I've always been a timid, quiet woman with a boring job as a secretary. I rarely went out to have any fun. One evening, all that changed. When my coworkers finally convinced me to get out and live a little, the last thing I expected was to wind up spying on two gorgeous women. I saw them from the bar, then followed them into the public restroom, where I could overhear them having sex. I was even more surprised when they asked me to join in!

The occasion of forty years of teaching at Amherst by William H. Pritchard, the renowned critic of Frost, Jarrell, and many others, has generated a remarkable collection of essays by former students, colleagues, and friends. The essays themselves are a spectrum of contemporary, criticism, ranging from classroom memoirs to analytic essay-in-criticism to assessment of the state of academic letters today. These contributions, a tribute, by reason of their very range, are a salute to the breadth of William Pritchard's circle of literary acquaintance. Under *Criticism* demonstrates the fine persistence in certain manners of approach and habits of focus that go, among that circle, under the name of criticism. Drawing foremost on their engagement with the literature before them, Christopher Ricks, Helen Vendler, Patricia Meyer Spacks, Neil Hertz, David Ferry, Paul Alpers, Joseph Epstein, and Frank Lentricchia -- as well as fifteen other critics and men and women of letters -- reinforce Professor Pritchard's prescription that in order to have a hearing, the critic needs to keep listening.

Suspension is probably the most misunderstood aspect of motorcycle performance. This book, by America's premier suspension specialist, makes the art and science of suspension tuning accessible to professional and backyard motorcycle mechanics alike. Based on Paul Thede's wildly popular Race Tech Suspension Seminars, this step-by-step guide shows anyone how to make their bike, or their kid's, handle like a pro's. Thede gives a clear account of the three forces of suspension that you must understand to make accurate assessments of your suspension's condition. He outlines testing procedures that will help you gauge how well you're improving your suspension, along with your riding. And, if you're inclined to perfect your bike's handling, he even explains the black art of chassis geometry. Finally, step-by-step photos of suspension disassembly and assembly help you rebuild your forks and shocks for optimum performance. The book even provides detailed troubleshooting guides for dirt, street, and supermoto--promising a solution to virtually any handling problem.

Shy high school junior Riley Kowalski is spending her winter break on a research trip to Antarctica, sponsored by one of the world's biggest tech companies. She joins five student volunteers, a company-approved chaperone, and an impartial scientist to

prove that environmental plastic pollution has reached all the way to Antarctica, but what they find is something much worse... something that looks human. Riley has anxiety--ostracized by the kids at school because of panic attacks--so when she starts to feel like something's wrong with their expedition leader, Greta, she writes it off. But when Greta snaps and tries to kill Riley, she can't chalk it up to an overactive imagination anymore. Worse, after watching Greta disintegrate, only to find another student with the same affliction, she realizes they haven't been infected, they've been infiltrated--by something that can change its shape. And if the group isn't careful, that something could quickly replace any of them.

101 Projects for Your Porsche 911 996 and 997 1998-2008 Motorbooks International

More than a memoir of a custom cafe racer build this book is a tribute to a teacher who inspired young people to be creative with their minds and capable with their hands. Growing up in Fargo, North Dakota in the 1970s and 80s, The Urban Monk had the opportunity to develop a love for machines, metal working and motorcycles. This book provides a glimpse into what life was like for the author and his young friends in Fargo during that time. It is also a poignant defense of industrial arts education in public schools. After an over three year effort building a custom cafe racer in his spare time and documenting the entire process in videos shared with the world on his YouTube channel Urban Monk TV, the author tells the story of how this project became more than a custom motorcycle build - it became a tribute to his middle school Metal Shop teacher who inspired him to go on to a life time of peaceful meditation in his garage with a wrench in his hand. Anyone interested in motorcycles, mechanics, do-it-yourself projects or a historical retrospective of life in 70s-80s Fargo will enjoy this pleasant read.
