Jupiter's Travels - Ted Simon's astonishing 4 year motorbike journey around the world The book that inspired Ewan McGregor's Long Way Round In the late 1970s Ted Simon set off on a Triumph and rode 63,000 miles over four years through fifty-four countries in a journey that took him around the world. Through breakdowns, prison, war, revolutions, disasters and a Californian commune, he travelled into the depths of fear and reached the heights of euphoria. He met astonishing people and was treated as a spy, a welcome stranger and even a god. For Simon the trip became a journey into his own soul, and for many others - including bikers Charley Boorman and Ewan McGregor - it provides an inspiration they will never forget. This classic text, which has informed a whole genre of travel writing in the thirty years since it was first published, will never be bettered for sheer adventure, passion, humour and honesty. Brought up in England by a German mother and a Romanian father, Ted Simon found himself impelled by an insatiable desire to explore the world. It led him to abandon an early scientific career in favour of journalism, and he has worked for several newspapers and magazines on Fleet Street and elsewhere. Ted Simon is also the author of Riding Home and The Gypsy in Me.

Riding motorcycles is fun, but author Ken Condon maintains that there is a state of consciousness to be achieved beyond the simple pleasure of riding down the road. Riding in the Zone helps riders find that state of being. It's the experience of being physically and mentally present in the moment, where every sense is sharply attuned to the ride. Your mind becomes silent to the chatter of daily life, and everyday problems seem to dissolve. You feel a deeper appreciation for life. Your body responds to this state of being with precise, fluid movements, you feel in balance, your muscles are relaxed, and it seems as though every input you make is an expression of mastery. This is "the Zone." Condon identifies all of the factors that affect entering the Zone and addresses each one individually, from the development of awareness and mental skills to mastering physical control of the motorcycle. At the end of each chapter are drills designed to transform the book's ideas into solid, practical riding skills. Riding in the Zone takes riders to the next level in their skill set.

At the age of 19, a young Croatian by the name of Petar Rikic decided to leave home and travel around the world by motorcycle. Throughout the course of this immense journey he experienced an equally immense diversity of peoples, landscapes and cultures. By crossing borders, learning languages and immersing himself in dozens of unique communities he came to the life-changing conclusion that in order to become more alive and free, we need to erase the borders and boundaries that confine us politically, emotionally, culturally and psychologically. As a young man's travel journal of experiences, composed on a laptop while travelling by motorcycle, *Around the World* jumps from juvenile travel narrative to pseudo-philosophical enquiry, from initial adolescent exuberance to something akin to mature reflection. Much like the geography that whizzes by along paved highways, dirt roads and hidden trails, Petar Rikic spins, thinks, writes and rides his way into the deep and multilayered territory of life's great questions and realizes that there really are no great answers beyond the act of searching itself. The Croatian edition of *Around the World* has been translated into English and Spanish, with proceeds going to support and protect the Amazon environment and the rights of indigenous people living there.

In this adventure motorsports memoir, the first Canadian motorcycle racer to complete the infamous Paris-Dakar Rally recounts his incredible journey. The Paris-Dakar Rally is without question the most arduous and notorious off-road motorsports event on the planet. Since its inception in 1979, it has attracted more than three thousand adventurers from all walks of life. The men and women who have taken up the "Dakar challenge" have at least one thing in common: a desire to measure themselves against the desolate sands of the Sahara. In 2001, Canadian adventure racer Lawrence Hacking entered what would be the last rally on the iconic route from Paris to Dakar. In *To Dakar and Back*, Hacking, in collaboration with motorsport journalist Wil De Clercq, recounts the three weeks of blood, sweat, and tears that took him on that ten thousand kilometer journey in the heat of competition from the glitzy streets of the French capital through the hinterland of North Western Africa and the triumph of self-realization. *To Dakar and Back* Lulu.com

For any aspiring adventure motorcycle rider, the biggest decisions are what bike to choose and how to go about kitting it out. Though some of the top adventure bikes currently on sale could arguably roll off the showroom floor and carry you just about anywhere in the world, it is human nature to tweak, enhance, customize and ultimately personalize your chosen machine before heading off. From simple questions such as the choice of tires and the preferred luggage system, to more complex options such as navigation and communication equipment, there are myriad choices. This extensively illustrated practical book provides in-depth coverage on preparing an adventure motorcycle for the journey of a lifetime.

Adventure Motorcycling Handbook Haynes Publishing UK

This best-selling book is also " #1 book in motorcycle safety " (Nielsen BookScan) and essential reading for all motorcyclists regardless of their years of experience. Author David L. Hough, a revered motorcycle author, columnist, and riding-safety consultant, lays out a clear course for all riders who want to sharpen their handling skills and improve their rides. This second edition, expanded and now in full color, offers new riders and road warriors the exact kind of advice they need to be prepared for anything when on the road, how to avoid accidents, and how to handle the unexpected. Hough, who began motorcycling in the 1960s, tackles every imaginable topic—from the mechanics of the bike, selection of the right-sized bike, and basic riding skills to night riding, group outings, and advanced survival tactics. In the chapter called " Motorcycle Dynamics, " Hough spells out the equipment needed and basic skills required to control a bike, and specifically keeping the rider ' s safety and ability to avoid potentially injurious or fatal crashes. The author is outspoken and direct when it comes to safety, and he emphasizes the importance of the rider ' s braking abilities and spells out how to improve them. The chapter offers six tried-and-true techniques for quick-stop tactics, critical for every rider to understand and master. He also addresses other vital skills that riders need to evaluate and improve, such as turning, maintaining balance and stability, and steering. He defines, compares, and analyzes the ins and outs of steering and control: direct steering, countersteering, push steering, out-tracking, coning, u-turns, and directional control. The chapter called " Cornering Habits " is a virtual master class in acceleration, deceleration, use of weight, throttle, leaning, and handling challenging terrain. Hough ' s skill as a photographer and illustrator adds a graphic element to his books that leads to immediate understanding of the concepts he explains. The detail offered in each section of the book can only come from decades on the road, and the author is the consummate instructor, assigning homework to the readers in the form of exercises to practice and improve specific techniques that he outlines and illustrates in the text. Any rider who would venture out on the road without David Hough ' s voice in his head takes an unnecessary risk with his own life. Proficient

Motorcycling takes riders from long, snaking country roads right into the traffic of the big city, and Hough offers the best advice for riders dealing with the most challenging conditions, whether it 's road construction, snap-jawed intersections, skateboarders, or suddenly slippery road surfaces. A critical section of the book offers riders advice on how to deal with automobiles, including aggressive car drivers, oblivious SUV drivers, or "blind" truck drivers. The book offers the kind of first-hand experience that can literally save riders ' lives, as illustrated in the chapters "Booby Traps" and "Special Situations," which offer evasive tactics and advice to avoid and handle everything from slick surfaces, curbs, and construction plates to ferocious dogs, hazardous wildlife, and difficult weather conditions. The final chapter of the book, "Sharing the Ride," is geared toward experienced riders who travel together in groups or who travel with a second passenger on the bike. Topics covered are formation, packing for trips, communication between riders, sidecars, trikes, and more. The book concludes with a resources section of organizations, training schools, educational tools, and websites; a glossary of 80+ terms; and a complete index.

Cycle World Magazine Motorbooks International

For more than three years Maarten Munnik traveled on his motorbike around the world. From Europe through Asia to Australia, and from South America to Alaska. 100,000 miles of culture, adventure and most of all butt-pain. Every single day would be worthy of a chapter in this book, but there is just no printing-press large enough to print a book like that. Therefore you will have to settle with this collection of 'tales from the road'. Well aware of his own 'unsophisticated' view on the world, Maarten tells his tales the way he experienced them himself. He is no hero, not even a real adventurer. As he says himself: he is just stupid and naive and that combination leads him into, through and out of many unusual situations.

Sometimes dramatic, sometimes hilarious, but always different.
