A ROUGH TRADE BOOK OF THE YEAR CONCRETE ISLANDS NO. 1 BOOK OF THE YEAR
'In a dizzying gyroscopic vortex of inner archeology, David Keenan sifts through spiraling past lives to unearth his provocative vision of the future. A colossus of imagination' LENNY KAYE 'Visionary and prismatic, gloriously hallucinatory although grounded in the material, Monument Maker's grand sweep takes in distant historical subterrains, a shimmering summer of the present, the transient, the eternal, the profane, the divine' WENDY ERSKINE 'I sometimes think David Keenan dreams aloud. His prose has the effortless enigmatic, unsettling quality of dream' EDNA O'BRIEN 'A masterpiece' WILLIAM BASINSKI Is it possible for books to dream? For books to dream within books? Is there a literary subterranea that would facilitate ingress and exit points through these dreams? These are some of the questions posed by David Keenan's masterly fifth novel, Monument Maker, an epic romance of eternal summer and a descent, into history, into the horrors of the past; a novel with a sweep and range that runs from the siege of Khartoum and the conquest of Africa in the 19th century through the Second World War and up to the present day, where the memory of a single summer, and a love affair that took place across the cathedrals of Ile de France, unravels, as a secret initiatory cult is uncovered that has its roots in macabre experiments in cryptozoology in pre-war Europe. MONUMENT MAKER straddles genres while fully embracing none of them, a book within a book within a book that runs from hallucinatory historical epics through future-visioned histories of the world narrated by a horribly disfigured British soldier made prophetic by depths of suffering; books that interact with Keenan's earlier novels, including a return to the mythical post-punk Airdrie landscape of his now classic debut, THIS IS MEMORIAL DEVICE; whole histories of art and religion; books that are glorious choral appendices; bibliographies; imagined films; tape recorded interviews; building to a jubilant accumulation of registers, voices and rhythms that is truly Choral. Written over the course of 10 years, MONUMENT MAKER represents the apex of Keenan's project to create books that contain uncanny life and feel like living organisms. It is a meditation on art and religion, and on what it means to make monument; this great longing for

something eternal, something that could fix moments in time, forever.

Resoundingly popular in its first edition, Dean Duffy's *Advanced
Engineering Mathematics* has been updated, expanded, and now more
than ever provides the solid mathematics background required
throughout the engineering disciplines. Melding the author's
expertise as a practitioner and his years of teaching engineering
mathematics, this text stands clearly apart from the many others
available. Relevant, insightful examples follow nearly every
concept introduced and demonstrate its practical application.
This edition includes two new chapters on differential equations,
another on Hilbert transforms, and many new examples, problems,
and projects that help build problem-solving skills. Most
importantly, the book now incorporates the use of MATLAB
throughout the presentation to reinforce the concepts presented.
MATLAB code is included so readers can take an analytic result,
fully explore it graphically, and gain valuable experience with
this industry-standard software.

The inclination towards two wheelers is not newer to the world.
From the very beginning, two wheelers are recognized as a mark of
triumph, independence and joy. These are considered fast, safe
and easy mode of transportation with worthy fuel economy. With

the arrival of automation and electronics in two wheelers, the
study gained more momentum, which led Two and Three Wheeler
Technology to emerge as a new discipline of automobile
engineering. The book explains traditional and modern
technologies in an easy to understand manner. Various
technologies have been explicated with appropriate 2D and 3D
diagrams to support learning. Text comprises the state-of-the-art
developments in the field of two wheelers. Detailed explanation
on the actual assemblies helps the students to cognize the
technology systematically. Although the emphasis has been given
to the two wheeler technology, considering the requirement of
various syllabi, the last chapter is solely dedicated to three
wheeler technology. Chapter-end review questions help students in
preparing them for examination by self-assessment method.
Primarily designed for the undergraduate and diploma students of
automobile engineering, the lucid and simple presentation of the
book makes it useful for the commoner, who has keen interest in
this area. It is a useful guide for a vehicle owner for
understanding mechanism and parts, which may help him in
maintaining his vehicle at best efficiency.
