The story of Emmett Till is a riveting, notorious murder case that gave birth to the modern-day civil rights movement, a story that continues to generate enormous interest from the general public and the media at large. This is a dynamic and explosive story of courage, determination, and faith, which gave rise to several award-winning documentaries and honorable mentions in several major motion pictures and television miniseries, such as the miniseries *King*, based on the life of Dr. Martin Luther King Jr.; the motion picture *Mississippi Burning*; as well as *For Us the Living: The Medger Evers Story*, *The Rosa Parks Story*, and

the theatrical release of the film *Ali*, a story on the life of Muhammad Ali, just to name a few.

The first black American in the NHL tells his story

James Val became the first African American player in the NHL when he took to the ice with the Buffalo Sabres in 1982, and in 1987 he became the first black player of any nationality to skate for the Toronto Maple Leafs. Born in

central Florida, James grew up on Long Island and received his first pair of skates for his 13th birthday. At 16, James left home to play in Canada, where he was the only black person in junior and, often, in the whole town. While popular for his tough play and winning personality, the teenager faced racist taunts at opposing arenas, and the prejudice continued at all levels of the game. In his two NHL stints, James defined himself as a smart team player and opponent, known

for his pugilistic skills. Black Ice is the untold story of a trail-blazing athlete who endured and overcame discrimination to realize his dreams and become an inspiration for future generations. Trailblazer Page Publishing Inc Arriving in London in the 1880's, orphans Jack and Amy find themselves the prey of the worst elements of society until they receive aid from William and Catherine Booth and their Salvation Army people.

Trail Blazer of the Seas Haynes Manuals N. America, Incorporated
From the author of Carry On, Mr. Bowditch, winner of

the 1956 Newbery Medal, Jean Lee Latham writes an absorbing biography of Matthew Fontaine Maury, the man considered to be the father of modern oceanography. In the early 1800s, the voyage from New York to San Francisco took six months. That was before Maury, a lieutenant in the US Navy, blazed a trail for ships to follow. The first ship to follow Maury's directions based on his wind and current charts cut nearly two months off that time. Later, clipper ships cut that time in half. For seven years Maury had fought against skepticism and bitter opposition, for the cooperation needed to gather data for his charts. Years later, at a worldwide peacetime conference

in Brussels, which he organized in 1853, nine-tenths of the world's ships were helping Maury collect data and blaze more trails. After the success of his charts, Maury blazed on with more new ideas: he campaigned for a Naval Academy, for better fortification of our southern ports, and separate shipping lanes for eastbound and westbound routes in the Atlantic to avoid deadly collisions. Jean Lee Latham gives a warm, lively picture of the man and a clear explanation of all his achievements. Victor Mays' drawings are both powerful and authentic. There is no discussion of slavery in this biography.
