"Investigating Iwo encourages us to explore the connection between American visual culture and World War II, particularly how the image inspired Marines, servicemembers, and civilians to carry on with the war and to remember those who made the ultimate sacrifice to ensure victory over the Axis Powers. Chapters shed light on the processes through which history becomes memory and gains meaning over time. The contributors ask only that we be willing to take a closer look, to remain open to new perspectives that can deepen our understanding of familiar topics related to the flag raising, including Rosenthal's famous picture, that continue to mean so much to us today"--  
Triboluminescence Springer

Chemical Warfare Agents, Second Edition has been totally revised since the successful first edition and expanded to about three times the length, with many new chapters and much more in-depth consideration of all the topics. The chapters have been written by distinguished international experts in various aspects of chemical warfare agents and edited by an experienced team to produce a clear review of the field. The book now contains a wealth of material on the mechanisms of action of the major chemical warfare agents, including the nerve agent cyclosarin, formally considered to be of secondary importance, as well as ricin and abrin. Chemical Warfare Agents, Second Edition discusses the physico-chemical properties of chemical warfare agents, their dispersion and fate in the environment, their toxicology and management of their effects on humans, decontamination and protective equipment. New chapters cover the experience gained after the use of sarin to attack travellers on the Tokyo subway and how to deal with the outcome of the deployment of riot control agents such as CS gas. This book provides a comprehensive review of chemical warfare agents, assessing all available evidence regarding the medical, technical and legal aspects of their use. It is an invaluable reference work for physicians, public health planners, regulators and any other professionals involved in this field. Review of the First Edition: "What more appropriate time for a title of this scope than in the post 9/11 era? ...a timely, scholarly, and well-written volume which offers much information of immense current and...future benefit." —VETERINARY AND HUMAN TOXICOLOGY

NOMINATED FOR THE MANFRED S. GUTTMACHER AWARD BY THE AMERICAN PSYCHIATRIC ASSOCIATION Although advances in clinical/forensic theory and technology continue to elucidate our understanding of deception analysis, the current state of the art is crude in most applications. With new interviewing techniques, psychological tests and instruments, Detecting Malingering and Deception: Forensic

Distortion Analysis, Second Edition takes the reader far beyond the basic differentiation between malingering versus defensiveness as the two modes of distortion. What's new in this edition? Virtually every chapter has been updated with new studies and investigations from the past decade. The latest information is provided in such areas as post-traumatic stress disorder, amnesia, competency, criminal responsibility, and risk assessment. Several new chapters address not only the development of deceptive behavior in children, adolescents, and the elderly, but even in nonhumans. This authoritative contribution offers the reader specific steps to conduct a meaningful and contemporary deception analysis. Moreover, acknowledging the numerous methods and professions involved, it suggests a framework for integrating data from multiple sources. Nominated for the Guttmacher Award by the American Psychiatric Association, Detecting Malingering and Deception: Forensic Distortion Analysis is the single most comprehensive and thorough rendering of distortion analysis to date.

The touchstone guide to running projects from the British Institute of Interior Design (BIID). By setting out actions step-by-step, this essential handbook identifies the key obligations of the interior designer at each project stage. Straightforward explanation is supplemented by invaluable checklists and templates. Featuring crucial advice on administering construction contracts, it references the new RIBA/BIID Domestic Professional Services Contract 2020 for interior design services. Reflecting the RIBA Plan of Work 2020 and contemporary working practice, it provides a systematic operational framework that can be applied to all types of projects. Comprehensive in scope with a logical structure, it embraces the theme of collaboration within the project team. It also addresses post-occupancy evaluation, modern methods of construction and sustainability. Suitable for projects within any industry sector and practice type, from large international firms to sole practitioners, it is accessible to designers with different levels of experience.

Motorcycle Electrical Systems Geoffrey Young

This volume is based on contributions to the second Brain Dynamics Conference, held in Berlin on August 10-14, 1987, as a satellite conference of the Budapest Congress of the International Brain Research Organization. Like the volume resulting from the first conference, Dynamics of Sensory and Cognitive Processing by the Brain, the present work covers new approaches to brain function, with emphasis on electromagnetic fields, EEG, event-related potentials, connectivistic views, and neural networks. Close attention is also paid to research in the emerging field of deterministic chaos and strange attractors. The diversity of this collection of papers reflects a multipronged advance in a hitherto relatively neglected domain, i. e., the study of signs of dynamic processes in organized neural tissue in order both to explain them and to exploit them for clues to system function. The need is greater than ever for new windows. This volume reflects a historical moment, the moment when a relatively neglected field of basic research into available signs of dynamic processes ongoing in organized neural tissue is expanding almost explosively to complement other approaches. From the topics treated, this book should appeal, as did its predecessor, to neuroscientists, neurologists, scientists studying complex systems, artificial intelligence, and neural networks, psychobiologists, and all basic and clinical investigators concerned with new techniques of monitoring and analyzing the brain's electromagnetic activity.

More than a memoir of a custom cafe racer build this book is a tribute to a teacher who inspired young people to be creative with their minds and capable with their hands. Growing up in Fargo, North Dakota in the 1970s and 80s, The Urban Monk had the opportunity to develop a love for machines, metal working and motorcycles. This book provides a glimpse into what life was like for the author and his young friends in Fargo during that time. It is also a poignant defense of industrial arts education in public schools. After an over three year effort building a custom cafe racer in his spare time and documenting the entire process in videos shared with the world on his YouTube channel Urban Monk TV, the author tells the story of how this project became more than a custom motorcycle build - it became a tribute to his middle school Metal Shop teacher who inspired him to go on to a life time of peaceful meditation in his garage with a wrench in his hand. Anyone interested in motorcycles, mechanics, do-it-yourself projects or a historical retrospective of life in 70s-80s Fargo will enjoy this pleasant read.

Take a Walk on the Dark Side is the ultimate book for today's rock and roll fan: a fascinating compendium of facts, fictions, prophecies, premonitions, coincidences, hoaxes, doomsday scenarios, and other urban legends about some of the world's most beloved and mysterious pop icons. Updating, revising, and expanding on material from his cult classic Hellhounds on Their Trail, Patterson offers up a delectable feast of strange and occasionally frightening rock and roll tales, featuring the ironies associated with the tragic deaths of many rock icons, unsolved murders, and other tales from the "fell clutch of circumstance." Beginning with the fateful place where it all started -- a deserted country crossroads just outside Clarksdale, Mississippi, where Robert Johnson made his deal with the devil -- through the Buddy Holly curse (rock and roll's first great tragedy) and beyond, this incredible volume uncovers some of rock and roll's most celebrated murders, twists of fate, and decades-long streaks of bad luck that defy

rational explanation. Inside you'll find: Facts about Jimmy Page and the Zeppelin Curse. Chilling quirks of fate in the fatalities in the Allman Brothers and Lynyrd Skynyrd. Facts about Jimmy Page and the Zeppelin curse Chilling quirks of fate surrounding the deaths of musicians in the Allman Brothers Band and Lynyrd Skynyrd A provocative look at "The Club," membership in which requires an untimely death at age twenty-seven and whose inductees include Kurt Cobain, Jimi Hendrix, and Janis Joplin Cryptic messages in song lyrics that have proved eerily prophetic Carefully researched, wildly enjoyable, and often harrowing, Take a Walk on the Dark Side takes the reader on a mysterious ride through rock and roll history.

This concise work provides a general introduction to the design of buildings which must be resistant to the effect of earthquakes. A major part of this design involves the building structure which has a primary role in preventing serious damage or structural collapse. Much of the material presented in this book examines building structures. Due to the recent discovery of vertical components, it examines not only the resistance to lateral forces but also analyses the disastrous influence of vertical components. The work is written for Practicing Civil, Structural, and Mechanical Engineers, Seismologists and Geoscientists. It serves as a knowledge source for graduate students and their instructors.

In these new poems from Steve Orlen, the work speaks directly without tricks. There's no fragmentation, flarf, call of the elliptical, language tricks, movement and meaning through fancy associations and juxtapositions. There's not even a gesture toward adornment or the raised uplift of the lyric lamenting someone's dead grandmother or in celebration of bees. Yet they come with the force of a sledgehammer, powerfully felt, illuminating.

Creating Mr. Kortan Thomas Telford

Poetry. "I am spending my 39th year practicing uncreativity. On Friday, September 1, 2000, I began retyping the day's NEW YORK TIMES word for word, letter for letter, from the upper left hand corner to the lower right hand corner, page by page." With these words, Kenneth Goldsmith embarked upon a project which he termed "uncreative writing", that is: uncreativity as a constraint-based

process; uncreativity as a creative practice. By typing page upon page, making no distinction between article, editorial and advertisement, disregarding all typographic and graphical treatments, Goldsmith levels the daily newspaper. DAY is a monument to the ephemeral, comprised of yesterday's news, a fleeting moment concretized, captured, then reframed into the discourse of literature. "When I reach 40, I hope to have cleansed myself of all creativity"-Kenneth Goldsmith.

Former AMA racing champion Reg Pridmore, known worldwide for his popular CLASS Motorcycle Schools, brings his decades of experience on the track, street and classroom, to the readers of this new riding skills book. After reviewing the basics, Pridmore shows advance students how to focus on control in cornering, braking, and acceleration. A long-time proponent of the value of body-steering, Pridmore's insightful text explains how this controversial technique helped him win championships and how it can help everyday riders and budding racers become smoother, better riders. Sections on street strategies and riding gear make this a comprehensive how-to riding skills book for anyone looking to improve their skills.
