Carlina and Stefano's marriage party is brought to an abrupt end when the glamorous girlfriend of Enzo, Carlina's brother, is shot. Dorotea left her fortune and the famous Milanese Camicie di Silva, a luxurious company for men's shirts, to Enzo, so everything points to him as the culprit. Stefano can't take the case because he's now officially related, but that doesn't stop the Mantonis. Without further ado, Enzo engages Carlina and Stefano

as business consultants. To find the real murderer, they have to dive deep into the corporate tangles of the fashion industry in Milano where nothing is as it seems ...

The founder of modern nursing comes to life in this accessible biography for young readers. Born and raised in a wealthy family, no one expected Florence Nightingale to grow up to do dirty work. But she found her life's calling after witnessing firsthand the atrocious conditions at hospitals in the mid 1800s. Where everyone else saw unavoidable chaos,

Florence saw opportunity for order. She developed strict standards of hygiene and established extensive nurse training. Her new systems significantly lowered death rates and revolutionized the healthcare landscape of her time. When she was thirty-eight years old, Florence contracted Crimean fever and remained homebound for the rest of her life. She continued to fight for nursing reform and sanitary conditions, working from her bed as she met distinguished guests and published papers. This informative entry in Adler's well-known series contains biography, facts, and history accompanied by charming illustrations.

This book explores how the Quad Plus mechanism is set to reshape the global multilateral economic and security co-operations between Quad partner countries and the rest of the world. With the Quad partners – Australia, India, Japan and the United States – seeing deteriorating ties with China, the book provides a holistic understanding of the reasons why Quad Plus matters and what it means for the post-COVID Indo-Pacific and Asian order. It goes beyond the existing literature of the global Post-COVID reality and examines how Quad Plus can grow and find synergy with national and multilateral Indo-Pacific initiatives. The chapters analyze the mechanism's uncharacteristic yet active approach of including countries like South Korea, Israel, Brazil, New Zealand and ASEAN/Vietnam for their successful handling of the pandemic crisis, thereby reshaping the new world's geopolitical vision. A unique study focused solely on the intricacies and the broader dialogue of the 'Quad Plus' narrative, the book caters to strategic audiences as well as academics researching International Relations, Politics, and Indo-Pacific and Asian Studies.

This book presents an in-depth analysis covering climatic and weather conditions, house and building development history, construction methods and technologies, and environmental conditions. It provides relevant house and building information and highlights recent advances in hot and humid regions, as well as developments in other regions that are relevant to hot and humid climates. The countries in hot and humid regions, which include the tropical countries, the Middle Eastern countries around the Mediterranean, and many countries of Central Asia and Africa, are home to some of the most challenging conditions in the world in terms of house and building design and construction, and in terms of maintaining indoor thermal comfort and air quality in an energy-efficient way. The book's respective chapters, prepared by expert contributors, cover essential

concepts, designs, and construction methodologies for houses and commercial buildings. As such, the book offers a valuable resource for undergraduate and graduate students in architecture and engineering, house and building designers, and building sciences researchers. Building contractors, manufacturers and distributors of building equipment and devices, and government policymakers and legislators will also benefit from the information provided in this book.

Crown Archetype

Object Lessons is a series of short, beautifully designed books about the hidden lives of ordinary things. We think we know the trench coat, but where does it come from and where will it take us? From its origins in the trenches of WW1, this military outerwear came to project the inner-being of detectives, writers, reporters, rebels, artists and intellectuals. The coat outfitted imaginative leaps into the unknown.

Trench Coat tells the story of seductive entanglements with technology, time, law, politics, trust and trespass. Readers follow the rise of a sartorial archetype through media, design, literature, cinema and fashion. Today, as a staple in stories of future life-worlds, the trench coat warns of disturbances to come. Object Lessons is published in partnership with an essay series in The Atlantic.

There is not a single industry which will not be transformed by machine learning and Internet of Things (IoT). IoT and machine learning have altogether changed the technological scenario by letting the user monitor and control things based on the prediction made by machine learning algorithms. There has been substantial progress in the usage of platforms, technologies and applications that are based on these technologies. These breakthrough technologies affect not just the software perspective of the industry, but they cut across areas like

smart cities, smart healthcare, smart retail, smart monitoring, control, and others. Because of these “game changers,” governments, along with top companies around the world, are investing heavily in its research and development. Keeping pace with the latest trends, endless research, and new developments is paramount to innovate systems that are not only user-friendly but also speak to the growing needs and demands of society. This volume is focused on saving energy at different levels of design and automation including the concept of machine learning automation and prediction modeling. It also deals with the design and analysis for IoT-enabled systems including energy saving aspects at different level of operation. The editors and contributors also cover the fundamental concepts of IoT and machine learning, including the latest research, technological developments, and practical applications. Valuable as a learning tool for beginners in this area as well as a daily reference for engineers and scientists working in the area of IoT and machine technology, this is a must-have for any library.

Valentino, Carlina's cousin and a banker, is hands-down the most unpopular member of the wide-spread Mantoni clan. However, a true Mantoni never accepts an intolerable situation, so one evening, they sit down to plot his death. When Valentino is indeed found stabbed, commissario Stefano Garini, now officially Carlina's boyfriend, only wants to turn and run. While he tries to sort through the clues and his feelings with grim determination, the family, in inimitable Mantoni style, manages to make things more complicated all the time. And then Stefano realizes that even Carlina doesn't tell him the full truth. Is their relationship doomed before it can really begin? And will Carlina manage to save the man she loves from a ruthless murderer? Banker's Death is the third in the cozy mystery series Temptation in Florence. The Crimean War (1853-1856) was the first modern war. A vicious struggle between imperial Russia and an alliance of the British, French and Ottoman Empires, it was the first conflict to be reported first-hand in newspapers, painted by official war artists, recorded by telegraph and photographed by camera. In her new short history, Trudi Tate discusses the ways in which this novel representation itself became part of the modern war machine. She tells forgotten stories about the war experience of individual soldiers and civilians, including journalists, nurses, doctors, war tourists and other witnesses. At

the same time, the war was a retrograde one, fought with the mentality, and some of the equipment, of Napoleonic times. Tate argues that the Crimean War was both modern and old-fashioned, looking backwards and forwards, and generating optimism and despair among those who lived through it. She explores this paradox while giving full coverage to the bloody battles (Alma, Balaklava, Inkerman), the siege of Sebastopol, the much-derided strategies of the commanders, conditions in the field and the cultural impact of the anti-Russian alliance.

One of the earliest instances of nursing and media intersecting is the Edison phonographic recording of Florence Nightingale's voice in 1890. Since then, a parade of nurses, good, bad or otherwise, has appeared on both cinema and television screens. How do we interpret the many different types of nurses--real and fictional, lifelike and distorted, sexual

and forbidding--who are so visible in the public consciousness? This book is a comprehensive collection of unique insights from scholars across the Western world. Essays explore a diversity of nursing types that traverse popular characterizations of nurses from various time periods. The shifting roles of nurses are explored across media, including picture postcards, film, television, journalism and the collection and preservation of uniforms and memorabilia. Carbonic Anhydrases and Metabolism Cambridge University Press Tommy Thompson arrived in Chapel Hill, North Carolina, in 1963, smitten by folk and traditional Appalachian music. In 1972, he teamed with Bill Hicks and Jim Watson to form the nontraditional string band the Red Clay Ramblers. Mike Craver joined in 1973, and Jack Herrick in 1976. Over time, musicians including Clay Buckner, Bland Simpson and Chris Frank joined Tommy, who played with the band until 1994. Drawing on interviews and correspondence, and the personal papers of Thompson, the author depicts a life that revolved around music and creativity. Appendices cover Thompson's banjos, his discography and notes on his collaborative lyric writing. Preeclampsia Routledge

Through prose and pictures, There and Here: Small Illinois Towns with Big Names celebrates the bountiful heritage and unheralded charm of Illinois. The book explores the history of more than 100 Illinois towns with foreign names, along with the state's successive capitals, to weave a tapestry of eighteenth- and nineteenth-century Illinois, from Indigenous removal and slavery to mass immigration and Lincoln. Advance praise for There and Here: Jan Kostner, former director, Illinois Bureau of Tourism: "Laurent Perrot's beautiful book unlocks the history and mysteries behind the names of many Illinois towns. There and Here is a wonderful exploration of the Land of Lincoln, giving readers many reasons to get off the highway and explore our state." Leo Schelbert, professor emeritus, University of Illinois at Chicago, author of Switzerland Abroad (2019): "This chronicle of more than one hundred places features mostly smaller and little-known settlements in Illinois. It sketches neo-European foundations after indigenous people had been eliminated and as areas were evolving as eighteenth- and

nineteenth-century neo-European domains of the present United States. Names such as Alhambra, Denmark, Liverpool, Palestine, Teheran, and Versailles, may partly point to global awareness of individual name givers. The names may claim inherently that the newly named places were joining those of the old world on an at least symbolically equal footing. Laurent Pernot's concise textual entries are greatly enriched by numerous carefully chosen and pleasing pictures in color that offer vistas of landscapes, houses, churches, sculptures, and monuments. The chosen images speak as powerfully as the carefully crafted texts. Then and Here features however not only the creative efforts of women and men in evolving a neo-European world in a region of the Northern Western Hemisphere coming to be called Illinois. The book's texts and pictures also point to racial conquest by encirclement, by destruction of indigenous patterns, by expulsion, and by extensive physical annihilation of native peoples. The story documents white settlers' persistent efforts to achieve an erasure of the millennia-old indigenous occupancy

and its replacement by exclusively white jurisdiction. The concise texts and numerous pictures highlight therefore a double-faced historical eighteenth- and nineteenth-century process as it evolved in today's region called Illinois: They point to a gradual conquest characterized by totalitarian violence of invaders against millennia-old indigenous groups and by the creative replacement of an ancient native world by an exclusive establishment of neo-European cultural ways. "More about There and Here: There and Here yields a richly textured portrait of early Illinois, a place where women and men gave their new towns big names, out of hope, hubris, and maybe even denial. The book chronicles locales from Alhambra to Zion, including towns like Argyle and Norway, which served as the main gateway for immigrants from those locales into Illinois and the rest of the country. Segments about the state's seats of power provide useful historical context for the other towns' more localized stories. Springfield is one of no fewer than six capital cities in Illinois, alongside Kaskaskia and Vandalia, Springfield's

predecessors; Cahokia, center of the largest pre-Columbian civilization in what is today the U.S.; Fort de Chartres, the heart of France's Upper Louisiana; and Nauvoo, the first great Mormon metropolis. There's also Metropolis itself, home of Superman. And Popeye reigns sovereign in Chester. There and Here captures times and people full of abnegation, conflict and hope; the bravery and altruism of the Illinois frontier cannot hide the darker side of the state's history. From the town's various histories emerges a picture of ethnic and racial brutality, from the violent treatment of tribes to slavery in the southern part of the state, and to lynchings in places like Cairo and Paris. Author Laurent Pernot, an immigrant from France, takes a fresh look at his adoptive state, unearthing tales and turf unsuspected by most Illinoisans. Environmental Economics and Policy MDPI As the COVID-19 pandemic surged in 2020, questions of data privacy, cybersecurity, and the ethics of surveillance technologies centred an international conversation on the benefits and disadvantages of the appropriate uses and expansion of cyber surveillance

and data tracking. This timely book examines and answers these important concerns. Migration in the Western Balkans Spiramus Press Ltd Following the Congress of Vienna in 1815, the 'Congress System' became the primary instrument of diplomacy in Europe. So central was the Austrian Chancellor Metternich to the political-legal Congress System that the period has often been referred to as the 'Age of Metternich'. In this book, Miroslav Šedivý analyses Metternich's policy towards the pre-united Italian states from 1830 to 1848. With an emphasis on geopolitics and international law and drawing attention to the unsettled role of the Italian states within European diplomacy in the period, this book explains why the Italian peninsula never developed into the stable region that Metternich hoped to establish at the heart of the Congress System. Owing to the self-interested policies of some European Powers as well as the larger of the Italian states. Metternich proved unable to bring about 'the transformation of European politics' in Italy. Using a thorough analysis of the role that Italy played in the Congress System and based on extensive research in 18 European archives, this book explains why it was in Italy that the first war broke out after the end of the Napoleonic Wars, an event representing the first brutal blow to the Congress System. 1813 to 1859, Inspector General James Barry was a pioneering medical reformer who after his death in 1865 became the object of intense speculation when rumours arose about his sex. This cultural history of Barry's afterlives in Victorian to contemporary (neo-Victorian) life-writing ('biographilia') examines the textual and performative strategies of biography, biofiction and biodrama of the last one and a half centuries. In exploring the varied reconstructions and re-imaginings of the historical personality across time, the book illustrates (not least with its cover image) that the 'real' James Barry does not exist, any more than does the 'faithful' biographical, biofictional or biodramatic rendering of a life in a generically 'stable' and discrete form. What Barry represents and how he is represented invariably pinpoints the imaginative, the speculative and the performative: reflections and refractions in the looking glass of genre. Just as 'James Miranda Barry', as a subject of cultural inquiry, comes into being and remains in view in the act of crossing gender, so neo-Victorian life-writing constitutes itself through similar acts of boundary transgression. Transgender thus finds its most typical expression in transgenre. The Future of British Foreign

Policy Routledge Drawing interview material, together with extensive data from the authors' original social movement database, this book examines the development of social movements in resistance to perceived political "regression" and a growing right-wing backlash. With a focus on Italy and the reaction to increasing inequalities and welfare state retrenchment policies, it examines opposition to the government and state authorities on a number of issues. Triangulating different types of data, it sheds light on the ability of citizens to organise in the streets and addresses crucial matters in social movement research, including the significance to political mobilization of grievances, class, gender and generational differences, as well as considering the network dynamics of micro-mobilization, visions of Europe, and the role of interactions with major political institutions. As such, it will appeal to scholars of sociology and politics with interests in social movements and political mobilization. Selected Papers from the 5th International Electronic Conference on Sensors and Applications MDPI Eleanor Marx is one of the most tragically overlooked feminist intellectuals in history, usually

overshadowed by her father, Karl Marx. But not only did she edit, translate, transcribe and collaborate with her father, she also spent her extraordinary life putting his ideas into practice as a labour organizer, feminist radical, and Marxist theorist. The outstanding exception to the omission of Eleanor Marx from history is Yvonne Kapp ' s highly acclaimed biography. First published at the height of feminist organizing in the 1970s, Kapp ' s work brilliantly succeeds in capturing Eleanor ' s spirit, from a lively child opining on the world ' s affairs, to the new woman, aspiring to the stage, earning her living as a free intellectual, and helping to lead England ' s unskilled workers at the height of the new unionism; being always more than, yet at the same time inescapably, Karl Marx ' s daughter. It is also, inevitably, an unrivalled biography of the Marx household in Victorian London, of the Marx circle, and of Friedrich Engels, the family ' s extraordinary mentor. During today ' s resurgence of feminist writing, organizing, and protesting, Kapp ' s foundational single-volume biography serves as a crucial corrective to a narrative that puts feminists and marxists on opposing sides of radical history.
