Fifteen years after Toyota announced it would build a manufacturing plant in the heart of the Bluegrass, Kentucky crafts are being used to help sell Camrys at car dealerships in Japan and sushi and Japanese condiments are widely stocked on grocery shelves in a number of cities across Kentucky. In early 2000, the state boasted more than 100 Japanese companies representing a total investment of more than seven billion dollars, employing more than 33,000 Kentuckians. Japan in the Bluegrass is the first book to focus on the regional and local impact of the globalization of Japanese businesses, particularly Toyota, in the United States. Fourteen American and Japanese contributors include geographers, political scientists, sociologists, and an economist, urban planner, and environmental scientist, and their essays go beyond the traditional exploration of politics and economics to examine the social, cultural, and environmental effects of Japanese investment in Kentucky. The authors examine the factors that brought these companies to this part of the United States, which range from a well-developed system of highways to cooperation from state and local governments to hefty incentive packages. They discuss the significant influence of Toyota and its suppliers on local communities in Kentucky as well as in Toyota City, Japan. Essays also cover the social and cultural shifts that have resulted from Japanese investment, including educational activities in public schools, the relationship between business and local media, and the integration of Japanese managers and their families into Kentucky communities.

Federal Motor Vehicle Safety Standards - Power-Operated Window, Partition, and Roof Panel Systems (US National Highway Traffic Safety Administration Regulation) (NHTSA) (2018 Edition) The Law Library presents the complete text of the Federal Motor Vehicle Safety Standards - Power-Operated Window, Partition, and Roof Panel Systems (US National Highway Traffic Safety Administration Regulation) (NHTSA) (2018 Edition). Updated as of May 29, 2018 This document responds to two petitions for reconsideration of a final rule amending the Federal motor vehicle safety standard for power-operated window, partition, and roof panel systems. The subject final rule, statutorily mandated and published in April 2006, established a new safety requirement for vehicle power window switches, specifically that such switches have a "pull-to-close" design. That final rule set a compliance date of October 1, 2008, which was the same as the compliance date for a rule published in September 2004 that amended the standard to include a performance test to prevent inadvertent actuation of power window switches, particularly by children. Petitions for reconsideration were submitted by the Alliance of Automobile Manufacturers (Alliance) and DaimlerChrysler Corporation. The petitioners requested an extension of the compliance date by two years, as well as additional amendments to the standard. This book contains: - The complete text of the Federal Motor Vehicle Safety Standards - Power-Operated Window, Partition, and Roof Panel Systems (US National Highway Traffic Safety Administration Regulation) (NHTSA) (2018 Edition) - A table of contents with the page number of each section
