Understanding project endings is a significant part of project management, yet there is relatively little work published in this important area. This book addresses the gap, focusing on the successful management of project endings, showing how to plan for the ending of a project, how to create ending competencies, and in particular, how to successfully manage relations with different stakeholders of a project as it is coming to an end. Havila and Salmi use a real-life case in the airline industry to show how the successful ending project was achieved and in doing so portray ideas and experiences not typically considered in the field. Through the case discussion, the complexity of the process is unveiled and the achievement of success for all parties is explained. The book portrays

three key success factors: ending competencies, to be developed both at the organizational and individual levels; efficient management of the business network around the ending project; and involvement at the strategic managerial level. It concludes that project endings are often complex and have far-reaching effects, and therefore, call for close managerial attention.

**Focus On: 100 Most Popular Station Wagons** CreateSpace

This manual provides information on routine maintenance and servicing, with tasks described and photographed in a step-by-step sequence so that even a novice can do the work.

Autocar Haynes Manuals

This book originated from the idea that

performance is what really matters in business and thus in business history. Yet, surprisingly, the analysis of performances has been neglected by economic and business historians. This book is a first attempt to fill this gap and in doing so provides a totally new approach to European business history. Rather than bringing together national studies, it is based on a single database, measuring performance in eight European countries according to identical criteria. The study spans the entire twentieth century, with particular attention to five benchmark moments: the height of the first globalisation on the eve of the First World War; the late 1920s boom preceding the Great Depression; the European reconstruction of the mid-1950s; the end of 'Golden Age' in the early 1970s; and the height of the second globalisation at the turn of the twenty-first century. The analysis is based on a sample of 1,225 companies, belonging to the three major European economies, Britain, France and Germany; two large south European latecomers, Italy and Spain; two smaller north western countries, Belgium and Sweden, and one small Nordic country, Finland.

Performance has been measured using two ratios of profitability: return on equity (ROE) and holding return (HR), thus providing a complementary measure of profitability, the former as seen from the firm's perspective, the latter from the investor's perspective. The book's findings, at times surprising, at once confirm and infirm widely held assumptions regarding business performance - regarding strategy and structure, ownership and control, old and new industries, emerging and advanced economies.

Turbocharger Rebuild and Repair Guide:  
CreateSpace

A roadtest compilation on the Saab 92, Saab 93, Saab 95 and Saab 96 by Unique Motor Books.  
Census of Partial Employment, Unemployment, and Occupations The Crowood Press

Launched in 1949 as the 92 before evolving into the 93, 96 2-stroke and 96V4, this car was in production for thirty-one years. Attracting global admiration and sales, it also excelled in motorsport and by the early 1960s was the most successful rally-car in Europe. A decline in sales in the 1960s was reversed with the launch of the 96V4 which resulted in its success continuing into the 1980s. With over 200 archive and colour photographs, this book provides a new description of the Saab company's original car and includes detailed biographies of important Saab figures and extensive discussion of the engineering and design decisions that made the car such a success. There is coverage of the original Saab story in North and South America and a comprehensive review of Saab 92, 93, 96, motor sport history. Full technical details and specifications and tuning details are given and finally, there is a chapter on owners' experiences and Saab veteran's recollections.

Road & Track Haynes Publishing

Saab 99 and 900 is a detailed account of the cars that came from Saab, the aeroplane maker, whose first car - the 92 model - set the standard for advanced design epitomized by the 99 and 900 cars. The author delves deep into the cars' design and history, and into the core Saab values that they carried into production. Topics include: detailed design history of the 99 and 900; year-by-year developments; technically detailed engineering overviews; detailed specifications; advice on owning and buying and, finally, coverage of rallying and special models.
