It then recounts in detail three efforts undertaken at Carnegie Mellon University to secure copyright permission to digitize and provide open access to books with scholarly content."--CLIR Web site.

### How to Hot Rod Your Fender Amp John Wiley & Sons

For years paranormal scientists have explored the detection and documentation of spirits, auras, ESP, hypnosis, and many more phenomena through electronics. *Electronic Projects from the Next Dimension* provides useful information on building practical circuits and projects, and applying the knowledge to unique experiments in the paranormal field. The author writes about dozens of inexpensive projects to help electronics hobbyists search for and document their own answers about instrumental transcommunication (ITC), the electronic voice phenomenon (EVP), and paranormal experiments involving ESP, auras, and Kirlian photography. Although paranormal studies are considered esoteric, *Electronic Projects from the Next Dimension* teaches the technical skills needed to make devices that can be used in many different kinds of experiments. Each section indicates how the circuit can be used in paranormal experiments with suggestions about procedures and how to analyze the results. Provides unique projects for believers and skeptics Perfect for any level of electronics experience Learn from these basics projects

This guidebook shows owners and dreamers the basics of getting the best sound possible out of their Fender amp with simple and advanced modifications. These include essential and fundamental tips like selecting tubes, capacitors, pots, and other electronic equipment, as well as biasing and setting up your amp. It also covers great hot-rodding enhancements to give you the tone of the pros at your fingertips, such as making one channel into an overdrive channel, modifying tone controls, making one channel either a Marshall or Vox channel (changing preamp and tone arrangement—not a permanent, destructive mod), building splitter boxes to run two amps simultaneously, creating splitter speaker setups within one amp, building the perfect gig amp (something light and portable, but with big sound, like an early Mesa Boogie), and more.

Several administrations have adopted electronic fiscal devices (EFDs) in their quest to combat noncompliance, particularly as regards sales and the value-added tax (VAT) payable on sales. The introduction of EFDs typically requires considerable effort and has costs both for the administration and for the taxpayers that are affected by the requirements of the new rules. Despite their widespread use, and their considerable cost, EFDs can only be effective if they are a part of a comprehensive compliance improvement strategy that clearly identifies risks for the different segments of taxpayers and envisages measures to mitigate these risks. EFDs should not be construed as the “ silver bullet ” for improving tax compliance: as with any other technological improvement the deployment of fiscal devices alone cannot achieve meaningful results, whether in terms of revenue gains or permanent compliance improvements.

### Hearings Seaforth Publishing

For over a decade this annual has provided an authoritative summary of all that has happened in the naval world in the previous

---

twelve months, combining regional surveys with one-off major articles on noteworthy new ships and other important developments. Besides the latest warship projects, it also looks at wider issues of significance to navies, such as aviation and weaponry, and calls on expertise from around the globe to give a balanced picture of what is going on and to interpret its significance. As 2022 saw the outbreak of the first major European war since 1945, it is not surprising that the naval aspects of the conflict in Ukraine take center stage, with an interim assessment of the fighting so far and what can be gleaned of the strategies and tactics of the warring parties. Another newsworthy topic – hypersonic missiles – is the subject of Norman Friedman’s expert analysis. Of the regular features, the ‘ Significant Ships ’ cover the US Navy’s Nimitz class carriers, now representing fifty years of evolution; and HMNZS Aotearoa, the largest warship built for New Zealand. Of the Fleet Reviews, one looks at the US Navy’s adaptation to the return of Great Power competition, not least with China, and the second covers the Vietnam People’s Navy, which faces Chinese pressure at close quarters. Firmly established as the only annual naval overview of its type, World Naval Review is essential reading for anyone – whether enthusiast or professional – interested in contemporary maritime affairs.
