How to Succeed at Revalidation John Wiley & Sons
In this completely revised and updated third edition of his highly successful book, Hamid Ghodse presents a comprehensive overview of substance misuse and dependence. There is a particular emphasis on practical, evidence-based approaches to the assessment and management of a wide range of drug-related problems in a variety of clinical settings, and he has written an entirely new chapter on alcohol abuse. He defines all the

terms, and describes the effects of substance misuse on a patient's life. Epidemiology, and international prevention and drug control policies are covered to address the global nature of the problem, and the appendix provides a series of clinical intervention tools, among them a Substance Misuse Assessment Questionnaire. This will be essential reading for all clinicians and other professionals dealing with addiction, from counsellors and social workers to policy makers.

Higher Professional Education for General Practitioners is a practical guide on the best ways to plan educational and vocational training needs throughout professional practice. It clearly outlines the underlying issues surrounding the introduction of higher professional education (HPE) enabling newly qualified professionals to focus on areas that they feel less competent in, and areas that require additional training. In an easy-to-read format it provides all the necessary information to assist readers undertaking HPE, and for all those setting up educational programmes for newly qualified GPs in the first year after their vocational training scheme.

Essential Primary Care aims to provide undergraduate students with a comprehensive overview of the clinical problems encountered in primary care. It covers the structure of primary care in the UK, disease prevention and the management of common and important clinical presentations from infancy to old age. Case studies are used in every chapter to illustrate key learning points. The book provides practical advice on how to consult with patients, make sense of their symptoms, explain things to them, and manage their problems. Essential Primary Care is structured in five sections: The building blocks of primary care: its structure and connection with secondary care, the consultation,

the process of making a diagnosis, prescribing, and ethical issues
Health promotion
Common and important presenting problems in roughly chronological order
Cancer Death and palliative care
Gives advice on how to phrase questions when consulting with patients and how to present information to patients
Provides advice on how management extends to prescribing - often missing from current textbooks

"This book belongs on every fiction writer's bookshelf. Anyone who has ever had a story to tell and is dying to get it down on paper will find guidance and inspiration in GMC. The presentation is clear, immediate, and relevant to all writers--from novices to seasoned professionals. Experienced author Debra Dixon has done a magnificent job of demystifying the toughest aspect of fiction writing: that of a giving a story shape, form and urgency." -- Susan Wiggs, New York Times bestselling and RITA® Award winning author of over 40 novels and novellas "One of the best in her craft." -- Toronto Star "Goal,

Motivation & Conflict is one of my all time favorites." -- Jane Porter (Flirting With Forty), award winning and bestselling author with 10 million books in print, in twenty languages and 25 countries
Goal, motivation, and conflict are the foundation of everything that happens in the story world. Using charts, examples, and movies, the author breaks these key elements down into understandable components and walks the reader through the process of laying this foundation in his or her own work. Learn what causes sagging middles and how to fix them, which goals are important, which aren't and why, how to get your characters to do what they need for your plot in a believable manner, and how to use conflict to create a good story. GMC can be used not only in plotting, but in character development, sharpening scenes, pitching ideas to an editor, and evaluating whether an idea will work. Be confident your ideas will work before you write 200 pages. Plan a road map to keep your story on track. Discover why your scenes aren't working and what to do about it. Create characters that editors and readers will care about.

This is an exploration of how the higher functions of the brain can be investigated, evaluated and, possibly, explained. A central theme throughout the book is rationality, since issues requiring rational evaluation confront many people everyday though emotional factors are often more influential in determining action. The book looks at various questions: is it possible to understand what is going on in someone else's mind?; why do people who are known very well often react irrationally, in a totally different way to what is expected?; what are emotions, beliefs, feelings and desire? Throughout, episodes from history involving famous artists and politicians are used - Gladstone and Lincoln, Bach and Graupner, Austen and Dickens - all providing useful examples to illustrate how rationality can provide an insight into the feeling self. The automotive industry appears close to substantial change engendered by "self-driving" technologies. This technology offers the possibility of significant benefits to social welfare—saving lives; reducing crashes, congestion, fuel consumption, and pollution; increasing mobility for the disabled; and ultimately improving land use. This report is intended as a guide for state and federal policymakers on the many issues that this technology raises.

Medical Self-regulation Dundurn
In 2004 new arrangements for out-of-hours general practice were introduced as part of a new General Practitioner (GP) contract with the aim of addressing inadequate standards and difficulties in retaining doctors in general practice. Many consider the new system an improvement on its predecessor, but it has some serious weaknesses. In particular the use of EEA doctors and the failure to

check their language skills and clinical competence has led to poor clinical care and deaths of patients. It is on this aspect that this report focuses.
