This book explores
the tensions
underlying British
imperialism in
Cyprus. Much has
been written about
the British
Empire's
construction outside
Europe, yet there is
little on the same
themes in Britain's
tiny empire in
'Europe'. This
study follows
Cyprus' progress
from a perceived
imperial asset to an
expendable
backwater by

explaining how the
Union Jack came to
fly over the island
and why after thirty-
five years the
British wanted it
lowered. Cyprus'
importance was
always more
imagined than real
and was enmeshed
within widely held
cultural signifiers
and myths. British
Imperialism in
Cyprus fills a gap in
the existing
literature on the
early British period
in Cyprus and
challenges the
received and
monolithic view that
British imperial
policy was based
primarily or
exclusively on
strategic-military
considerations. The
combination of

archival research,
cultural analysis and
visual narrative that
makes for an
enjoyable read for
academics and
students of Imperial,
British and
European history.

Teaching U.S.
History offers an
innovative approach
to social studies
teaching by
connecting historians
to real-world social
studies classrooms
and social studies
teachers. In an
unusual, even
unprecedented,
dialogue between
scholars and
practitioners, this
book weds historical
theory and practice

with social studies
pedagogy. Seven
chapters are organized
around key US
History eras and
events from the time
of slavery through the
Civil Rights
Movement and are
complemented by
detailed discussions of
a particular
methodological
approach, including
primary source
analysis, oral history
and more. Interviews
with historians open
each chapter to bring
the reader into
important
conversations about
the most cutting edge
issues in U.S. history
today and are
followed by essays
from expert teachers
on the rewards and
challenges of
implementing these
topics in the
classroom. Each
chapter also includes

a wealth of practical resources including suggested key documents or artifacts; a lesson plan for middle school and another suitable for high school; and suggested readings and questions for further study. Teaching U.S. History is a must read for any aspiring or current teacher who wants to think critically about how to teach U.S. history and make historical discussions come alive in the school classrooms where the nation's students learn. *The Library Catalogs of the Hoover Institution on War, Revolution, and Peace, Stanford University* Oswaal Books and Learning Pvt Ltd Transnational Food Security addresses food security from an international relations, political economy and legal perspective analysing the relationship between food security and the environment and climate change, trade, finance and contracts, and the intersection between food and human rights. The topic of food concerns one of the most basic and profound aspects of human survival. Universal and equal access to food is, at the same time, ridden with problems of power, inequality, distribution and implicated in old and new geopolitical conflicts. As such, 'food' and food security are central to conditions of poverty and hunger, development and 'modernisation', transitional justice and rule of law reform around the world. As a problem of critique and scholarly inquiry, food prompts an interdisciplinary assessment of the nature of food security in the modern world. The contributors to this book take us deep into the complexity of food and illustrate the challenges of adequately understanding and approaching questions of food security and food sovereignty in a globally interconnected world. Transnational Food Security will be of great interest to scholars of international relations, political economy, and transnational law. The chapters were originally published as a special issue of Transnational Legal

Rock demonstrates that the Letter to the Romans may be seen as an attempt	

of the Roman Empire - demonstrates God's power over the universe and death, the very instrument of Roman control, then the Christ-believer is encouraged to face suffering and death in the hope of salvation through this power. Paul's theology emerges from, and is inextricably bound to, the politics of his day, the Scriptures of his people, and to the critical fact that the God who is One and Lord of all is still in charge of the world.
