This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

Since the early 2000s, the apparent explosion of interest in Volkswagens with original paint, rust and patina has inspired a generation of car fanatics, who might not be able to afford to restore a car to show condition, but still want a good looking, cool car that will stand out from the crowd. Once looked upon as being in need of restoration, cars with original paint, rust and patina, especially within the global Volkswagen community, have gradually become far more popular than restored cars. When walking down a line of cars at a car show, it ' s easy to see why; these cars are rare, unspoiled survivors - cars that tell a story of an interesting and varied past. The look of the Volkswagens being built in this style is so honest, unspoiled and characterful, that it has begun to inspire the media; even Hollywood movie stars and celebrities. Whilst this has undoubtedly resulted in increased car values, and turned a brand of cars that had always been a cheap, honest mode of transportation into something cool with a high price tag, the generation it initially inspired has grown with the hobby, and produced a micro-industry that still manages to embrace the 'Built not bought' ethos. This book, superbly illustrated with stunning colour photographs, takes an inside look at some of the key car builders, dealers, celebrities and hobbyists, as well as the different styles of build, meaning every single car has a style all its own. Foreword by Drew Pritchard of TV ' s ' Salvage Hunters ' fame.

America's first World Champion Phil Hill drove an astonishing variety of cars and gave his firsthand impressions in his work for Road & Track magazine. This book gathers some of the best material Hill produced with his great friend and colleague, photographer John Lamm. In addition to providing the lush photography Lamm edited the book and introduces each story to provide context. Beginning with the world's first car-the 1886 three-wheel Benz-Hill reviews road cars such as the 1915 Packard and Jaguar XK120, and a great range of race cars, from a Bugatti Type 51 and Auto Union D type, to the ill-fated ATS Grand Prix car and Dale Earnhardt's NASCAR Chevrolet Monte Carlo. Equally gifted as a mechanic as well as a driver, Hill's experience combines to provide insights that only he could offer into each car's particular technical innovations and driving characteristics. The book also features examples of Hill's tributes to men in racing, with reminiscences of Juan Fangio and Olivier Gendebien on the occasions of their deaths, and penetrating character sketches of Dan Gurney, Stirling Moss, and Jim Hall. Hill knew and raced with them all. Through

the humor and intelligence of Hill's writing we not only learn great deal about cars and drivers, we also learn a lot about Hill himself-what he valued and how he thought- which adds enormously to our enjoyment.
