Derrick Hollis is a 7th grader at Zachary Taylor Middle School and an aspiring cartoonist, too shy to show his work to anybody but his best friend Doug. When his dog Max dies, Derrick is left devastated. But then Max returns from the other side and starts to give Derrick advice. Derrick could use it, especially when it comes to affairs of the heart and standing up to bullies. When Derrick is too scared to ask his crush Kim to the Spring Fling, Max tells Derrick to "dog up!" and shake his tail on the dance floor. Will Dead Max be good for Derrick or lead him astray?

Datsun's initial offerings were fairly conventional family cars, but with the introduction of the 240Z in 1969 the marque's image received a massive

boost. It was a runaway success, outselling every European sports car model in the lucrative North American market. The 280Z arrived in 1975 followed by the 280ZX in 1978 and sales of the 280ZX had reached over 446,000 units by the time production came to an end in 1983. 44 international articles include road, track and comparison tests, a service guide plus full technical and performance data.

Mindefusement has been a passion project for me since 2016 when I wrote the first concept. I quickly realized this could become a book. I decided to do a short-story format for the book that interweaves the characters and the company behind it all, Mindefusement. Mindefusement is a secretive company that specializes in treating those with morbid fantasies and allowing them to visualize these fantasies in the form of a short film. Fantasies are called torture templates, and each client brings some morbid fantasy to life during the film production process. The book Mindefusement contains the inner workings of the company and dives deeper into the client's various fantasies. Such cases could be torture, mutilation, murder, and a host of incredibly graphic and taboo topics. As a result, this book is intended for a mature audience. Mindefusement, the company, has its own internal problems, and these are highlighted in the book and provide a major plot point.

TWENTY-FIRST CENTURY'S FUEL SUFFICIENCY ROADMAP Edmunds Publications

A powerful, engrossing story of a biracial heiress who escapes to Paris when the Haitian Revolution burns across her island home. But as she works her way into the inner circle of Robespierre and his mistress, she learns that not even oceans can stop the flames of revolution. Sylvie de Rosiers, as the daughter of a rich planter and an enslaved woman, enjoys the comforts of a lady in 1791 Saint-Domingue society. But while she was born to privilege, she was never fully accepted by island elites. After a violent rebellion begins the Haitian Revolution, Sylvie and her brother leave their family and old lives behind to flee unwittingly into another uprising—in austere and radical Paris. Sylvie quickly becomes enamored with the aims of the Revolution, as well as with the revolutionaries themselves—most notably Maximilien Robespierre and his mistress, Cornélie Duplay. As a rising leader and abolitionist, Robespierre sees an opportunity to exploit Sylvie's race and abandonment of her aristocratic roots as an example of his ideals, while the strong-willed Cornélie offers Sylvie safe harbor and guidance in free thought. Sylvie battles with her past complicity in a slave society and her future within this new world order as she finds herself increasingly torn between Robespierre's ideology and Cornélie's love. When the Reign of Terror descends, Sylvie must decide whether to become an accomplice while a new empire rises on the bones of innocents...or risk losing her head. This book discusses the recent advances in combustion strategies and engine technologies, with specific reference to the automotive sector. Chapters discuss the advanced combustion technologies, such as gasoline direct ignition (GDI), spark assisted compression ignition (SACI), gasoline compression ignition (GCI), etc., which are the future of the automotive sector. Emphasis is given to technologies which have the potential for utilization of alternative fuels as well as emission reduction. One special section includes a few chapters for methanol utilization in two-wheelers and four wheelers. The book will serve as a valuable resource for academic

researchers and professional automotive engineers alike.
