In 1970, The Joint Archaeological Expedition to Tell el-Hesi, sponsored by the American Schools of Oriental Research and a consortium of educational institutions, entered the site with the objectives of investigating in greater detail and with more refined methods the stratigraphic divisions identified by Petrie and Bliss. This book appears as the fourth volume in the Joint Expedition's series of final publications regarding their field experience and findings. The Joint Expedition had its first field season in June 1970 and returned to the site for further excavation in the summers of odd-numbered years. The first four seasons (1970-75) have been designated Phase One, and were largely limited to the later occupation levels on the summit and southern slope of the site's northeast hill or acropolis, although there were also probes and limited exploration of the larger Early Bronze (EB) city.

Best known for his account of the Peloponnesian War, Thucydides (c. 454–c. 395 b.c.) was an Athenian general and historian. This valuable commentary addresses the most famous part of Thucydides's narrative: the Sicilian Expedition (books 6–8.1), which resulted in a major defeat for Athens. Designed for advanced undergraduate and graduate students of Greek, Martha C. Taylor's student-friendly text is the first single volume in more than a century to focus on the expedition and the first to include the Melian Dialogue (5.84–116), considered the "prelude" to the invasion. Many beginning readers of Thucydides require assistance with the author's often difficult constructions. In her notes to the text, Taylor breaks down Thucydides's convoluted sentences and explains them piece by piece. Her notes also explain the author's many historical and literary references. In her in-depth introduction, Taylor provides students with all the information they need to begin reading Thucydides. She discusses what we know about the Greek author—and what we do not—and she analyzes his unique language and style. To place the Sicilian Expedition in historical context, she summarizes the events leading up to and following the Sicilian Expedition, and she examines important aspects of Athenian democracy, including Thucydides's presentation of the Athenian boule, the city's advisory citizen council. In addition to textual and historical commentary, this volume includes three maps; an appendix addressing the epitaph of Perikles (2.65.5–13), in which Thucydides appears to contradict his later presentation of the Sicilian Expedition; source suggestions for student term papers on relevant topics; and a general bibliography. Thucydides's Melian Dialogue and Sicilian Expedition is designed for use with the Oxford Classical Text of Thucydides, which is available online.

"A fine and lively collection of exploration stories" from the author of Barrow's Boys (Kirkus Reviews). On John Franklin's 1820 expedition to find the Northwest Passage, Michel Teroahaute cannibalized two team members and was preparing a third when he was caught and killed. When Rene La Salle set off for the Mississippi Delta in 1684, he missed the target by five hundred miles, but on landing, immediately built

a prison for those who fell asleep on watch. Consummate storyteller Fergus Fleming brings together these and forty-three other gripping stories spanning three ages of exploration in *Off the Map*. *Off the Map* recounts episodes both classic and forgotten: The "classics" are brought to life in more vivid colors than ever before; the lesser-known stories offer accounts of extraordinary feats that have long lain hidden. From the Renaissance golden age of Columbus, da Gama, and Magellan, to the twentieth-century heroics of polar explorers such as Peary, Scott, and Amundsen, this is an unforgettable journey into the annals of adventure. "A first-rate one-volume . . . introduction to many hair-raising stories of exploration." —The New York Times "Each story is short, punchy, and crammed with facts . . . Fleming possesses an eye for wry detail." —Adventure "There isn't a dud in the lot . . . Adventure reading of a high order: brisk, fresh and full of color." —Kirkus Reviews

A selection of papers presented at the 13th International Conference of the International Bryozoology Association held in Concepción Chile in January 2004 and hosted by the Universidad de Concepción and Universidad Católica de la Santísima Concepción. The topics presented in this volume reflect the diversity of studies on bryozoa with authors from 18 countries. They include investigations in seven thematic areas: ecology and life strategies; recent and fossil faunas of Australia and New Zealand; past and present bryozoans from both Antarctic and Arctic seas; geology and palaeontology of bryozoans from Eurasia and North America; fresh water bryozoans around the world; fossil bryozoans of the Mediterranean and Tethyan realms and evolution and diversity of recent species. This volume represents the newest advances made in bryozoological studies during the last three years, and makes a significant contribution to the literature.

The tale begins over three-hundred years ago, when the Fair People—the goblins, fairies, dragons, and other fabled and fantastic creatures of a dozen lands—fled the Old World for the New, seeking haven from the ways of Man. With them came their precious jewels: diamonds, rubies, emeralds, pearls... But then the Fair People vanished, taking with them their twelve fabulous treasures. And they remained hidden until now... Across North America, these twelve treasures, over ten-thousand dollars in precious jewels in 1982 dollars, are buried. The key to finding each can be found within the twelve full-color paintings and verses of *THE SECRET*. Are you smart enough? *THE SECRET: A TREASURE HUNT* was published in 1982. The year before publication, the author and publisher Byron Preiss had traveled to 12 locations in the continental U.S. (and possibly Canada) to secretly bury a dozen ceramic casques. Each casque contained a small key that could be redeemed for one of 12 jewels Preiss kept in a safe deposit box in New York. The key to finding the casques was to match one of 12 paintings to one of 12 poetic verses, solve the resulting riddle, and start digging. Since 1982, only two of the 12 casques have been recovered. The first was located in Grant Park, Chicago, in 1984 by a group of students. The second was unearthed in 2004 in Cleveland by two members of the Quest4Treasure forum.

For nearly a century, British expatriate Charles Joseph Finger (1867–1941) was best known as a Newberry-award-winning author of children's literature. In *Shared Secrets*, Elizabeth Findley Shores relates Finger's untold story, exploring the secrets that connected the author to an international community of twentieth-century queer literati. As a young man, Finger reveled in the easy homosociality of his London polytechnical school, where he launched a student literary society in the mold of the city's private men's clubs. Throughout his life, as he wandered from England to Patagonia to the United States, he tried to recreate similarly

open spaces—such as Gayeta, his would-be art colony in Arkansas. But it was through his idiosyncratic magazine *All's Well* that he constructed his most successful social network, writing articles filled with coded signals and winking asides for an inner circle of understanding readers. *Shared Secrets* is both the story of Finger's remarkable, adventurous life and a rare look at a community of gay writers and artists who helped shaped twentieth-century American culture, even as they artfully concealed their own identities.

"This is a delightful and funny adventure ... It is also lonely, dangerous and frightening." —THE LONDON TIMES He survived a terrifying crocodile attack off Australia's Queensland coast, blood poisoning in the middle of the Pacific, malaria in Indonesia and China, and acute mountain sickness in the Himalayas. He was hit by a car and left for dead with two broken legs in Colorado, and incarcerated for espionage on the Sudan-Egypt border. The first in a thrilling adventure trilogy, *Dark Waters* charts one of the longest, most gruelling, yet uplifting and at times irreverently funny journeys in history, circling the world using just the power of the human body, hailed by the London Sunday Times as "The last great first for circumnavigation." But it was more than just a physical challenge. Prompted by what scientists have dubbed the "perfect storm" as the global population soars to 8.3 billion by 2030, adventurer Jason Lewis used *The Expedition* to reach out to thousands of schoolchildren, calling attention to our interconnectedness and shared responsibility of an inhabitable Earth for future generations. * * WINNER of the BENJAMIN FRANKLIN AWARD & ERIC HOFFER AWARD * *

"Often funny and irreverent, always frank and authentic, Lewis's first volume of *The Expedition* series is also marked by the thrills of a first-rate adventure." —FOREWORD REVIEWS "Skating through Alabama with long hair, duct tape on the nipples, and women's culottes ... In the tumultuous years following the Civil War, violence and lawlessness plagued the state of Texas, often overwhelming the ability of local law enforcement to maintain order. In response, Reconstruction-era governor Edmund J. Davis created a statewide police force that could be mobilized whenever and wherever local authorities were unable or unwilling to control lawlessness. During its three years (1870–1873) of existence, however, the Texas State Police was reviled as an arm of the Radical Republican party and widely condemned for being oppressive, arrogant, staffed with criminals and African Americans, and expensive to maintain, as well as for enforcing the new and unpopular laws that protected the rights of freed slaves. Drawing extensively on the wealth of previously untouched records in the Texas State Archives, as well as other contemporary sources, Barry A. Crouch and Donaly E. Brice here offer the first major objective assessment of the Texas State Police and its role in maintaining law and order in Reconstruction Texas. Examining the activities of the force throughout its tenure and across the state, the authors find that the Texas State Police actually did much to solve the problem of violence in a largely lawless state. While acknowledging that much of the criticism the agency received was merited, the authors make a convincing case that the state police performed many of the same duties that the Texas Rangers later assumed and fulfilled the same need for a mobile, statewide law enforcement agency.

In the late 26th century, overpopulation on Earth is reaching the breaking point, and humanity must find new frontiers.

The terraforming of Mars has taken centuries but is now complete. The colonization of Mars by humanity is an epoch-making event, but an unintended side effect of the terraforming process unleashes a horror no one could ever have imagined... As the situation on Mars intensifies, back on Earth the nations involved convene to negotiate their interests. China makes an offer of a rescue ship, forcing those at the council to choose sides. As the leaders deliberate, the humans on Mars find their conflicts reflecting those back home, as members of the expedition begin to turn on each other. Akari and Michelle make their way back to the rendezvous point, but will they be welcomed or attacked? As always the Terraformers lurk with more surprises in store...

The Tell el-Hesi site comprises a 25-acre walled city from the Early Bronze III period. It is located on the southeastern edge of the Mediterranean coastal plain, 26 km northeast of Gaza in Israel. Tell el-Hesi was the first Palestinian site at which the principles of ceramic chronology and of stratigraphic excavation were applied and at which the relationship between pottery and stratigraphy was shown to be significant. In 1890 W.M. Flinders Petrie excavated at Hesi and produced a general picture of its occupational history. In 1891-92, F.J. Bliss excavated stratigraphically through each successive level of the mound and identified eleven occupational levels which he grouped into eight strata or "cities". In 1970, The Joint Archaeological Expedition to Tell el-Hesi, sponsored by the American Schools of Oriental Research and a consortium of educational institutions, entered the site with the objectives of investigating in greater detail and with more refined methods the stratigraphic divisions identified by Petrie and Bliss. This book appears as the fifth volume in the Joint Expedition's series of final publications regarding their field experience and findings. The Joint Expedition had its first field season in June 1970 and returned to the site for further excavation in the summers of odd-numbered years. The first four seasons (1970-75) have been designated Phase One, and were largely limited to the later occupation levels on the summit and southern slope of the site's northeast hill or acropolis, although there were also probes and limited exploration of the larger Early Bronze (EB) city. The next four seasons (1977-93) were designated Phase Two, with work continuing in the Iron Age levels of the acropolis and also extending to the southern EB city wall and associated domestic structures. This volume is primarily devoted to Phase Two of the expedition and details the burials unearthed during this excavation period when a large number of graves overlying Early Bronze Age strata were found in Fields V and VI.

The New World story of the Spanish explorer Cabeza de Vaca in his own words This riveting true story is the first major narrative detailing the exploration of North America by Spanish conquistadors (1528-1536). The author, Alvar Núñez Cabeza de Vaca, was a fortune-seeking Spanish nobleman and the treasurer of an expedition sent to claim for Spain a vast area of today's southern United States. In simple, straightforward prose, Cabeza de Vaca chronicles the nine-year odyssey endured by the men after a shipwreck forced them to make a westward journey on foot from present-day Florida through Louisiana and Texas into California. In

thirty-eight brief chapters, Cabeza de Vaca describes the scores of natural and human obstacles they encountered as they made their way across an unknown land. Cabeza de Vaca's gripping account offers a trove of ethnographic information, including descriptions and interpretations of native cultures, making it a powerful precursor to modern anthropology. This unique guide for literate travelers in the American Southwest tells the story of fifteen iconic sites across Arizona, New Mexico, southern Utah, and southern Colorado through the eyes of the explorers, missionaries, and travelers who were the first non-natives to describe them. Noted borderlands historians David J. Weber and William deBuys lead readers through centuries of political, cultural, and ecological change. The sites visited in this volume range from popular destinations within the National Park System—including Carlsbad Caverns, the Grand Canyon, and Mesa Verde—to the Spanish colonial towns of Santa Fe and Taos and the living Indian communities of Acoma, Zuni, and Taos. Lovers of the Southwest, residents and visitors alike, will delight in the authors' skillful evocation of the region's sweeping landscapes, its rich Hispanic and Indian heritage, and the sense of discovery that so enchanted its early explorers.

The Seven Great Monarchies of the Eastern World

A riveting account of a landmark expedition that left only one survivor, now back in print for the first time in decades. Arabia Felix is the spellbinding true story of a scientific expedition gone disastrously awry. On a winter morning in 1761 six men leave Copenhagen by sea—a botanist, a philologist, an astronomer, a doctor, an artist, and their manservant—an ill-assorted band of men who dislike and distrust one another from the start. These are the members of the Danish expedition to Arabia Felix, as Yemen was then known, the first organized foray into a corner of the world unknown to Europeans. The expedition made its way to Turkey and Egypt, by which time its members were already actively seeking to undercut and even kill one another, before disappearing into the harsh desert that was their destination. Nearly seven years later a single survivor returned to Denmark to find himself forgotten and all the specimens that had been sent back ruined by neglect. Based on diaries, notebooks, and sketches that lay unread in Danish archives until the twentieth century, Arabia Felix is a tale of intellectual rivalry and a comedy of very bad manners, as well as an utterly absorbing adventure. Arabia Felix includes 33 line drawings and maps.
