Erin Hogan hit the road in her Volkswagen Jetta and headed west from Chicago in search of the monuments of American land art: a salty coil of rocks, four hundred stainless steel poles, a gash in a mesa, four concrete tubes, and military sheds filled with cubes. Her journey took her through the states of Utah, Nevada, New Mexico, Arizona, and Texas. It also took her through the states of anxiety, drunkenness, disorientation, and heat exhaustion. *Spiral Jetta* is a chronicle of this journey. A lapsed art historian and devoted urbanite, Hogan initially sought firsthand experience of the monumental earthworks of the 1970s and the 1980s—Robert Smithson's *Spiral Jetty*, Nancy Holt's *Sun Tunnels*,

Walter De Maria's *Lightning Field*, James Turrell's *Roden Crater*, Michael Heizer's *Double Negative*, and the contemporary art mecca of Marfa, Texas. Armed with spotty directions, no compass, and less-than-desert-appropriate clothing, she found most of what she was looking for and then some. "I was never quite sure what Hogan was looking for when she set out . . . or indeed whether she found it. But I loved the ride. In *Spiral Jetta*, an unashamedly honest, slyly uproarious, ever-probing book, art doesn't magically have the power to change lives, but it can, perhaps no less powerfully, change ways of seeing." —Tom Vanderbilt, *New York Times Book Review* "The reader emerges enlightened and even delighted. . . . Casually scrutinizing the artistic works . . . while gamely playing up her fish-out-of-water status, Hogan delivers an ingeniously engaging travelogue-cum-art history." —Atlantic "Smart and unexpectedly hilarious." —Kevin Nance, *Chicago Sun Times* "One of the funniest and most entertaining road trips to be published in quite some time." —June Sawyers, *Chicago Tribune* "Hogan ruminates on how the work affects our sense of time, space, size, and scale. She is at her best when she reexamines the precepts of modernism in the changing light of New Mexico, and shows how the human body is meant to be a participant in these grand constructions." —*New Yorker*

A cultural history of the Volkswagen Beetle as told through historical photographs, many never before published in the U.S. From the birth of the Beetle in wartime Germany through the development of the New Beetle prototype, Volkswagen Beetle: Portrait of a Legend celebrates a lighthearted, unusual view of the most successful automobile in history. This book is not a "how to identify your Beetle" book, nor is it a year-by-year charting of model changes. Rather, through other people's experiences of the car, it allows readers to recall their own fond memories of what it was really like to own a Beetle in its heyday.

This new edition to the classic book by ggplot2 creator Hadley Wickham highlights compatibility with knitr and RStudio. ggplot2 is a data visualization package for R that helps users create data graphics, including those that are multi-layered, with ease. With ggplot2, it's easy to: produce handsome, publication-quality plots with automatic legends created from the plot specification superimpose multiple layers (points, lines, maps, tiles, box plots) from different data sources with automatically adjusted common scales add customizable smoothers that use powerful modeling capabilities of R, such as loess, linear models,

generalized additive models, and robust regression save any ggplot2 plot (or part thereof) for later modification or reuse create custom themes that capture in-house or journal style requirements and that can easily be applied to multiple plots approach a graph from a visual perspective, thinking about how each component of the data is represented on the final plot This book will be useful to everyone who has struggled with displaying data in an informative and attractive way. Some basic knowledge of R is necessary (e.g., importing data into R). ggplot2 is a mini-language specifically tailored for producing graphics, and you'll learn everything you need in the book. After reading this book you'll be able to produce graphics customized precisely for your problems, and you'll find it easy to get graphics out of your head and on to the screen or page.
