The automotive industry underwent great change in the 1960s

and the early 1970s. The continuing trend toward market

consolidation, the proliferation of sizes and nameplates, and the

" need for speed " characterized this period, loosely labeled as

the muscle car era. This is an exhaustive reference work to

American made cars of model years 1960 – 1972. Organized by

year (and summarizing the market annually), it provides a yearly

update on each make ' s status and production figures, then

details all models offered for that year. Model listings include

available body styles, base prices, engine and transmission

choices, power ratings, standard equipment, major options and

their prices, curb weight and dimensions (interior and exterior),

paint color choices, changes from the previous year ' s model,

and sales figures. Also given are assembly plant locations and

historical overviews of each model nameplate. The book is

profusely illustrated with 1,018 photographs.
