"This book, a polished, winding meditation on the theory and fractiousness of motorcycles, celebrates both their eccentric history and the wary pleasures of touring."—The New Yorker In a book that is "a must for anyone who has loved a motorcycle" (Oliver Sacks), Melissa Pierson captures in vivid, writerly prose the mysterious attractions of motorcycling. She sifts through myth and hyperbole: misrepresentations about danger, about the type of people who ride and why they do so. The Perfect Vehicle is not a mere recitation of facts, nor is it a polemic or apologia. Its vivid historical accounts—the beginnings of the machine, the often hidden tradition of women who ride, the tale of the defiant ones who taunt death on the racetrack—are intertwined with Pierson's own story, which, in itself, shows that although you may think you know what kind of person rides a motorcycle, you probably don't.

Formal Axiology and Its Critics consists of two parts, both of which present criticisms of the formal theory of values developed by Robert S. Hartman, replies to these criticisms, plus a short introduction to formal axiology. Part I consists of articles published or made public during the lifetime of Hartman to which he personally replied. It contains previously published replies to Hector Neri Castañeda, William Eckhardt, and Robert S. Brumbaugh, and previously unpublished replies to Charles Hartshorne, Rem B. Edwards, Robert E. Carter, G.R. Grice, Nicholas Rescher, Robert W. Mueller, Gordon Welty, Pete Gunter, and George K. Plochmann in an unfinished but now completed article on which Hartman was working at the time of his death in 1973. Part II consists of articles presented at recent annual meetings of the R.S. Hartman Institute for Formal and Applied Axiology that continue to criticize and further develop Hartman's formal axiology. An article by Rem B. Edwards raises serious unanswered questions about formal axiology and ethics. Another by Frank G. Forrest shows how the formal value calculus based on set theory might answer these questions, and an article by Mark A. Moore points out weaknesses in the Hartman/Forrest value calculus and develops an alternative calculus based upon the mathematics of quantum mechanics. While recognizing that unsolved problems remain, the book intends to make the theoretical foundations and future promise of formal axiology much more secure.

Riding motorcycles is fun, but author Ken Condon maintains that there is a state of consciousness to be achieved beyond the simple pleasure of riding down the road. Riding in the Zone helps riders find that state of being. It's the experience of being physically and mentally present in the moment, where every sense is sharply attuned to the ride. Your mind becomes silent to the chatter of daily life, and everyday problems seem to dissolve. You feel a deeper appreciation for life. Your body responds to this state of being with precise, fluid movements, you feel in balance, your muscles are relaxed, and it seems as though every input you make is an expression of mastery. This is "the Zone." Condon identifies all of the factors that affect entering the Zone and addresses each one individually, from the development of awareness and mental skills to mastering physical control of the motorcycle. At the end of each chapter are drills designed to transform the book's ideas into solid, practical riding skills. Riding in the Zone takes riders to the next level in their skill set.

Image archivist and transportation historian Jim Harter follows his work, Early Farm Tractors, with an even larger collection of images from advertising line art from 1880 to 1930, this time focused on Early Automobiles. Nearly 250 entrancing illustrations -- many suitable for framing -- are gems of the art of commercial engraving. Harter provides a very substantial, detailed history of the development of the "horseless carriage" into the brands famous from the early 20th century -- racers like Stutz, Dusenber, Stanley, as well as those that became household names like Oldsmobile, Ford, Chrysler and others. Of special interest are the dozens of successful electric automobiles that flourished for 25 years. The history includes many colorful anecdotes about early long-distance races as well as interesting details of engineering breakthroughs. Full bibliography and index.

Through breakdowns, prison, war, revolutions, disasters and a Californian commune, he travelled into the depths of fear and reached the heights of euphoria. He met astonishing people and was treated as a spy, a welcome stranger and even a god. For Simon the trip became a journey into his own soul, and for many others - including bikers Charley Boorman and Ewan McGrregor - it provides an inspiration they will never forget. This classic text, which has informed a whole genre of travel writing in the thirty years since it was first published, will never be bettered for sheer adventure, passion, humour and honesty. Brought up in England by a German mother and a Romanian father, Ted Simon found himself impelled by an insatiable desire to explore the world. It led him to abandon an early scientific career in favour of journalism, and he has worked for several newspapers and magazines on Fleet Street and elsewhere. Ted Simon is also the author of

What happens to gender at 120mph? Are Harley-Davidsons more masculine than Yamahas? The Gendered Motorcycle answers such questions through a critical examination of motorcycles in film, advertising and television. Whilst bikers and biker cultures have been explored previously, the motorcycle itself has remained largely under-theorised, especially in relation to gender. Esperanza Miyake reveals how representations of motorcycles can produce different gendered bodies, identities, spaces and practices. This interdisciplinary book offers new and critical ways to think about gender and motorcycles, and will interest scholars and students of gender, technology and visual cultures, as well as motorcycle industry practitioners and motorcycle enthusiasts.
