Commonly known as the "Deuce-and-a-half," the M135 was a soft top 2 1/2 ton, 6x6 truck made by General Motors Corporation for the U.S. Army and Air Force. It came in a variety of configurations, including

ambulance, dump truck, gasoline, water tanker and more. By far the most common variant was the cargo version which could carry a dozen soldiers or loads of supplies. A double-wheeled version designated M211, and a tractor trailer model M221 were also widely produced. All were powered by the six-cylinder GMC 270 gas engine. Most came equipped with an early automatic transmission, the 5- or 6-speed Hydramatic. Additional performance features include air assisted power brakes, a 24-volt electrical system and sealed, waterproof ignition. The suspension featured front axles with auto engage. The top speed for the M135 was 58 mph. The weight of the M135 truck is between 12,330 and 12,740 pounds depending on the additional features, which sometimes included a Power Take Off (PTO) driveshaft system. This powered a winch that was located on the front or rear of the truck. The M135 was developed from the CCKW model used in WWII. Created in 1952, this technical manual reveals a great deal about the M135's design and capabilities. Intended as a manual for those charged with maintenance, it details every major component of the truck. Originally labeled restricted, this manual was declassified long ago and is here reprinted in book form. Care has been taken to preserve the integrity of the text.

In the mid-1960s, Ford Motor Company took the automotive world by storm with the release of its new pony car, the Ford Mustang. It was the right car for the right time, and it caught General Motors a bit by surprise. One year later, after seeing the Mustang's enormous sales success, General Motors announced the development of its own pony-car platform, code-named "Panther," to enter the market and compete with the tremendously popular Mustang. And what a competition it became. Chevrolet Camaros and Pontiac Firebirds hit the market in the fall of 1966, and the world clamored for more of these new Mustang killers. Over the course of time, these F-Body cars became some of the most popular enthusiast cars of all time. In *The Definitive Firebird & Trans Am Guide 1967 - 1981*, Pontiac expert and historian Rocky Rotella examines each production year of Firebird. Production figures, option codes, running changes, model year changes and variances, rarity, collectability, interviews with engineers, and more are thoroughly covered in what is sure to be the ultimate Firebird reference book for years to come. Complementing the detail and year-by-year analysis is a combination of archival photography from the launch of these cars and beautiful color photos of original and restored examples today. Whether you are into the first generation of F-Body Pontiacs, the first Trans Ams in 1969, the early second-generation Super Duty cars, or even the wildly popular Trans Ams from the Smokey and the Bandit era, this book tells the entire story of these immensely popular cars. It is an excellent addition to any pony car, muscle car, or any enthusiast's library.

Make Conflict Your Partner for Positive Change! Clinical psychologist and transformative communication expert Dr. Nate Regier believes that the biggest energy crisis facing our world is the misuse of conflict. Most organizations are terrified of conflict, seeing it as a sign of trouble. But conflict isn't the problem, says Regier. It's all about how we use the energy. When people misuse conflict energy, it becomes drama: they struggle against themselves or each other to feel justified about their negative behavior. The cost to companies, teams, and relationships is staggering. The alternative, says Regier, is compassionate accountability: struggling with others through conflict. Discover the Compassion Cycle, an elegant model for balancing empathy, care, and transparency with boundaries, goals, and standards. Provocative, illuminating, and highly practical, this book helps us avoid the casualties of conflict through openness, resourcefulness, and persistence.
