In 1922 Rolls-Royce introduced their new 20hp model, known as the Twenty, the first in a family of what are now called the “Small Horsepower” cars. The plan was to offer a more manageable, less expensive model than the mighty 7-litre Silver Ghost, one intended for the owner-driver rather than for the chauffeur, yet with all the quality and refinement of the bigger cars. The Twenty and its succeeding models was a success. All these models enjoy a very strong following today. More than 10,000 were made, and many survive today. These cars had an astounding range of coachwork types and styles by practically every coachbuilder in Britain along with many in Europe, the United States and elsewhere, many examples are illustrated in this book. After outlining the development of Rolls-Royce’s project for a smaller car, the author provided a detailed technical description of the Twenty,. For owners, present and prospective, there are chapters on using the cars today and on the practicalities of ownership, including advice on parts availability, maintenance and preservation.. It is illustrated with some 70 color and 150 black-and-white photographs.

A book concerning Russian Limousines, and the Chinese models that were initially derived from them, has never been attempted before. This book investigates the whole story of why the Soviet Communist Party required such a bourgeois product, and how production was subsequently achieved. Following the orders of Stalin, work on the Limousines commenced during the first Five Year Plan (1927-1933) at the Putilov Works, late the Kirov Zavod, where the Leningrad L-1 was made in a limited number. From these beginnings, the Moscow and Gorky models emerged, and later the Chinese-derived types made with Russian aid during the late 1950s. Covering all of these models, up to the last one produced in 2003, and featuring full specifications translated from the relevant primary sources in Russian and Chinese literature, this is a meticulous and unique account of a previously neglected subject.
