As U.S. and Canadian automakers and dealers face bankruptcy and Toyota battles unprecedented quality-control problems, Lemon-Aid guides steer the confused and anxious buyer through the economic meltdown unlike any other car-and-truck books

on the market. Phil Edmonston, Canada's automotive "Dr. Phil" for more than 40 years, pulls no punches. In this all-new guide he says: Chrysler's days are numbered with the dubious help of Fiat. Electric cars and ethanol power are PR gimmicks. Diesel and natural gas are the future. Be wary of "zombie" vehicles: Jaguar, Land Rover, Saab, and Volvo. Mercedes-Benz – rich cars, poor quality. There's only one Saturn you should buy.

Toyota – enough apologies: "when you mess up, 'fess up."

Fodors Travel Publications ASP developers need to understand how ASP.NET can help them solve business problems better than any prior product. ASP.NET by Example is designed to provide a "crash course" on ASP.NET and quickly help the reader start using this new technology. As part of the By Example series, this book approaches ASP.NET in an easy-to-use tutorial way, giving the reader a much faster and more

interactive learning experience than the traditional reference book. By building the sample applications taught in the book, readers will learn how to create custom ASP.NET controls, how to use ADO+ objects in ASP, and how to deploy and manage applications. ASP.NET by Example also provides tools and information needed to migrate old ASP files to the new platform, saving developers significant time and money. As an added feature Steven A. Smith has included multiple case studies on how ASP.NET is used in e-commerce applications.
