Finally, the Change-the-Landscape worksheet answers the question of what is the effect of toxins in our environment by answering how the human body processes these toxic substances. The answer comes from the fact that our body is actually the largest organ of the body. The large organ of the body is the liver and it plays a very important role in the elimination of toxins.

61 A Changing Landscape Worksheet Answers

Short answer: it depends on the amounts and types of dead leaves as well as the plants you have. Bigger, thicker leaves, like those of an oak tree, prevent water from reaching the soil. Dead leaves can be beneficial for most plants and the ecosystem, so long as they do not prevent water and nutrients from reaching the soil.
