Canada's top consumer advocate returns with more financial advice. Canadian consumers are focused on spending and managing what money they do have wisely, but have more questions than answers on most financial topics. Television personality and consumer advocate Pat Foran shares tips and strategies about the questions and issues he sees most often, and explains how some little things can soon add up to a lot of money. Some of the topics covered include: Credit and loyalty cards, and what kind of deal they really are How much insurance is enough – and what kinds do most people need? How to shop for a vehicle, and if it's worth it to import from the US Mortgages, tax breaks, and other complicated financial decisions Getting the most bang for your buck, whether while shopping or travelling Packed with money-saving advice, this title will also include the latest information on marketplace trends, the investment climate, housing prices, interest rates, and other techniques for savings. As an added bonus, Pat has included quotes and comments from prominent Canadian businesspeople and celebrities about the best financial advice they've received in their lifetimes. Pat Foran is seen by millions of Canadians each week as the Consumer Reporter for CFTO News, and Consumer Expert on CTV's Canada AM. His "Consumer Alert" segment is currently on CFTO's noon, six o'clock and eleven-thirty newscasts, five days a week with an audience of 700,000 viewers, and he appears on Canada AM, Canada's number-one national morning show every week, dispensing financial and consumer advice.

*New Car & Truck Buying Guide* Bentley Pub

This handbook is intended to give the broadcast industry an authoritative guide to the Radio Data System (RDS), also called Radio Broadcast Data System (RBDS). Since the standard's adoption, about 700 stations have begun broadcasting RDS in the United States. There is a wide variety of encoding equipment with prices starting as low as \$400, and over 30 models of RDS receivers have been introduced for cars, home receivers, portable and even PC receivers. Automobile manufacturer's such as General Motors, Ford, Audi, and Porsch now offer RDS on new vehicles. Yet despite all the support equipment in place, the FM broadcaster has been reluctant to implement and utilize this service, mainly because of a lack of understanding of what RDS can do for the station. This book finally provides the information required to understand RDS and its possibilities on a variety of levels, so that everyone involved in radio can make the most of it. Station owner, program director, salesperson, and talent alike will find the information he or she requires to maximize the possibilities of this new technology. Each feature of the system is explained in terms of its practical implementation at the station, and interviews with broadcasters currently using the system add a hands-on perspective. Scott Wright is a recognized pioneer in RDS development. As the designer of Delco Electronics' first RDS receiver, he has been extremely active in the development of the RDS standard in the US and in efforts to educate the broadcast community about its potential. He has represented Delco at the European Broadcasting Union's (EBU) RDS Forum and is currently the Chairman of the National Radio Systems Committee RBDS Subcommittee, the US standard-setting body. He is also a member of the Electronics Industries Association's (EIA) RDS Forum.

This reference book is a complete guide to the trends and leading companies in the engineering, research, design, innovation and development business fields: those firms that are dominant in engineering-based design and development, as well leaders in technology-based research and development. We have included companies that are making significant investments in research and development via as many disciplines as possible, whether that research is being funded by internal investment, by fees received from clients or by fees collected from government agencies. In this carefully-researched volume, you'll get all of the data you need on the American Engineering & Research Industry, including: engineering market analysis, complete industry basics, trends, research trends, patents, intellectual property, funding, research and development data, growth companies, investments, emerging technologies, CAD, CAE, CAM, and more. The book also contains major statistical tables covering everything from total U.S. R&D expenditures to the total number of scientists working in various disciplines, to amount of U.S. government grants for research. In addition, you'll get expertly written profiles of nearly 400 top Engineering and Research firms - the largest, most successful corporations in all facets of Engineering and Research, all cross-indexed by location, size and type of business. These corporate profiles include contact names, addresses, Internet addresses, fax numbers, toll-free numbers, plus growth and hiring plans, finances, research, marketing, technology, acquisitions and much more. This book will put the entire Engineering and Research industry in your hands. Purchasers of either the book or PDF version can receive a free copy of the company profiles database on CD-ROM, enabling key word search and export of key information, addresses, phone numbers and executive names with titles for every company profiled.
