Why would anyone want to do  
something as dangerous as  
motorcycling? For those who love  
to ride, no explanation is  
necessary. For everyone else,  
there ' s Why We Ride. Designed  
as both an explanation for  
outsiders and an anthem for those  
within the fold, this new book  
presents the insights of Mark  
Barnes, PhD, a motorcycling  
clinical psychologist. As a popular  
columnist at Motorcycle  
Consumer News for more than  
20 years, Dr. Barnes articulates  
the elusive physical, emotional,  
and interpersonal elements that  
make the world of the  
motorcyclist such a rich and  
exciting place. His wide-ranging  
text covers both sports psychology  
and the psychoanalysis of  
common riding experiences,  
including the results of Dr.  
Barnes ' own empirical research.  
Heartfelt and thought provoking,  
here is a straightforward account  
of what makes real motorcyclists  
tick. Inside Why We Ride: What  
makes all the hazards and  
hardships of riding a motorcycle  
worthwhile to perfectly sane,  
intelligent, and responsible  
individuals Insights from clinical  
psychologist and moto-journalist  
Dr. Mark Barnes Examination of  
the complex gratifications,  
relentlessly compelling passions,  
and deeply personal experiences  
that motivate motorcyclists Sports  
psychology, psychoanalysis of  
common riding experiences, and  
reflections on the author ' s  
personal journey as a rider Results  
of the author ' s own empirical  
research on the motives of  
motorcyclists Thought-provoking  
exploration of the human  
dimension of motorcycling Special  
section on how riders achieve the  
quasi-mystical state of " Flow, "  
a concept currently at the center

Eighteen countries. Five shock absorbers. Two bikers. One amazing adventure... After their fantastic trip round the world in 2004, fellow actors and bike fanatics Ewan

McGregor and Charley Boorman couldn't shake the travel bug. Inspired by their UNICEF visits to Africa, they knew they had to go back and experience this extraordinary continent in more depth. And so they set off on their 15,000-mile journey with two new BMWs loaded up for the trip. Their route took them from John O'Groats at the northernmost tip of Scotland to Cape Agulhas on the southernmost tip of South Africa. Along the way they rode some of the toughest terrain in the world -- and met some of the friendliest people. They rode their bikes right up to the pyramids in Egypt and visited Luke Skywalker's house in Tunisia. They met people who had triumphed over terrifying experiences -- former childhood soldiers in Uganda and children living amidst the minefields of Ethiopia. They had a close encounter with a family of gorillas in Rwanda and were nearly trampled by a

herd of elephants in Botswana. Riding through spectacular scenery, often in extreme temperatures, Ewan and Charley faced their hardest challenges yet. With their trademark humor and honesty they tell their story -- the drama, the dangers and sheer exhilaration of riding together again, through a continent filled with magic and wonder.

Serious Games and Edutainment Applications Trail Blazer Publications  
With the continued application of gaming for training and education, which has seen exponential growth over the past two decades, this book offers an insightful introduction to the current developments and applications of game technologies within educational settings, with cutting-edge academic research and industry insights, providing a greater understanding into current and future developments and advances within this field. Following on from

the success of the first volume in 2011, researchers from around the world presents up-to-date research on a broad range of new and emerging topics such as serious games and emotion, games for music education and games for medical training, to gamification, bespoke serious games, and adaptation of commercial off-the-shelf games for education and narrative design, giving readers a thorough understanding of the advances and current issues facing developers and designers regarding games for training and education. This second volume of *Serious Games and Edutainment Applications* offers further insights for researchers, designers and educators who are interested in using serious games for training and educational purposes, and gives game developers with detailed information on current topics and developments within this growing area.

"This book, a polished, winding meditation on the theory and fractiousness of motorcycles, celebrates both their eccentric history and the wary pleasures of touring."—*The New Yorker*  
In a book that is "a must for anyone who has loved a motorcycle" (Oliver Sacks), Melissa Pierson captures in vivid, writerly prose the mysterious attractions of motorcycling. She sifts through myth and hyperbole: misrepresentations about danger, about the type of people who ride and why they do so. *The Perfect Vehicle* is

not a mere recitation of facts, nor is it a polemic or apologia. Its vivid historical accounts—the beginnings of the machine, the often hidden tradition of women who ride, the tale of the defiant ones who taunt death on the racetrack—are intertwined with Pierson's own story, which, in itself, shows that although you may think you know what kind of person rides a motorcycle, you probably don't. Cycle World Magazine Fox Chapel Publishing An adventure eight years in the making about not only navigating 6000 miles across America on dirt roads, but also navigating a divorce, career changes, addiction, and a mental disorder. A deeply personal and often humorous look at phobias, spirituality, and getting along with others. This book has numerous cringe-worthy moments from the highest mountain passes to claustrophobic caves and the path is often

bumpy. National Agenda for Motorcycle Safety Simon and Schuster A thoughtful and thought-provoking collection of personal and accessible poems by a poet from Anglesey. Adventure Motorcycling Manual - 2nd Edition MotorBooks International Suspension is probably the most misunderstood aspect of motorcycle performance. This book, by America's premier suspension specialist, makes the art and science of suspension tuning accessible to professional and backyard motorcycle mechanics alike. Based on Paul Thede's wildly popular Race Tech Suspension Seminars, this step-by-step guide shows anyone how to make their bike, or their kid's, handle like a pro's. Thede gives a clear account of the three forces of suspension that you must understand to make accurate assessments of your suspension's condition. He outlines testing procedures that will help you gauge how well you're improving your suspension, along with

your riding. And, if you're inclined to perfect your bike's handling, he even explains the black art of chassis geometry. Finally, step-by-step photos of suspension disassembly and assembly help you rebuild your forks and shocks for optimum performance. The book even provides detailed troubleshooting guides for dirt, street, and supermoto--promising a solution to virtually any handling problem. Motorcyclist's Guide to Travel Human Rights Watch Riding motorcycles is fun, but author Ken Condon maintains that there is a state of consciousness to be achieved beyond the

simple pleasure of riding down the road. Riding in the Zone helps riders find that state of being. It's the experience of being physically and mentally present in the moment, where every sense is sharply attuned to the ride. Your mind becomes silent to the chatter of daily life, and everyday problems seem to dissolve. You feel a deeper appreciation for life. Your body responds to this state of being with precise, fluid movements, you feel in balance, your muscles are relaxed, and it seems as though every input you make is an expression of mastery. This is "the Zone." Condon identifies all of the factors that affect entering the Zone and addresses each one individually, from the development of awareness and mental skills to mastering physical control of the motorcycle. At the end of each chapter are drills designed to transform the book's ideas into solid, practical riding skills. Riding in the Zone takes riders to the next level in their skill set. Kathmandu via Machu Picchu Overlanders' Handbook covers everything you need to know in one comprehensive manual"--Back cover. An Anthology of Classic Australian Folklore Lulu Press, Inc

At the age of 19, a young Croatian by the name of Petar Rikic decided to leave home and travel around the world by motorcycle. Throughout the course of this immense journey he experienced an equally immense diversity of peoples, landscapes and cultures. By crossing borders, learning languages and immersing himself in dozens of unique communities he came to the life-changing conclusion that in order to become more alive and free, we need to erase the borders and boundaries that confine us politically, emotionally, culturally and psychologically. As a young man's travel journal of experiences, composed on a laptop while travelling by motorcycle, Around the World jumps from juvenile travel narrative to pseudo-philosophical enquiry, from initial adolescent exuberance to something akin to mature reflection. Much like the geography that whizzes by along paved highways, dirt roads and hidden trails, Petar Rikic spins, thinks, writes and

rides his way into the deep and multilayered territory of life's great questions and realizes that there really are no great answers beyond the act of searching itself. The Croatian edition of Around the World has been translated into English and Spanish, with proceeds going to support and protect the Amazon environment and the rights of indigenous people living there.

The task of choosing the right prostate cancer treatment is daunting. It is further complicated by conflicting information the patient receives from physicians and the Internet. This book is written by a prostate cancer survivor who now runs an international prostate cancer support group. It's about his journey and the important things he learned along the way. It is the book the author wishes had been available when he was diagnosed 6 years ago. It is intended to provide specific information for men who are at risk or have been recently diagnosed with prostate cancer. All major treatment options are examined and the pros

and cons of each are summarized. A relatively new, non-invasive, highly effective treatment is highlighted. It is an option that cures cancer as well as any other option, but generally leaves the patient with a higher quality of life and fewer, if any, side effects. This book has been endorsed by several physicians as well as other highly respected people from all walks of life.
