"Entertainers and trainers have a lot in common. Both require an audience. Both require a polished, professional delivery. And both must attract -- and keep -- attention. Or else the show is over. Unlike the audience at a show, training participants are often disinterested and easily distracted. In order to keep them tuned in and help them retain information, trainers are constantly in search of new ways to engage learners. Grounded in the latest adult learning and training theories, "Show Biz Training" provides creative techniques that use comedy, props, magic, theater, and music, giving readers all the tools they need to perform the many activities found inside. The book uses specific examples and provides step-by-step instructions, resource lists, and worksheets to help trainers support and further learning by engaging emotion, building rapport, creating the proper atmosphere, and crafting lessons out of a host of entertainment-inspired ideas. Packed with fun, original concepts for serious educators, "Show Biz Training" is a highly informative way to set the stage for exciting, effective learning."

This volume pulls together research on several aspects of the self. One set of chapters deals with the importance of building a self based on authenticity and "Who I really am."; a second group deals with the ways in which we defend views of the self as positive and powerful; a third group is concerned with multiple aspects of self regulation. Each of the chapters is a well-written, non-technical description of an important, currently active research program.

Destined for Failure Lippincott Williams & Wilkins

A brilliant book celebrating improbability as the engine that drives life, by the acclaimed author of *The Selfish Gene* and *The Blind Watchmaker*. The human eye is so complex and works so precisely that surely, one might believe, its current shape and function must be the product of design. How could such an intricate object have come about by chance? Tackling this subject—in writing that the *New York Times* called "a masterpiece"—Richard Dawkins builds a carefully reasoned and lovingly illustrated argument for evolutionary adaptation as the mechanism for life on earth. The metaphor of Mount Improbable represents the combination of perfection and improbability that is epitomized in the seemingly "designed" complexity of living things. Dawkins skillfully guides the reader on a breathtaking journey through the mountain's passes and up its many peaks to demonstrate that following the improbable path to perfection takes time. Evocative illustrations accompany Dawkins's eloquent descriptions of extraordinary adaptations such as the teeming populations of figs, the intricate silken world of spiders, and the evolution of wings on the bodies of flightless animals. And through it all runs the thread of DNA, the molecule of life, responsible for its own destiny on an unending pilgrimage through time. *Climbing Mount Improbable* is a book of great impact and skill, written by the most prominent Darwinian of our age.

Create personal best performance at will—and revel in the achievement! If you have ever watched athletes performing at their best, you have witnessed the power of "the Zone"—that state where everything clicks and personal and team bests are the norm. In *The Winner's Way*, Dr. Pam Brill tells readers how they, too, can achieve the Zone of top performance, turning goals—whether in the wide world of sports, work or daily life—into positive, results-driving action. With her 3 A's—activation, attention and attitude—Dr. Brill supercedes previous wisdom by systematically bringing together these three crucial elements to hurdle personal obstacles and finish—again and again—always the winner. Out of her years of research on peak performance in sport and work, coaching to elite athletes and top corporations, and teaching at Dartmouth Medical School, Brill, a psychologist, has put together, and field tested, her unique Winner's Way™ system. The Winner's Way offers readers a proven, user-friendly method to identify, engage, and drive strategic change for continual achievement in the face of never-ending challenge. That racing heart and those white knuckles? They're the result of the chemical deluge that ramps activation to high speed—but without proper 3A alignment, this power within can derail attention and attitude. Tunnel vision is no accident. Negative beliefs about self and potential will always get in the way. Plagued instead by listlessness, wandering attention, an apathetic attitude? These are all due to another chemical reaction—with symptoms readers learn to identify and then re-ramp to their best strengths. Throughout *The Winner's Way*, Dr. Brill provides example after example so readers can adapt, according to their personal make-up, the steps to winning achievement that become second nature. On command, our readers will learn to: Change a poor attitude Pull out of a downspin Use language as an arsenal, fortress, and medic "Debrief" from experiences by identifying what was done well—and what should be done differently next time Examine and challenge habitual assumptions . . . plus deploy strategies for dealing with performance anxiety, fear

of rejection, technology overload, and more to help recapture their love for the game of life. *The Winner's Way* is straight forward, makes sense—and it works! Let the game of life begin! On your marks, get set, go!

A masterful dual narrative of Napoleon Bonaparte and a tiny microbe that pits the height of human ambition and achievement against the supremacy of nature, from the *New York Times* bestselling author of *Empire of Blue Water* "Gripping . . . Talty brings international politics and science together in a compelling story of personal hubris and humbling defeat." —Jack Weatherford, author of the *New York Times* bestseller *Genghis Khan and the Making of the Modern World* In the spring of 1812, Napoleon Bonaparte was at the height of his powers. Forty-five million called him emperor, and he commanded a nation that was the richest, most cultured, and advanced on earth. No army could stand against his impeccably trained, brilliantly led forces, and his continued sweep across Europe seemed inevitable. Early that year, bolstered by his successes, Napoleon turned his attentions toward Moscow, helming the largest invasion in human history. Surely, Tsar Alexander's outnumbered troops would crumble against this mighty force. But another powerful and ancient enemy awaited Napoleon's men in the Russian steppes. Virulent and swift, this microscopic foe would bring the emperor's progress to a halt. Even as the Russians retreated before him in disarray, Napoleon found his army disappearing, his frantic doctors powerless to explain what had struck down a hundred thousand soldiers. *The Illustrious Dead* delves deep into the origins of the pathogen that finally ended the mighty emperor's dreams of world conquest and exposes this "war plague's" hidden role throughout history. A tale of two unstoppable forces meeting on the road to Moscow in an epic clash of killer microbe and peerless army, *The Illustrious Dead* is a historical whodunit in which a million lives hang in the balance. 6th edition SAGE

Quick-fix solutions to health inequalities are unlikely to be found in complex modern societies. Class or socio-economic status, gender, ethnicity and physical location all play their part in determining our chances of maintaining good health and securing good health care. This wide-ranging discussion by community leaders and workers, policy-makers and implementers, epidemiologists, public health researchers, economists, sociologists, an historian and medical professionals addresses how health inequalities arise and provides ways of understanding and resolving them.

This book considers the place and value of knowledge in contemporary society. "Knowledge" is not a self-evident concept: both its denotations and connotations are historically situated. Since the Enlightenment, knowledge has been a matter of discovery through effort, and "knowledge for its own sake" a taken-for-granted ideal underwriting progressive education as a process which not only taught "for" and "about" something, but also ennobled the soul. While this ideal has not been explicitly rejected, in recent decades there has been a tacit move away from a strong emphasis on its centrality, even in Higher Education. The authors address the values that inform knowledge production in its present forms, and seek to identify social and cultural factors that support these values. Against the background of increasingly restrictive conditions of academic work, the first section of this volume offers incisive critiques of Higher Education, with examples drawn from Australia and New Zealand. The second group of chapters considers how academics have viewed, and have tried to adapt to, present circumstances. The third section comprises papers that consider epistemological issues in the generation and promulgation of knowledge. The chapters in this volume are indicative of the work that needs to be done so that we can come to comprehend – and perhaps try and improve – our relationship to learning and knowledge in the 21st Century. This timely book will be of particular interest to workers in higher education; it should also inform and challenge all those who have concerns for the future of the intellectual life of our civilization.
