"A proper travelogue - a joyful, moving and stereotype-busting ride." - National Geographic Traveller, Book of the Year In 2011, at the height of tension between the British and Iranian governments, travel writer Lois Pryce found a note left on her motorcycle outside the Iranian Embassy in London: ... I wish that you will visit Iran so you will see for yourself about my country. WE ARE NOT TERRORISTS!!! Please come to my city, Shiraz. It is very famous as the friendliest city in Iran, it is the city of poetry and gardens and wine!!! Your Persian friend, Habib Intrigued, Lois decides to ignore the official warnings against travel (and the warnings of her friends and family) and sets off alone on a 3,000 mile ride from Tabriz to Shiraz, to try to uncover the heart of this most complex and incongruous country. Along the way, she meets carpet sellers and drug addicts, war

veterans and housewives, doctors and teachers - people living ordinary lives under the rule of an extraordinarily strict Islamic government.

Revolutionary Ride is the story of a people and a country. Religious and hedonistic, practical and poetic, modern and rooted in tradition - and with a wild sense of humour and appreciation of beauty despite the comparative lack of freedom - this is the true story of real contemporary Iran.

*The Day My Butt Went Psycho!* Haynes Manuals N. America, Incorporated

This book is a guide both for beginners as well as improvers to model aircraft precision aerobatics, or F3A, competition focused on the UK. However, it is just as relevant anywhere else in the world as the issue of how to control an aerobatic model aircraft is not limited to a single geography! If you are not interested in entering competitions, this book will bring you some of the knowledge and techniques that you would only pick up by attending them. If you are sufficiently disciplined in your flying, there is no reason why you should not reach a good aerobatic standard after following the advice and guidance contained in this

---

book. In short, this is the book I would like to have had when I took up aerobatics and first entered competitions. If like me, you have wanted to take up precision aerobatics but couldn't find any resources to help you, this is the book for you. The book covers the basics of starting aerobatic flying, from when you have just gone solo, to helping you to get ready to take up the challenge of flying in aerobatic competitions. The book contains advice on how to set up your aircraft covering for example: centre of gravity position; engine/motor thrust lines; and control throws. It then takes you through the basics of aerobatic manoeuvres with both diagrams and words. Once over this initial phase, you will get much more detail about set up and trimming as well as how to fly large smooth manoeuvres ultimately taking account of the impact of the wind on the flight. The book contains a chapter on mini training schedules that allow you to build up your skills before describing how to fly the entry level aerobatic competition schedule used in Great Britain. Finally, I have included references to how you can access the resources to help you to progress from a practical flying viewpoint. Peter Jenkins has been flying model aircraft since he was a teenager but only entered aerobatic competitions just over 10 years ago. He has organised and run a number of introductory courses to coach

newcomers to start and others to improve their aerobatics. He continues to organise aerobatic competitions for the GB National League and to act as Contest Director. He is a qualified instructor and examiner for the UK's largest model flying association, the BMFA of which he was a Director for 6 years. He has also held a private pilots' licence and flew and instructed on full size gliders for many years. Peter currently flies the FAI(P) schedule in domestic competitions in GB.
