This reference guide provides an overview of the purposes and uses of curriculum-

based measurement (CBM), a standardized approach to assessing student performance in order to inform educational and instructional decision making. This guide is designed for teachers, administrators, and other educators who are considering using CBM, want an introduction to CBM, or need a quick and easy reference. It is also useful for educators to use with parents and students as an introduction to CBM. Written by two of the authors of the national bestseller, *The ABCs of CBM: A Practical Guide to Curriculum-Based Measurement*.

U.S. Landforms Evan-Moor

Does the identification number 60 indicate a toxic substance or a flammable solid, in the molten state at an elevated temperature? Does the identification number 1035 indicate ethane or butane? What is the difference between natural gas transmission pipelines and natural gas distribution

pipelines? If you came upon an overturned truck on the highway that was leaking, would you be able to identify if it was hazardous and know what steps to take? Questions like these and more are answered in the *Emergency Response Guidebook*. Learn how to identify symbols for and vehicles carrying toxic, flammable, explosive, radioactive, or otherwise harmful substances and how to respond once an incident involving those substances has been identified. Always be prepared in situations that are unfamiliar and dangerous and know how to rectify them. Keeping this guide around at all times will ensure that, if you were to come upon a transportation situation involving hazardous substances or dangerous goods,

you will be able to help keep others and yourself out of danger. With color-coded pages for quick and easy reference, this is the official manual used by first responders in the United States and Canada for transportation incidents involving dangerous goods or hazardous materials.

fluency with math content organized to address CCSS. Students engage in learning with write-in text on vocabulary support and homework pages, and real-world problem-solving investigations.

Teacher Certification Exam Harper Collins
This study examines the relationship between delivery models (the class size reduction model and the sheltered instruction model) and language development levels on the grade-level reading development of sixth-grade English learners (ELs) attending public middle schools in metro Atlanta, Georgia. The instrument used to measure grade-level mastery of reading standards and development is Georgia's sixth-grade Criterion-Referenced Competency Test (CRCT). Language development levels are measured and provided by the Assessing Comprehension and Communication in English State-to-

State (ACCESS) test. Criterion sampling and convenience sampling are the means by which ELs are selected. A causal-comparative design was implemented for both research questions. Interaction effects were identified between independent variables of delivery models and language development levels. Main effects between each independent variable and the dependent variable were analyzed for statistically significant differences. Data analysis consisted of a two-way ANOVA, followed by normality and assumption testing. Descriptive data, including demographic and linguistic data, was discussed as well.
