Proficient Motorcycling Haynes Manuals N. America, Incorporated Jupiter's Travels - Ted Simon's astonishing 4 year motorbike journey around the world The

book that inspired Ewan McGregor's Long Way Round In the late 1970s Ted Simon set off on a Triumph and rode 63,000 miles over four years through fifty-four countries in a journey that took him around the world. Through breakdowns, prison, war, revolutions, disasters and a Californian commune, he travelled into the depths of fear and reached the heights of euphoria. He met astonishing people and was treated as a spy, a

welcome stranger and even a god. For Simon the trip became a journey into his own soul, and for many others - including bikers Charley Boorman and Ewan McGreggor - it provides an inspiration they will never forget. This classic text, which has informed a whole genre of travel writing in the thirty years since it was first published, will never be bettered for sheer adventure, passion, humour and honesty. Brought up in England by a German mother and a

Romanian father, Ted Simon found himself impelled by an insatiable desire to explore the world. It led him to abandon an early scientific career in favour of journalism, and he has worked for several newspapers and magazines on Fleet Street and elsewhere. the Japanese did not suddenly become proficient in the design and development of motorcycles when they first appeared in Europe at the end of the 1950s. Instead, the Japanese had been involved with motorcycles since the beginning of the 20th century. True, early Japanese motorcycles copied Western design - a trend that continued for several years after WWII. But soon they designed a succession

of highly innovative machinery, not only to the Grand Prix world's benefit but to the paying 'over-the-counter' customer, too. Honda, Kawasaki, Suzuki, and Yamaha, plus Bridgestone and Tohatsu, have all built and sold racing motorcycles which the public could also buy and enjoy.
