Until researchers and theorists account for the complex relationship between resilience and culture, explanations of why some individuals prevail in the face of adversity will remain incomplete. This edited volume addresses this crucial issue by bringing together emerging discussions of the ways in which culture shapes resilience, the theory that informs these various studies, and important considerations for researchers as they continue to investigate resilience. Using research from majority and minority world contexts, 'Youth Resilience and Culture: Commonalities and Complexities' highlights that non-stereotypical, critical appreciation of the cultural systems in which youth are embedded, and/or affiliate with, is pivotal to understanding why particular resilience processes matter for particular youth in a particular life-world at a particular point in time. In doing so, this book sensitizes readers to the importance of accounting for the influence of cultural contexts on resilience processes, and to the danger of conceptualising and/or operationalising resilience, culture, and their interplay, simplistically or idealistically. In short, the progressive contents of 'Youth Resilience and Culture: Commonalities and Complexities' make it an essential read for resilience-focused scholars, students, academics, and researchers, as well as policy makers, practitioners, and humanitarian workers engaged with high-risk populations.

This volume is about Pope Francis, the diplomat. In his eight years of pontificate, Pope Francis as a peacemaker has propagated the ideas of human and divine cooperation to build a global human fraternity through his journeys outside the Vatican. This book discusses his endeavours to connect and develop a common peaceful international order between countries, faith communities, and even antagonistic communities through a peaceful journey of human beings. The book analyses his speeches, and meetings as a diplomat of peace, including his visits to Cuba and the United States, and his mediations for peace in Colombia, Myanmar, Kenya, Egypt, Turkey, Jordan, Jerusalem, the Central African Republic, Sri Lanka, and Bangladesh. It discusses the role of Pope Francis as mediator in different circumstances through his own writings, letters, and Vatican

documents; his encounters with world leaders; as well as his contributions to a universal understanding on inter-faith dialogue, climate change and the environment, and human migration and the refugee crisis. The volume also sheds light on his ideas on a post-pandemic just social order, as summarised in his 2020 encyclical. A definitive work on the diplomacy and the travels of Pope Francis, this volume will be of great interest to scholars and researchers of religious studies, peace and conflict studies, ethics and philosophy, and political science and international relations. It will be of great interest to the general reader as well.

Lemon-Aid guides steer the confused and anxious buyer through the economic meltdown unlike any other car-and-truck books on the market. U.S. automakers are suddenly awash in profits, and South Koreans and Europeans have gained market shares, while Honda, Nissan, and Toyota have curtailed production following the 2011 tsunami in Japan. Shortages of Japanese new cars and supplier disruptions will likely push used car prices through the roof well into 2012, so what should a savvy buyer do? The all-new Lemon-Aid Used Cars and Trucks 2012-2013 has the answers, including: More vehicles rated, with some redesigned models that don't perform as well as previous iterations downrated. More roof crash-worthiness ratings along with an expanded cross-border shopping guide. A revised summary of safety- and performance-related defects that are likely to affect rated models. More helpful websites listed in the appendix as well as an updated list of the best and worst "beaters" on the market. More "secret" warranties taken from automaker internal service bulletins and memos than ever.

Beyond Grammar: Language, Power, and the Classroom asks readers to think about the power of words, the power of language attitudes, and the power of language policies as they play out in communities, in educational institutions, and in their own lives as individuals, teachers, and participants in the larger community. Each chapter provides extended discussion of a set of critical language issues that directly affect students in classrooms: the political nature of language, the power of words, hate language and bullying, gender and language, dialects, and language policies. Written for pre-service and practicing teachers, this text addresses how teachers can alert students to the realities of language and power--removing language study from a " neutral " corner to situate it within the context of political, social, and cultural issues. Developing a critical pedagogy about language instruction can help educators understand that classrooms can either maintain existing inequity or address and diminish inequity through critical language study. A common framework structures the chapters of the text: * Each chapter begins with an overview of the language issue in question, and includes references for further research and for classroom use, and provides applications for classroom teachers. * Numerous references to the popular press and the breadth of language issues found therein foreground current thought on socio-cultural language issues, attitudes, standards, and policies found in the culture(s) at large. * References to current and recent events illustrate the language issue ' s importance, cartoons address the issue, and brief " For Thought " activities illustrate the point being discussed and extend the reader ' s knowledge and awareness. * " Personal Explorations " ask readers to go beyond the text to develop further understanding; " Teaching Explorations " ask teachers to apply chapter content to teaching situations. Beyond Grammar: Language, Power, and the Classroom is intended for undergraduate and master ' s level courses that address literacy education, linguistics, and issues of language and culture.

Reveals the course of archaeological adventures and insights that resulted in The Earth Chronicles series • Explores links between the Old world and the New in search of evidence of extraterrestrial gods in the artifacts and murals of ancient civilizations • Reveals archaeological cover-ups concerning Olmec origins in Mexico and ancient UFO artifacts in Turkey In this autobiographical book, the internationally acclaimed author Zecharia Sitchin reveals the foundational research and the adventurous expeditions that resulted in his writing the bestselling The Earth Chronicles series. Ranging from Mayan temples in Mexico to hidden artifacts in Istanbul, Turkey, from biblical tunnels in Jerusalem to the mysteries of Mt. Sinai, from the abode of a Sumerian goddess to Greek islands, the Expeditions ' destinations and amazing discoveries unmasked established fallacies, detected the fate of mysterious artifacts, and revealed ancient connections to modern space facilities. For the first time, Sitchin shares with the reader not only his encompassing knowledge of antiquity and his field experiences, but also the concrete evidence for his conclusions that ancient myths were recollections of factual events, that the gods of ancient peoples were visitors to Earth from another planet, and that we are not alone in our own solar system. Accompanied by photographs from his personal archive, here is Sitchin ' s own story and his inner feelings about the cord that binds him to his ancestral past.

Lemon-Aid Used Cars and Trucks 2012 – 2013

This is a deliberately provocative book. It critiques current student behaviour management practices, seeks to explain the flawed assumptions that justify those practices, and proposes how things could be better for children in our schools if different practices were adopted. It is one of the few books to offer alternative ways of addressing the issues associated with student behaviour at school, and exposes the field to serious and sustained critique from both a research perspective and a children's rights ideological stance. The authors address the following questions: What ideas dominate current thinking on student behaviour at school? What are the policy drivers for current practices? What is wrong with common behaviour approaches? What key ideologies justify these approaches? How can we present ethical alternatives to current approaches? How can a human rights perspective contribute to the development of alternative approaches? In exploring these questions and some ethical alternatives to the status quo, the authors suggest practical ways to 'answer back' to calls for more authoritarian responses to student behaviour within our schools. In doing so, the authors advocate for reforms on behalf of children, and in their interests.

Management practices and processes frequently differ across national and regional boundaries. What may be acceptable managerial behaviour in one culture may be counterproductive or even unacceptable in another. As managers increasingly find themselves working across cultures, the need to understand these differences has become increasingly important. This book examines why these differences exist and how global managers can develop strategies and tactics to deal with them. The text draws on recent research in anthropology, psychology, and management, to explain the cultural and psychological underpinnings that shape managerial attitudes and behaviours, whilst introducing a learning model to guide in the intellectual and practical development of managers seeking enhanced global expertise. It offers user-friendly conceptual models to guide understanding and exploration of topics and summarizes and integrates the lessons learned in each chapter in applications-oriented 'Manager's Notebooks'. A companion website featuring comprehensive chapter-by-chapter PPT slides is available at www.cambridge.org/management_across_cultures.
