Product strategy is the key driver of business strategy and corporate success. This book brings out several important aspects of product strategy, drawing upon examples from the Indian automobile industry, which is verily the bellwether of the Indian economy. The automobile industry is not only a strategic industry economically but also an instructive industry intellectually. The industry is the cradle of modern management and is a synthesis of various functional strategies. The growth of the automobile industry or, for that matter, any consumer-facing industry lies in its ability to maintain a continuous pipeline of new and innovative products, substantive in functionality and stylistic in appearance. The automobile industry provides the perfect backdrop for discussing products as the core of the corporate business strategy. The global automobile industry, including the Indian automobile industry, is at an inflection point with portends of an unprecedented transformation. The drivers of this transformation

are already seen in terms of connected vehicles, autonomous mobility, electric vehicles and digital technologies. The book, through its eighty chapters, demonstrates the synergistic interplay between technology and business, strategy and execution, innovation and inventiveness, enterprise and regulation, indigenization and globalization, structure and process, resourcing and spend, and leadership and management. This interplay would determine India's ability to become a major player in this transformation. This book will be of interest to industry professionals, policy makers, the academic community and the general public.

Canada's automotive "Dr. Phil" says there's never been a better time to buy a new car or truck. For deals on wheels, 2013 will be a "perfect storm." There's never been a better time to buy a new car or truck, thanks to a stronger Canadian dollar, a worldwide recession driving prices downward,

and a more competitive Japanese auto industry that's still reeling from a series of natural disasters. In addition to lower prices and more choices, 2013 car buyers will see more generous cash rebates, low financing rates, bargain leases, and free auto maintenance programs. Buy, sell, or hold? Which cars and trucks are "wallet-friendly" and can easily last 15 years? Which vehicles offer the most features to best accommodate senior drivers? Do ethanol and hybrid fuel-saving claims have more in common with Harry Potter than the Society of Automotive Engineers? Is GM's 2013 Volt electric car destined to become an electric Edsel? These questions and more are answered in this informative guide.

Fuel cell systems have now reached a degree of technological maturity and appear destined to form the cornerstone of future energy technologies. But the rapid advances in fuel cell system development have left current information available only in scattered journals and Internet sites. The even faster race toward fuel cell commercialization further

Studying abroad in Germany embarks Paul Welch on an adventure he will never forget. From the rigors and joys of learning a new language and set of friends to traveling in his free time, the experiences of the year both open his eyes and confirm his deepest held beliefs. The biggest adventure and reward of all, though, proves to be love. A month before classes start, Welch arrives in the Bavarian town of Erlangen to take an intensive language course at the Friedrich-Alexander Universitt. Here, he makes quick friends with many other students throughout Europe. One of with whom, Maria, he hits it off amazingly well. But just as he is about to ask her out, he learns that she is dating one of the other guys in the course, Tommy. Despite the odds against it, Luke has the conviction that he and Maria will have their chance together. Before everyone from the language course goes their separate ways, Maria invites Paul to come to Sardinia during his spring

break to visit her and another friend from the course. He decides not to say anything to her at the time but makes a commitment to himself to follow through and go visit her in the spring. Paul moves on to Darmstadt, where he will be studying for the next year and slowly adapts to his new life. Months pass, friends are made, new adventures are had. While his zeal for visiting Maria has been tempered by the question of how a short visit can lead to something lasting, he follows through on the commitment to himself to go and visit her.

Ford FE engines, which were manufactured from the late 1950s all the way through the mid-1970s, were designated as the large-displacement engines in the Ford lineup. FE means Ford Edsel, and reflects an era when Ford sought to promote the Edsel name. The design of these engines was implemented to increase displacement over its predecessor, the Y-Block engines of the previous decade. Early models were fairly modest in displacement, as were most big-blocks of the era, but they grew quickly to fill the needs of rapidly

changing chassis requirements and consumer demand for larger vehicles. As it grew, the FE engine performed admirably as a heavy passenger car and light truck engine. It also became quite accomplished in performance circles, winning the 24 Hours of Le Mans, as well as powering Ford's muscle car and drag racing programs in the mid- to late 1960s. In this book, you will learn everything you need to know to rebuild one of these legendary engines. CarTech's unique Workbench series format takes you step-by-step through the entire rebuilding process. Covered are engine identification and selection, disassembly, cleaning, parts analysis and assessment, machine shop processes, replacement parts selection, re-assembly and start-up/break-in techniques. Along the way you find helpful tips on performance upgrades, trouble spots to look for, special tools required, and professional builder's tips. FE master, owner of Survival Motorsports, and veteran author Barry Rabortnick shares all of his tricks and secrets on building a durable and reliable FE engine. Whether you are simply rebuilding an old truck for reliable service use, restoring a 100-point show car, or building the foundation for a high-performance street and strip machine, this book will be an irreplaceable resource for all your future FE engine projects.

This volume is the offspring of a week-long workshop on "Galois groups over  $\mathbb{Q}$  and related topics," which was held at the Mathematical Sciences Research Institute during the week March 23-27, 1987. The organizing committee consisted of Kenneth Ribet (chairman), Yasutaka Ihara, and Jean-Pierre Serre. The conference focused on three principal themes: 1. Extensions of  $\mathbb{Q}$  with finite simple Galois groups. 2. Galois actions on fundamental groups, nilpotent extensions of  $\mathbb{Q}$  arising from Fermat curves, and the interplay between Gauss sums and cyclotomic units. 3. Representations of  $\text{Gal}(\mathbb{Q}/\mathbb{Q})$  with values in  $\text{GL}(2)_j$  deformations and connections with modular forms. Here is a summary of the conference program: • G. Anderson: "Gauss sums, circular units and the simplex" • G. Anderson and Y. Ihara: "Galois

actions on  $11^m$  (•••) and higher circular units" • D. Blasius: "Maass forms and Galois representations" • P. Deligne: "Galois action on  $11^m(P-\{0, 1, \infty\})$  and Hodge analogue" • W. Feit: "Some Galois groups over number fields" • Y. Ihara: "Arithmetic aspect of Galois actions on  $11^m(P - \{0, 1, \infty\})$ " - survey talk • U. Jannsen: "Galois cohomology of  $i$ -adic representations" • B. Matzat: - "Rationality criteria for Galois extensions" - "How to construct polynomials with Galois group  $M_{11}$  over  $\mathbb{Q}$ " • B. Mazur: "Deforming  $\text{GL}(2)$  Galois representations" • K. Ribet: "Lowering the level of modular representations of  $\text{Gal}(\mathbb{Q}/\mathbb{Q})$ " • J-P. Serre: - Introductory Lecture - "Degree 2 modular representations of  $\text{Gal}(\mathbb{Q}/\mathbb{Q})$ " • J.

As U.S. and Canadian automakers and dealers face bankruptcy and Toyota battles unprecedented quality-control problems, Lemon-Aid guides steer the confused and anxious buyer through the economic meltdown unlike any other car-and-truck books on the market. Phil Edmonston, Canada's automotive "Dr. Phil" for more than 40 years, pulls no punches. In this all-new guide he says: Chrysler's days are numbered with the dubious help of Fiat. Electric cars and ethanol power are PR gimmicks. Diesel and natural gas are the future. Be wary of "zombie" vehicles: Jaguar, Land Rover, Saab, and Volvo. Mercedes-Benz -- rich cars, poor quality. There's only one Saturn you should buy. Toyota -- enough apologies: "when you mess up, 'fess up."
