For the city's first two hundred years, the story told at Washington DC's symbolic center, the National Mall, was about triumphant American leaders. Since 1982, when the Vietnam Veterans Memorial was dedicated, the narrative has shifted to emphasize the memory of American wars. In the last thirty years, five significant war memorials have been built on, or very nearly on, the Mall. The Vietnam Veterans Memorial, the Korean War Veterans Memorial, the Women in Military Service for America Memorial, The National Japanese American Memorial to Patriotism During WWII, and the National World War II Memorial have not only transformed the physical space of the Mall but have also dramatically rewritten ideas about U.S. nationalism expressed there. In *Sacrificing Soldiers on the National Mall*, Kristin Ann Hass examines this war memorial boom, the debates about war and race and gender and patriotism that shaped the memorials, and the new narratives about the nature of American citizenship that they spawned. *Sacrificing Soldiers on the National Mall* explores the meanings we have made in exchange for the lives of our soldiers and asks if we have made good on our enormous responsibility to them.

Parliamentary Debates (Hansard). Penguin Hardcover

An eye-opening response to Aldous Huxley's widely influential work on psychedelics, physical reality, and consciousness What exactly are hallucinations? Are they actually doors to another reality? Anthony Peake thinks so. In this stunning book, he takes Aldous Huxley's *The Doors of Perception* and updates it using the latest information from quantum mechanics, neurochemistry, and consciousness studies. Most human beings perceive the doors of perception as being securely closed. But here, Peake analyzes the concept of 'the scale of transcendence' and suggests there is a scale of perceptions whereby the doors are slowly opened, bit by bit, to reveal the true nature of reality. For 'normal' people, glimpses of this reality—what the Gnostics called 'The Pleroma'—are experienced during 'noetic' experiences. However, for others, the doors are prized open by certain neurological processes starting with migraine and progressing through various altered states such as temporal lobe epilepsy, bipolar syndrome, autism, and schizophrenia. A pioneering work on the relationship between physical reality and consciousness, *Opening the Doors of Perception* suggests that man can, indeed, perceive reality in its true glory.
