Betty Lee, Senior Betty Lee, who was sometimes jokingly called father ' s little goldfish, had acquired that title by reason of her ability to swim and her golden head, though that was usually covered tightly by a rubber cap. As her taking part in most of the swimming contests among the girls of Lyon High necessitated good bathing suits, Betty was already prepared in that respect for her visit at the seashore. Secrets were all very well. Betty had interest in everything. But her greatest interest was in the new experience ahead of her, the new country and the delights of the ocean. Her father warned her of new conditions, but she would quickly learn.

Though there were no river current, there would be the undertow. Betty promised to use her common sense and swim within the boundaries allowed at the resort to which she was bound. With the highest anticipations, then, Betty accompanied the Gwynnes and Kathryn Allen on the fascinating trip East and to New England. Dick Lee was at a boys camp. His twin, Doris, would soon be at a corresponding girls ' camp, for it “ had to be fair, ” at the risk, said Mr. Lee, of depleting the treasury. Mother and Amy Lou would remain in the city with Father, but would take an outing with him later, when a business trip would take him East again. Then Betty, returning from the visit with Carolyn, would meet other girl friends at a “ wonderful ” Girl Reserve camp. Truly the summer could offer no more! Betty ' s former chum at the little town of Buxton, Janet Light, with whom Betty still corresponded fitfully, as her full life permitted, wrote Betty that she was a “ lucky girl, ” and Betty thought so too. rebuilding, as well as certain servicing procedures. Although you may not own the expensive tooling and machining to perform all or any of the machining required for a quality build, you need to understand the principles, procedures, and goals for machining, so you can guide the machining process when outsourced. Classic and older engines typically require extensive machining and almost every major component of engine, including block, heads, intake, crankshaft, and pistons, require some sort of machining and fitment. A detailed, authoritative, and thorough automotive engine-machining guide for the hard-core enthusiast has not been available until now. Mike Mavrigian, editor of Engine Building Professional, walks you through each important machining procedure. A stock 300-hp engine build has far different requirements than a 1,000-hp drag race engine, and Mavrigian reveals the different machining procedures and plans according to application and engine design. The author also shows you how to inspect, measure, and evaluate components so you can provide astute guidance and make the best machine work choices. Machining procedures included are cylinder boring, align boring/honing, decking, valveseat cutting, cam tunnel boring, and a multitude of other services. In addition, multi-angle valve jobs, setting the valveseats, altering rocker arm ratio, re-conditioning connecting rods, and machining and matching valvetrain components are also covered. Whether you're an enthusiast engine builder or prospective machining student who wants to pursue a career as an automotive machinist, this book will provide insight and in-depth instruction for performing the most common and important machining procedures.
