U.S. automakers are suddenly awash in profits, and South Koreans and Europeans have gained market shares, while Honda, Nissan, and Toyota have curtailed production

following the 2011 tsunami in Japan. Shortages of Japanese new cars and supplier disruptions will likely push used car prices through the roof well into 2012, so what should a savvy buyer do? The all-new Lemon-Aid Used Cars and Trucks 2012-2013 has the answers, including: More vehicles rated, with some redesigned models that don't perform as well as previous iterations downrated. More roof crash-worthiness ratings along with an expanded cross-border shopping guide. A revised summary of safety- and performance-related defects that are likely to affect rated models.

Popular Mechanics Routledge In this revelatory examination of the most overlooked force that is changing the face of China, the Oxford historian and scholar of modern Asia Karl Gerth shows that as the Chinese consumer goes, so goes the world. While Americans and Europeans have become increasingly worried about China's competition for manufacturing jobs and

energy resources, they have overlooked an even bigger story: China's rapid development of an American-style consumer culture, which is revolutionizing the lives of hundreds of millions of Chinese and has the potential to reshape the world. This change is already well under way. China has become the world's largest consumer of everything from automobiles to beer and has begun to adopt such consumer habits as living in large single-occupancy homes, shopping in gigantic malls, and eating meat-based

diets served in fast-food outlets. Even rural Chinese, long the laggards of consumerism, have been buying refrigerators, televisions, mobile phones, and larger houses in unprecedented numbers. As *China Goes, So Goes the World* reveals why we should all care about the everyday choices made by ordinary Chinese. Taken together, these seemingly small changes are deeper and more profound than the headline-grabbing stories on military budgets, carbon emissions, or trade

disputes.
