Tuning engines can be a mysterious art, all engines need a precise balance of fuel, air, and timing in order to reach their true performance potential. Engine Management: Advanced Tuning takes engine-tuning techniques to the next level, explaining how the EFI system determines engine operation and how the calibrator can change the controlling parameters to optimize actual engine performance. It is the most advanced book on the market, a must-have for tuners and calibrators and a valuable resource for anyone who wants to make horsepower with a fuel-injected, electronically controlled engine.

"Messages, Signs, and Meanings can be used directly in introductory courses in semiotics, communications, media, or culture studies. Additionally, it can be used as a complementary or supplementary text in courses dealing with cognate areas of investigation (psychology, mythology, education, literary studies, anthropology, linguistics). The text builds upon what readers already know intuitively about signs, and then leads them to think critically about

the world in which they live - a world saturated with images of all kinds that a basic knowledge of semiotics can help filter and deconstruct. The text also provides opportunities for readers to do "hands-on" semiotics through the exercises and questions for discussion that accompany each chapter. Biographical sketches of the major figures in the field are also included, as is a convenient glossary of technical terms." "The overall plan of the book is to illustrate how message-making and meaning-making can be studied from the specific vantage point of the discipline of semiotics. This third edition also includes updated discussions of information technology throughout, focusing especially on how meanings are now negotiated through such channels as websites, chat rooms, and instant messages."--Jacket.

Machining is an essential part of high-performance engine building and stock rebuilding, as well as certain servicing procedures. Although you may not own the expensive tooling and machining to perform all or any of the machining required for a quality build, you need to understand the principles, procedures, and goals for machining, so you can guide the machining process when outsourced. Classic and older engines typically require extensive machining and almost every major component of engine, including block, heads, intake, crankshaft, and pistons, require some sort of machining and fitment. A detailed, authoritative, and thorough automotive engine-machining guide for the hard-core enthusiast has not been available until now. Mike Mavrigian, editor of Engine Building Professional, walks you through each important machining procedure. A stock 300-hp engine build has far different requirements than a 1,000-hp drag race engine, and Mavrigian reveals the different machining procedures and plans according to application and engine design. The author also shows you how to inspect, measure, and evaluate components so you can provide astute guidance and make the best machine work choices. Machining procedures included are cylinder boring, align boring/honing, decking, valveseat cutting, cam tunnel boring, and a multitude of other services. In addition, multi-angle valve jobs, setting the valveseats, altering rocker arm ratio, re-conditioning connecting rods, and machining and matching valvetrain components are also covered. Whether you're an enthusiast engine builder or prospective machining

student who wants to pursue a career as an automotive machinist, this book will provide insight and in-depth instruction for performing the most common and important machining procedures.

In this first book about the rather young discipline, the author consolidated its key principles, so that they can be consulted, referenced and utilised by both design students and professionals. Only when the perfect balance between visual beauty and functional performance is achieved, can a product provide a consistent and successful user experience. The discipline of CMF design focuses on designing and specifying colours, materials and finishes to support both functional and emotional attributes of products. The work of the CMF designer combines aesthetics and practical knowledge of materials and technologies with intangible human perceptions of value. This area of design expertise is increasingly in demand. Consumer product manufacturers have an enhanced awareness of its great potential for diversifying product portfolios at relatively low costs, while still maintaining a similar or the same product shape, functionality or tooling. It can work as a key avenue to create a sense of novelty and higher value propositions. From a marketing perspective, CMF design is a valuable tool when it comes to positioning products, collections and categories according to market tiers and consumer segmentations. Introducing the CMF process and detailing the areas of colour, material and finish design, this book serves as a valuable source of information about this emerging professional discipline and its fundamental principles.

For the average clinician, individuals with borderline personality disorder (BPD) often represent the most challenging, seemingly insoluble cases. This volume is the authoritative presentation of dialectical behavior therapy (DBT), Marsha M. Linehan's comprehensive, integrated approach to treating individuals with BPD. DBT was the first psychotherapy shown in controlled trials to be effective with BPD. It has since been adapted and tested for a wide range of other difficult-to-treat disorders involving emotion dysregulation. While focusing on BPD, this book is essential reading for clinicians delivering DBT to any clients with complex, multiple problems. Companion volumes: The latest developments in DBT skills training, together with essential materials for teaching the full range of mindfulness, interpersonal effectiveness, emotion regulation, and distress tolerance skills, are presented in Linehan's DBT Skills Training Manual, Second Edition, and DBT Skills Training Handouts and Worksheets, Second Edition. Also available: Linehan's instructive skills training videos for clients--Crisis Survival Skills: Part One, Crisis Survival Skills: Part Two, From Suffering to Freedom, This One Moment, and Opposite Action.
