Car Troubles central premise is that the car as the dominant mode of travel needs to be problematized. It examines a wide range of issues that are central to automobility by situating it within social, economic, and political contexts, and by combining social theory, specific case studies and policy-oriented analysis. With an international team of contributors the book provides a coherent and comprehensive analysis of the global phenomenon of automobility from the Anglo world to the cases in China and Chile and all the elements that relate to it.

Lemon-Aid guides steer the confused and anxious buyer through the economic meltdown unlike any other car-and-truck books on the market. U.S.

automakers are suddenly awash in profits, and South Koreans and Europeans have gained market shares, while Honda, Nissan, and Toyota have curtailed production following the 2011 tsunami in Japan. Shortages of Japanese new cars and supplier disruptions will likely push used car prices through the roof well into 2012, so what should a savvy buyer do? The all-new Lemon-Aid Used Cars and Trucks 2012-2013 has the answers, including: More vehicles rated, with some redesigned models that don't perform as well as previous

iterations downrated. More roof crash-worthiness ratings along with an expanded cross-border shopping guide. A revised summary of safety- and performance-related defects that are likely to affect rated models. More helpful websites listed in the appendix as well as an updated list of the best and worst "beaters" on the market. More "secret" warranties taken from automaker internal service bulletins and memos than ever.

Kiplinger's Personal Finance

This Repairman Jack book from F. Paul Wilson, Bloodline, the eleventh in the series, follows the New York Times bestseller,

Harbingers. Jack has been on hiatus since the events in Harbingers. With his lover Gia's encouragement he dips a toe back into the fix-it pool. Christy Pickering's eighteen-year-old daughter is dating Jerry Bethlehem, a man twice her age. Christy sensed something shady and sinister about him, so she hired a private investigator to look into his past. But the PI isn't returning her calls. Will Jack find out why? Jack learns there's a very good reason for the unreturned calls: The PI is dead, a victim of a bizarre water-torture murder. As Jack delves into Jerry Bethlehem's past he learns that the man is not who he says he is. Who—and what—he is will have a devastating effect on Jack's life and future, adding another piece to the puzzle of who he really is and why he's been drafted into this cosmic shadow war. Achieving your goals quickly and efficiently is both more difficult and more important in

today's hyper-globalized world. A new environment is being created by disruptive technology, radical new business models, digital communications, and a highly integrated global supply chain. It is a world in which a reality TV host and businessman became President of the United States, in which terrorists use social media to recruit members and to broadcast executions, in which the very existence of the nation state is in question, where everyone can communicate globally 24 hours a day at no cost, and in which a leader is much more likely to be at the center of a crisis. Today, successful global leaders will be those that have a working knowledge of strategic public relations as described in this book. For current

and future leaders of business and government it is essential to understand the forces creating this very challenging new environment and to acquire a new skill set. This book provides the needed understanding and teaches you the skill of public relations as multi-stakeholder relationship management. It shows how to achieve your goals and objectives when others fail by building win-win outcomes with current and future employees, investors, suppliers, distributors, customers, governments and all the other stakeholders. Written by a veteran public relations professional and a visiting professor of major graduate schools of management.
