"In its resolutions 57/141 and 58/240, the General Assembly decided to establish a regular process under the United Nations for global reporting and assessment of the state of the marine environment, including socioeconomic aspects, both current and foreseeable, building on existing regional assessments. In its resolution 71/257, the Assembly recalled that the scope of the first cycle of the Regular Process focused on establishing a baseline and decided that the scope of the second cycle would extend to evaluating trends and identifying gaps. The programme of work for the period 2017-2020 of the second cycle of the Regular Process includes the preparation by the Group of Experts of the Regular Process for Global Reporting and Assessment of the State of the Marine Environment, including Socioeconomic Aspects, of the second World Ocean Assessment, building on the baselines established by the First Global Integrated Marine Assessment (first World Ocean Assessment). In its resolution 72/73, the Assembly decided that the Group of Experts should proceed on the basis of a single comprehensive assessment. The present document was prepared by the Group of Experts in accordance with those decisions"--Summary.

Magical Images: A Handbook of Stereo Photography provides both practical and theoretical understanding of stereoscopic imaging, primarily via photographic techniques, both film and digital. The book is in 3 parts Part 1 consists of fifteen chapters primarily devoted to the practical aspects of three-dimensional photography and imaging. This part of the book deals with the capture, processing and

viewing of stereo images. Part 2 comprises six chapters in which the theoretical principles of the subject are analyzed in detail, to emphasize how different variables can affect the quality of stereoscopic images. Part 3 is made up of fourteen supplements which contain further technical information on various features of stereo photography, both theoretical and practical! The book also contains a number of stereoscopic images taken by the author purely for readers to enjoy!

Cycle World Magazine CarTech Inc

Beginning with the basics of computers, the book provides an in-depth analysis of various constructs of C. The key topics include iterative and decision-control statements, functions, recursion, arrays, strings, pointers, structures and unions, and file management. It deals separately with the fundamental concepts of linked lists - the preferred data structure for dynamic allocation of memory. The book also includes a chapter on different searching and sorting algorithms and analysis of time and space complexity of algorithms.
