual analyses, highlight issues, propose solutions, and discuss practices regarding privacy and data protection. It is one of the results of the tenth annual International Conference on Computers, Privacy and Data Protection, CPDP 2017, held in Brussels in January 2017. The book explores Directive 95/46/EU and the GDPR moving from a market framing to a 'treaty-base games frame', the GDPR requirements regarding machine learning, the need for transparency in automated decision-making systems to warrant against wrong decisions and protect privacy, the riskrevolution in EU data protection law, data security challenges of Industry 4.0, (new) types of data introduced in the GDPR, privacy design implications of conversational agents, and reasonable expectations of data protection in Intelligent Orthoses. This interdisciplinary book was written while the implications of the General Data Protection Regulation 2016/679 were beginning to become clear. It discusses open issues, and daring and prospective approaches. It will serve as an insightful resource for readers with an interest in computers, privacy and data protection.
