Motorized Obsessions Public Affairs  
2008 Outstanding Academic Title, Choice  
Magazine From dirt bikes and jet skis to  
weed wackers and snowblowers,  
machines powered by small gas engines  
have become a permanent—and  
loud—fixture in American culture. But fifty  
years of high-speed fun and pristine  
lawns have not come without cost. In the  
first comprehensive history of the small-  
bore engine and the technology it powers,  
Paul R. Josephson explores the political,  
environmental, and public health issues  
surrounding one of America's most  
dangerous pastimes. Each chapter tells  
the story of an ecosystem within the  
United States and the devices that wreak  
havoc on it—personal watercraft (PWCs)  
on inland lakes and rivers; all-terrain  
vehicles (ATVs) in deserts and forests;  
lawn mowers and leaf blowers in

suburbia. In addition to environmental  
impacts, Josephson discusses the  
development and promotion of these  
technologies, the legal and regulatory  
efforts made to improve their safety and  
environmental soundness, and the role of  
owners' clubs in encouraging responsible  
operation. Synthesizing information from  
medical journals, recent environmental  
research, nongovernmental organizations,  
and manufacturers, Josephson's  
compelling history leads to one irrefutable  
conclusion: these machines cannot be  
operated without loss of life and loss of  
habitat.

Postcards, photographs, matchbook covers, buttons, advertisements, real estate brochures -- and much more. The author has been collecting anything and everything pertaining to Rockaway Beach, New York, for the past seventy years -- and that's what this volume is all about. Here is a plethora of souvenirs and memorabilia amassed over one individual's lifetime. This is the largest and most complete historical journal ever published by this author. "Rockaway Beach, New York in Souvenirs and Memorabilia" includes representations of artifacts dating back before the turn of the 20th Century -- but also features additional materials relating to the last 120 years. Recent events such as the creation of high-rise apartments replacing a defunct shopping center in the hub of Far Rockaway and the loss of the Park Theatre building in Rockaway Park -- are captured here in photo detail. As inclusive as possible, this is a fun book -- actually a historical journal which is of

### Scooby-doo! and You

Air conditioning in vintage cars often falls into disrepair, as owners figure that it never really worked all that well when it was new, and assume that rejuvenation would be prohibitively expensive. In his new book, *Just Needs a Recharge: The Hack Mechanic Guide to Vintage Air Conditioning*, Rob Siegel details exactly what's needed to resurrect long-dead air conditioning in a vintage car, or install a/c in a car that never had it. In a level of detail not found in any other automotive a/c book, Rob reveals what you need to know about flare and o-ring fittings, upgrading to a rotary-style compressor and a parallel-flow condenser, making or specifying custom hoses, and selecting refrigerant so that the a/c blows cold enough to be usable. Although the book draws from Rob's BMW experience (with specifics for the BMW 2002 and 3.0CS), and concentrates on vintage a/c systems (those that have flare fittings and originally contained R12), most of the information applies to any air conditioning system, foreign or domestic, vintage or modern. Written in Rob's entertaining Hack Mechanic narrative voice, and including 240 photographs and illustrations, the book covers theory, the choice of refrigerant (R12, R134a, other EPA-approved, non-EPA-approved), legality, tools for a/c work, fittings and sizes, the compressor, the evaporator assembly and expansion valve or orifice tube, the condenser and fan, the receiver/drier or accumulator, electrical connections and compressor cycling, connecting and using manifold gauges, the basic steps for a/c rejuvenation, from-

scratch a/c retrofit, making and installing hoses, flushing the system, pressure-testing and leak detection, evacuating and charging the system troubleshooting, and other things that heat up the cabin.

“Every Chris-Craft owner will want to own this detailed history of Chris-Craft.” —Wooden Boat  
For more than half a century, Chris-Craft reigned supreme in the world of motorboating. This market dominance was due in no small part to the design and construction techniques employed in the company's studios and on its factory floors. *Building Chris-Craft* examines the company's design and production heritage, looking at Chris-Craft's considerable accomplishments in the context of key competitors and industrial trends in general. High-quality archival images take readers inside the factories, design studios, and lofts of Chris-Craft factories in Algonac, Holland; Cadillac, Michigan; Salisbury, Maryland; Chattanooga, Tennessee; and Caruthersville, Missouri.

### Come Home to Me

For twelve years, Andrea Lankford lived in the biggest, most impressive national parks in the world, working a job she loved. She chaperoned baby sea turtles on their journey to sea. She pursued bad guys on her galloping patrol horse. She jumped into rescue helicopters bound for the heart of the Grand Canyon. She won arguments with bears. She slept with a few too many rattlesnakes. Hell yeah, it was the best job in the world! Fortunately, Andrea survived it. In this graphic

and yet surprisingly funny account of her and others' extraordinary careers, Lankford unveils a world in which park rangers struggle to maintain their idealism in the face of death, disillusionment, and the loss of a comrade killed while holding that thin green line between protecting the park from the people, the people from the park, and the people from each other. Ranger Confidential is the story behind the scenery of the nation's crown jewels—Yosemite, Grand Canyon, Yellowstone, Great Smokies, Denali. In these iconic landscapes, where nature and humanity constantly collide, scenery can be as cruel as it is redemptive.
