Gary David Blount 's Rocky Mountain Fishing Journals: Perpetual Wild Trout Recapture Angling Journal " A Public Fisheries Project " The purpose of this: Perpetual Wild Trout Recapture Angling Journal " A Public Fisheries Project " is to be the initial public Social Media generated " Wild Trout Fisheries " data base site to monitor and publish the variable changes in our " Wild Trout " fisheries for Perpetuity ". This is an invitation for you, your friends or your fishing club to participate in conducting recaptures: " Angling Day ' s " published in all of Gary David Blount Rocky Mountain Fishing Journals. These Rocky Mountain Fishing Journals encompass 35-years and contain over 1,500 - " Angling Day ' s " documenting the daily " Wild Trout " catch rates, water temperature, water level, water turbidity, air temperature, weather conditions, daily hatches, stomach analysis from " Wild Trout " landed, " GDB " Custom Flies fished, fly fishing presentations, trout species, trout lengths and geographic location on over 35-different bodies of water in Montana, Wyoming, Yellowstone National Park, Idaho and Washington. This Perpetual cursory research projects objective is to ascertain skilled or professional anglers at

blountspublishing@yahoo.com and have them return to each body of water on the precise date, geographic location and time period fished contained in every one of my Rocky Mountain Fishing Journals. Each ascertain skilled or professional angler will document their " Angler Day " using the same format I used in each one of my Rocky Mountain Fishing Journals along with their " Angler Day " photographs in " JPEG " format. Each skilled or professional anglers " Angling Day " written documentation and photographs will be e-mailed to blountspublishing@yahoo.com and I will publish them in Gary David Blount " Yearly " Perpetual Rocky Mountain Fishing Journal. To preview excerpts from each one of Gary David Blount Rocky Mountain Fishing Journals go to books.google.com and to view on You Tube.com in the search bar type Gary David Blount Rocky Mountain Fishing Journals. Introduction The headwaters of the Bitterroot River originate from two-major Head Waters. The East Fork of the Bitterroot River originates from the Sapphire Mountains and Anaconda Pintler Wilderness Areas. The West Fork of the Bitterroot River originates from the Bitterroot Mountains and the Selway - Bitterroot Wilderness Areas. The West Fork of the Bitterroot River was dammed in the early 1900 ' s creating Painted Rocks Reservoir. Below Painted Rocks Reservoir lies the tail-water fishery section of the West Fork of the Bitterroot River, which flows downstream to its confluence with the East Fork of the Bitterroot River north of the town of Conner, Montana. The East Fork of the Bitterroot River is still a free flowing stream. The Wild Fires of " 2000 " burned much of the timberland in the headwaters of both drainages. During spring run-off and summer thunderstorms the East Fork of the Bitterroot River turns turbid from the ash that is washed into the river from the tributaries flowing into the river. The West Fork of the Bitterroot River however remains clear, Painted Rocks Reservoir allows the headwater run-off to settle out within the reservoir before entering the West Fork of the Bitterroot River below the dam. The East Fork of the Bitterroot River confluence with the West Fork of the Bitterroot River forms the mainsteam of the Bitterroot River, which flows northerly to its confluence with the Clarkfork River outside the city of Missoula, Montana. The Bitterroot River trout fishery has experienced depravation from mankind since the early 1900 ' s when Marcus Daly " The Copper King " and others commissioned the building of an extensive network of irrigation canals throughout the Bitterroot Valley. The largest canal is the Big Ditch, which runs northerly over seventy-five miles in length traversing the eastside of the Bitterroot River Valley. They built large diversion dams across the Bitterroot River and diverted most of the tributaries in the Bitterroot Valley. These diversion dams dewater the Bitterroot River severely during the summer months. Most of the Bitterroot Tributaries become dry during critical spawning periods for Rainbow Trout, Westslope Cutthroat Trout, Brown Trout and Bull Trout. With these depravation problems on the Bitterroot River there are still some sections of the Bitterroot River that offer good fishing for Rainbow Trout, Brown Trout and Westslope Cutthroat Trout and to a lesser degree Bull Trout.

The Bitterroot River at time offers some excellent dry fly fishing. In March and April there are Stone Flies: Skwala Stone Flies (Skwala parallela) and Winter Stone Flies (Capina sp.), May Flies: Midges (Diptera / Chironomous), Early Blue-Winged Olive (Baetis tricaudatus), Dark Gray Quill (Ameletus connectus) and Caddies Flies: Grannom (Brachycentrus occidentalis) and Green Sedge (Ryacophila sp.). In May, June, July and August there are Stone Flies: Salmon Fly (Pteronarcys californica), Western Big Golden Stone Fly (Calineuria californica), Western Medium Golden Brown Stone Fly (Isoperla sp.), Little Yellow Stone Fly (Alloperla pallidula) and Little Olive Stone Fly (Alloperla delicata); May Flies: Midges (Diptera / Chironomous), Late Blue-Winged Olive (Baetis parvus), Little Western Blue-Winged Olive (Ephemerella margarita), Western Green Drake (Drunella grandis), Pale Morning Dun (Ephemerella inermis and Ephemerella infrequens), Small Western Green Drake (Ephemerella flavilinea), Western Leadwing (Isonychia sicca) and Dark Gray Quill (Ameletus connectus); Caddis Flies: Grannom (Brachycentrus occidentalis), Green Sedge (Ryacophila sp.), Great Gray Spotted Sedge (Arctopsyche grandis), Little Tan Short Horn Sedge (Glossosoma sp.), Ring Horn Microcaddis (Leucotrichia pictipes), Spotted Sedge (Hydropsyche sp.), Little Sister Sedge (Cheumatopsyche campyla) and Little Plain Brown Sedge (Lepidostoma pluviale). In September and October there are May Flies: Late Blue-Winged Olive (Baetis parvus), Little Western Blue-Winged Olive (Ephemerella margarita), Tiny Western Olive (Pseudocloeon edmundsi), Pale Morning Dun (Ephemerella inermis and Ephemerella infrequens), Gray Drake (Siphonurus occidentalis), White Winged Black (Tricorythodes minutus), Caddis: Giant Orange Sedge (Dicosmoecus sp.) and Midges (Diptera / Chironomous).

This report covers the activities that were performed to enhance the current Montana Department of Transportation (MDT) ride specification for flexible pavements. The project team reviewed the MDT ride specification for flexible pavements and compared it with current literature and state of practice. An extensive state of practice survey of other Departments of Transportation (DOTs) was conducted and the results were utilized to provide recommendations to MDT for improving its ride specification. This report provides detailed information on the review of MDT current ride specification, literature review, state of the practice survey, and recommendations for improvements. The recommendations cover the proposed improvements to the current ride specification, tolerances, project classification levels, analysis tools and indices, and methods of acceptance. As part of the recommendations, a series of new documents [i.e. Profiler Operations Manual, Quality Control/Quality Assurance (QC/QA) Plan] have been developed to enhance future profile data collection and analysis. Based on the findings of this project, the project team have revised the document entitled: Method of Sampling and Testing (MT 422) and the document: MDT Ride Specification For Flexible Pavement. An implementation plan has been developed and presented in this report to provide MDT with a road map for implementing the findings of this project.

Montana Legislative Review blountspublishing@yahoo.com
Pete Brooks can't believe he's waited an entire year for Jess Tagg to return to Montana, only to have her break his heart by getting engaged to her ex-fiancé . Worse, a series of mistakes on the job have cost lives, and Pete isn't sure he wants to continue to work in Search and Rescue. Maybe if he can just get over Jess, he can figure out how to move forward. EMT Jess Tagg has returned to Montana to finally give her heart to Pete, but it seems he's no longer interested. When a terrible fight between them sparks an impulsive decision, she finds herself crashed on the side of a highway along with Esme Shaw. And just when she thinks things couldn't get any worse, she and Esme are taken captive and into the untamed Montana wilderness--with murderous intent. Now Pete and the other PEAK Rescue Team members are in a race against time, the elements, and the actions of a vengeful man. Pete will have to use everything he's learned to find Jess and Esme--and pray that his past mistakes don't cost him the life of the woman he can't stop loving.

The true story of the artist whose high school years in Massachusetts inspired Riverdale. Bob Montana, creator of the Archie comic strip and one of America ' s greatest cartoonists, always considered himself a true New Englander. Filled with the antics of the rambunctious teenagers of the fictional Riverdale High, Montana ' s comic strip was based on his high school years in Haverhill, Massachusetts. At the height of his career, he lived as a beloved resident in the quaint, picturesque town of Meredith in the heart of the Lakes Region of New Hampshire. For nearly thirty years, he was considered an extraordinarily respected contributor to the community. Drawing from the Yankee humor he saw around him, Montana deftly included local scenes, events, and characters in the puns and pranks of Archie ' s comic-strip life. Join Lakes Region historian Carol Lee Anderson as she takes readers beyond the comic strip and tells the story of the remarkable New England life of Bob Montana.

Introduction Rock Creek is located 25-east of Missoula, Montana off Interstate 90. Rock Creek headwaters originate from three-Mountain Ranges. The North Fork of Rock Creek and the West Fork of Rock Creek originate from the Sapphire Mountain Range. The East Fork of Rock Creek and the Middle Fork of Rock Creek originate from the Anaconda Mountain Range and the Anaconda – Pintler Wilderness Area. The Upper Willow Creek originates from the John Long Mountains. There are numerous small streams flowing into Rock Creek on its journey north to its confluence with the Clarkfork of the Columbia River. In the 1980 ’ s Rock Creek contained roughly 2,000 Rainbow Trout per mile of stream in the lower 28-miles of Rock Creek; from Gillies Bridge downstream to the mouth of Rock Creek. In the 1990 ’ s the Rainbow Trout population in Rock Creek plummeted to just 300 Rainbow Trout per mile of stream. This drastic decline in the Rainbow Trout population was caused by Whirling Disease and by the Montana Department of Fish, Wildlife and Parks decision to halt the stocking of Hatchery Rainbow Trout into the East Fork of Rock Creek Reservoir. To this day there has been no significant increase in the Rock Creek Rainbow Trout population. However, the Native Westslope Cutthroat Trout population in Rock Creek has rebounded somewhat to fill the void of lost Rainbow Trout population. Also the non-native Brown Trout population is on the increase. The Rock Creek fishery consists of native Westslope Cutthroat Trout up to 24-inches in length, native Bull Trout up to 36-inches in length, native Mountain Whitefish up to 24-inches in length, non-native Brown Trout up to 26-inches in length, non-native Rainbow Trout up to 24-inches in length and non-native Brook Trout up to 14-inches in length. Important Entomology And Forage Fish on Rock Creek are: Stone Flies: 1. Skwala (Skwala parallela) March – April (Size 8-10-12-14) 2. Salmon Fly (Pteronarcys californica) May – July (Size 2-4-6-8) 3. Western Big Golden Stone (Calineuria californica) May – August (Size 4-6-8-10-12) 4. Western Medium Golden Brown Stone (Isoperla sp.) June – September (Size 4-6-8-10) 5. Little Yellow Stone (Alloperla pallidula) June – October (Size 12-14-16-18) 6. Little Olive Stone (Alloperla delicata) May – August (Size 12-14-16-18) 7. Winter Stone (Capina sp.) January – March (Size 14-16-18) May Flies: 1. Western Black Quill (Rhithrogenahageni) March – April (Size 12-14) 2. Early Blue-Winged Olive (Baetis tricaudatus) March – April (Size 14-16-18) 3. Late Blue-Winged Olive (Baetis parvus) June – November (Size 16-22) 4. Little Western Blue-Winged Olive (Ephemerella margarita) July – September (Size 16-22) 5. Western Green Drake (Drunella grandis) June – July (Size 10-12) 6. Pale Morning Dun (Ephemerella inermis and Ephemerella infrequens) May – September (Size 14-16-18) 7. Small Western Green Drake (Ephemerella flavilinea) June – August (Size 14-16) 8. Western Leadwing (Isonychia sicca) June – July Size (Size 10-12) 9. Dark Gray Quill (Ameletus connectus) May – June (Size 12-14) 10. White Winged Black (Tricorythodes minutus) July – October (Size 18-20) 11. Midges (Diptera / Chironomous) Caddis Flies 1. Grannom (Brachycentrus occidentalis) April – May (Size 12-14-16) 2. Green Sedge (Ryacophila sp.)

The Laramie and the Overlying Livingston Formation in Montana

This book presents innovative approaches to gluten-free and dairy-free gourmet cooking. If food and cooking have long been important in your life, it can be a daunting task to cook tasty, interesting food when you can no longer eat many of the mainstays of modern or classic French cooking, which involve gluten and dairy. It was for me. The trick has been to come up with gluten-free, dairy-free food which is also interesting and delicious. Many of the recipes also incorporate oriental influences, especially Chinese regional, Thai, and Indian. Much of this cookbook was developed using wild game. If game is not available, where the recipes call for game, you can use these recipes for grass-fed beef or lamb. Many of these recipes revolve around sauces, whether incorporated into the dish as it cooks, or as a stand-alone sauce added to meats once they are cooked. This makes it easy to substitute different meats.

BTWF Bitterroot River - October 6, 2005 - Montana

This handbook offers a comprehensive overview of school mental health (SMH) initiatives in rural areas in the United States. It offers clinical and administrative guidelines for innovative and effective programs addressing critical problems among rural youth and in areas where funding and resources are scarce. Chapters cover program development, implementation, sustainability, and evaluation; consider issues of community and policy support; address barriers to access and delivery; and debunk misconceptions about the region and its cultures. Chapters also discuss rural SMH applications relating to special populations, including students with autism, depression, anxiety, bipolar disorder, conduct disorders, and ADHD. In addition, the book examines the potential of school-based programs as a counter to the stigma and distrust of mental health services common to the region. “ /div> Topics featured in the Handbook include: The value of rural SMH from an educator ’ s standpoint. Preventing suicide among students in rural schools. Substance abuse in rural school settings. Bullying and cyberbully among rural youth. Intergenerational patterns of mental illness in rural settings and their relevance for SMH. The importance of involving communities in culturally competent rural interventions. The Handbook of Rural School Mental Health is a must-have resource for researchers, scientist-practitioners, and graduate students in child and school psychology, educational psychology, social work/counseling, educational policymakers, pediatrics/school nursing, teaching, and teacher education.div

Montana Natural Resources Protection and Utilization Act of 1987

COWBOY MEETS HIS MATCH How does a Burbank-loving, California-dreaming, city girl find herself on a Montana ranch living with a too-handsome stranger? A Will, that ’ s how. And now Gabriella Thompson is entwined in a million-dollar standoff with Brad McKenna. If she meets the terms of the Will, the land is hers to do with as she pleases and what she wants to do is sell to the highest bidder. But Brad, her host for the required three months, is determined to change her mind because as badly as she needs the money, he needs to control the land. Three months is enough time to get to know someone really well...or even fall in love. Question is: does her cowboy rancher really love her? Or is it just about winning the prize? MONTANA CHRISTMAS Widowed, a single mom, Christmas, and she ’ s just lost her job. Can it get worse? Apparently it can when Santa asks if he can help her and Jenna Darlington knows it ’ s a cruel joke. Because Santa—Chance McKenna—is a member of the Rock Gods, a group of rock climbers who live off of adrenaline and stupidity. Been there, done that. Buried her husband because of it. She has no respect for a man who doesn ’ t respect life—even if he is offering her a job. Chance knows exactly how Jenna feels about him and the rest of the Rock Gods. So why does he feel the way he does around her? They ’ re polar opposites when it comes to life views. But isn ’ t the saying that opposites attract? SECOND CHANCE HERO Skylar Mathews wants her son, Cody, to get better, and visiting Cody ’ s grandparents in Montana is supposed to accomplish that. But Marcus Whitefeather ’ s surprising presence on the ranch leaves her reeling. Marcus knew he ’ d regret sending Skylar and their unborn son away but at the time he ’ d had no choice. He ’ d lost everything, including his ability to walk, and no way was he ready to be a father, much less a husband. Ending their relationship was the hardest—and best—thing for all of them. But now they ’ re back and Marcus is a different man. When Cody doesn ’ t improve, Marcus suggests the unthinkable—that they reveal the truth not only to Cody, but their families. Make the wrong right and start again. Together. But after so many years of hiding their secret son how can Marcus prove he ’ s not only father material, but ready for more?
