National Geographic Books
Newbery Honor—winning author Kirby Larson delivers a heartwarming story of friendship, love, and courage, and the incredible contributions of Navajo Code-Talkers during WWII. Billie has lived with her great-aunt ever since her mom passed away and her dad left. Billie's big brother, Leo, is about to leave, too, for the warfront. But first, she gets one more weekend with him at the ranch. Billie's surprised when Leo brings home a fellow Marine from boot camp, Denny. She has so much to ask Leo—about losing her best friend and trying to find their father—but Denny, who is Navajo, or Din é , comes with something special: a

gorgeous, but injured, stray dog. As Billie cares for the dog, whom they name Bear, she and Bear grow deeply attached to each other. Soon enough, it's time for Leo and Denny, a Navajo Code Talker, to ship out. Billie does her part for the war effort, but she worries whether Leo and Denny will make it home, whether she'll find a new friend, and if her father will ever come back. Can Bear help Billie—and Denny—find what's most important? A powerful tale about unsung heroism on the WWII battlefield and the home front.

A top cybersecurity journalist tells the story behind the virus that sabotaged Iran's nuclear efforts and shows how its existence has ushered in a new age of warfare—one in which a digital attack can have the same destructive capability as a megaton bomb.

“ Immensely enjoyable . . . Zetter turns a complicated and technical cyber story into an engrossing whodunit. ” —The Washington Post The virus now known as Stuxnet was unlike any other piece of malware built before: Rather than simply hijacking targeted computers or stealing information from them, it proved that a piece of code could escape the digital realm and wreak actual, physical destruction—in this case, on

an Iranian nuclear facility. In these pages, journalist Kim Zetter tells the whole story behind the world's first cyberweapon, covering its genesis in the corridors of the White House and its effects in Iran—and telling the spectacular, unlikely tale of the security geeks who managed to unravel a top secret sabotage campaign years in the making. But Countdown to Zero Day also ranges beyond Stuxnet itself, exploring the history of cyberwarfare and its future, showing us what might happen should our infrastructure be targeted by a Stuxnet-style attack, and ultimately, providing a portrait of a world at the edge of a new kind of war.

This classic book will excite students' imaginations while enriching skills in logical thinking. Logic Countdown problems are easy to incorporate into lesson plans and are formatted to enhance the fullest spectrum of curriculum areas while sharpening thinking skills. Challenging and instructional, these thought-provoking books present sequential exercises in logical reasoning that include relationships, analogies, syllogisms, sequences, deductive reasoning, inference, truth-values, and logical notation. Simple grids coupled with intriguing problems evoke enthusiasm and inspire students to higher and higher levels of thinking. Each book in this series builds on concepts presented previously in the series to offer a comprehensive logic adventure for young thinkers. The skills students build by using this book are applicable to several areas of the curriculum. Academic skills used for reading, math, writing, and science all depend on the ability to perceive and define relationships and to form inferences. But, beyond the

academic world, students will find logical thinking an integral part of everyday life. This is the first in a three-book series designed to sharpen children's logical thinking skills. Once students master the skills presented in this book, they will be ready for new challenges in Logic Liftoff and Orbiting with Logic.
